질문 # 263

Case Study 1 - Fabrikam, Inc

Overview

Fabrikam, Inc. is a consulting company that has a main office in Montreal and six branch offices in New York, Seattle, Miami, Houston, Los Angeles, and Vancouver.

Existing Environment

Cloud Environment

Fabrikam has a Microsoft 365 tenant that contains the following resources:

An Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain named corp.fabrikam.com
Microsoft Cloud App Security connectors configured for all supported cloud applications used by the company
Some users have company Dropbox accounts.

Compliance Configuration

Fabrikam has the following in the Microsoft 365 compliance center:

A data loss prevention (DLP) policy is configured. The policy displays a tooltip to users. Users can provide a business justification to override a DLP policy violation.

The Azure Information Protection unified labeling scanner is installed and configured.

A sensitivity label named Fabrikam Confidential is configured.

An existing third-party records management system is managed by the compliance department.

Human Resources (HR) Management System

The HR department has an Azure SQL database that contains employee information. Each employee has a unique 12-character alphanumeric ID. The database contains confidential employee attributes including payroll information, date of birth, and personal contact details.

On-Premises Environment

You have an on-premises file server that runs Windows Server 2019 and stores Microsoft Office documents in a shared folder named Data.

All end-user computers are joined to the corp.fabrikam.com domain and run a third-party antimalware application.

Business Processes

Sales Contracts

Users in the sales department receive draft sales contracts from customers by email. The sales contracts are written by the customers

and are not in a standard format.

Employment Applications

Employment applications and resumes are received by HR department managers and stored in either mailboxes, Microsoft SharePoint Online sites, OneDrive for Business folders, or Microsoft Teams channels.

The employment application form is downloaded from SharePoint Online and a serial number is assigned to each application.

The resumes are written by the applicants and are in any format.

Requirements

HR Requirements

You need to create a DLP policy that will notify the HR department of a DLP policy violation if a document that contains confidential employee attributes is shared externally. The DLP policy must use an Exact Data Match (EDM) classification derived from a CSV export of the HR department database.

The HR department identifies the following requirements for handling employment applications:

Resumes must be identified automatically based on similarities to other resumes received in the past.

Employment applications and resumes must be deleted automatically two years after the applications are received.

Documents and emails that contain an application serial number must be identified automatically and marked as an employment application.

Sales Requirements

A sensitivity label named Sales Contract must be applied automatically to all draft and finalized sales contracts.

Compliance Requirements

Fabrikam identifies the following compliance requirements:

All DLP policies must be applied to computers that run Windows 10, with the least possible changes to the computers.

Users in the compliance department must view the justification provided when a user receives a tooltip notification for a DLP violation.

If a document that has the Fabrikam Confidential sensitivity label applied is uploaded to Dropbox, the file must be deleted automatically.

The Fabrikam Confidential sensitivity label must be applied to existing Microsoft Word documents in the Data shared folder that have a document footer containing the following string: Company use only.

Users must be able to manually select that email messages are sent encrypted. The encryption will use Office 365 Message Encryption (OME) v2. Any email containing an attachment that has the Fabrikam Confidential sensitivity label applied must be encrypted automatically by using OME.

Existing policies configured in the third-party records management system must be replaced by using Records management in the Microsoft 365 compliance center. The compliance department plans to export the existing policies, and then produce a CSV file that contains matching labels and policies that are compatible with records management in Microsoft 365.

The CSV file must be used to configure records management in Microsoft 365.

Executive Requirements

You must be able to restore all email received by Fabrikam executives for up to three years after an email is received, even if the email was deleted permanently.

Hotspot Question

You need to recommend an information governance solution that meets the HR requirements for handling employment applications and resumes.

What is the minimum number of information governance solution components that you should create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Minimum number of retention labels:

	▼
1	
2	
3	
4	

Minimum number of auto-labeling policies:

	▼
1	
2	
3	
4	

정답:

설명:

Answer Area

Minimum number of retention labels:

▼

1

2

3

4

Minimum number of auto-labeling policies:

▼

1

2

3

4

Explanation:

You can apply the same retention label to both the application and resumes. So create one retention label and 2 auto-apply label policies.

질문 # 264

You have a Microsoft 365 E5 subscription that contains a data loss prevention (DLP) policy named DLP1.

DLP1 contains the DLP rules shown in the table.

Name	Priority	User notifications	Policy tip	If there's a match for this rule, stop processing additional DLP policies and rules
Rule1	0	On	Tip 1	Enabled
Rule2	1	On	Tip 2	Enabled
Rule3	2	On	Tip 3	Disabled
Rule4	3	On	Tip 4	Enabled

You need to ensure that when a document matches all the rules, users will see Tip 2. What should you change?

- A. the If there's a match for this rule, stop processing additional DLP policies and rules setting for Rule3 to Enabled
- B. the priority setting of Rule2 to 0
- C. the priority setting of Rule3 and Rule4 to 0
- D. the priority setting of Rule2 to 2

정답: B

질문 # 265

You have a Microsoft SharePoint Online site named Site1 and a sensitivity label named Sensitivity1.

Sensitivity1 adds a watermark and a header to content.

You create a policy to automatically apply Sensitivity1 to emails in Microsoft Exchange Online and Site1.

How will Sensitivity1 mark matching emails and Site1 documents? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Exchange Online emails:  ▼

A header only
A watermark only
A watermark and a header

Site1 documents: ▼

A header only
A watermark only
A watermark and a header

정답:

설명:

Exchange Online emails:  ▼

A header only
A watermark only
A watermark and a header

Site1 documents: ▼

A header only
A watermark only
A watermark and a header

Explanation:

Exchange Online emails: ▼

- A header only
- A watermark only
- A watermark and a header

Site1 documents: ▼

- A header only
- A watermark only
- A watermark and a header

질문 # 266

You have a Microsoft 365 E5 subscription that contains two users named User1 and User2.

You create a sensitivity label that has the following settings:

- * Name: Sensitivity1
- * Define the scope for this label: Items
- * Choose protection settings for files and emails: Mark the content of files or Add custom headers, footers, and watermarks to files and emails that have this label applied You make Sensitivity1 available to User1. User1 performs the following actions:
- * Creates a new email
- * Adds a file named File1 .docx as an attachment to the email
- * Applies Sensitivity1 to the email
- * Sends the email to User2

How will the email and the attachment be marked? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

정답:

설명:

Microsoft

Email: ▼

- Marked with a watermark, a footer, and a header
- Marked with a header and footer only
- Marked with a watermark only
- Marked with a watermark, a footer, and a header
- Not marked

Attachment: ▼

- Not marked
- Marked with a header and footer only
- Marked with a watermark only
- Marked with a watermark, a footer, and a header
- Not marked
