## GCP-SOE-B Dumps Free Download, GCP-SOE-B Valid Exam Blueprint

Our GCP-SOE-B exam braindumps offer you a wide and full coverage of the keypoints on the career-oriented certification and help you pass the exam without facing any difficulty. And you will find that the subject is well compiled to the content of the GCP-SOE-B training guide in our three different versions. They are the PDF, Software and APP online. The content of these versions is the same, but the displays of our GCP-SOE-B learning questions are all different. You can choose the favorite one.

## Google Security Operations Engineer (Beta) Sample Questions (Q37-Q42):

### NEW QUESTION # 37

You are a security operations engineer in an enterprise that uses Google Security Operations (SecOps). Your organization recently faced a cybersecurity breach. You need to increase the threat analytics as quickly as possible. What should you do?

- A. Ingest data from a threat intelligence platform (TIP) into Google SecOps.
- B. Develop YARA-L detection rules that focus on threat intelligence.
- C. Design YARA-L detection rules based on Google SecOps Marketplace use cases.
- **D. Enable curated detections to identify threats.**

**Answer: D**

### NEW QUESTION # 38

Your team is responsible for cybersecurity for a large multinational corporation. You have been tasked with identifying unknown

command and control nodes (C2s) that are potentially active in your organization's environment. You need to generate a list of potential matches within the Next 24 hours. What should you do?

- A. Write a rule in Google Security Operations (SecOps) that scans historic network outbound connections against ingested threat intelligence. Run the rule in a retrohunt against the full tenant.
- B. Write a YARA-L rule in Google Security Operations (SecOps) that compares network traffic of endpoints to low prevalence domains against recent WHOIS registrations.
- C. Load network records into BigQuery to identify endpoints that are communicating with domains outside three standard deviations of normal.
- D. Review Security Health Analytics (SHA) findings in Security Command Center (SCC).

**Answer: A**

#### NEW QUESTION # 39

You are developing a playbook to respond to phishing reports from users at your company. You configured a UDM query action to identify all users who have connected to a malicious domain. You need to extract the users from the UDM query and add them as entities in an alert so the playbook can reset the password for those users. You want to minimize the amount of effort required by the SOC analyst. What should you do?

- A. Configure a manual Create Entity action from the Siemply integration that instructs the analyst to input the Entities Identifier parameter based on the results of the action.
- B. Use the Create Entity action from the Siemply integration. Use the Expression Builder to create a placeholder with the usernames in the Entities Identifier parameter.
- C. Implement an Instruction action from the Flow integration that instructs the analyst to add the entities in the Google SecOps user interface.
- D. Create a case for each identified user with the user designated as the entity.

**Answer: B**

#### NEW QUESTION # 40

You are responsible for identifying suspicious activity and security events in your organization's environment. You discover that some detection rules are being triggered for internal IP addresses in the 192.0.2.0/8 subnet that are causing false positive alerts. You want to improve these detection rules. What should you add to the YARA-L detection rules?

- A. `not net.ip_in_range_cidr(all Se.principal.ip, "192.0.2.0/8")`
- B. `not net.ip_in_range_cidr(any Se.principal.ip, "192.0.2.0/8")`
- C. `net.ip_in_range_cidr(any Se.principal.ip, "192.0.2.0/8")`
- D. `net.ip_in_range_cidr(all Se.principal.ip, "192.0.2.0/8")`

**Answer: B**

#### NEW QUESTION # 41

You work for a telecommunications company that wants to monitor their multi-region 5G network logs in Google Security Operations (SecOps). The logs are currently only available on-premises and are stored in a standalone network-attached storage (NAS) located in four different regions.

You need to ingest the logs into Google SecOps and tag each NAS as a specific log source to avoid IP address aliasing. What should you do?

- A. Configure a Bindplane agent that collects Syslog from each log's location and configure an ingestion label for each log source.
- B. Configure feed management to pull data from each log's location, and configure a namespace for each log source.
- C. Configure feed management to pull data from each log's location, and configure an ingestion label for each log source.
- D. Configure a Bindplane agent that collects Syslog from each log's location, and configure a namespace for each log source.

**Answer: C**

## NEW QUESTION # 42

.....

Before the clients buy our GCP-SOE-B guide prep they can have a free download and tryout before they pay for it. The client can visit the website pages of our exam products and understand our GCP-SOE-B study materials in detail. You can see the demo, the form of the software and part of our titles. As the demos of our GCP-SOE-B Practice Engine is a small part of the questions and answers, they can show the quality and validity. Once you free download the demos, you will find our exam questions are always the latest and best.
