CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q151-Q156):

NEW QUESTION # 151

In Unified SmartConsole Gateways and Servers tab you can perform the following functions EXCEPT _____.

- A. Upgrade the software version
- **B. Open SSH**
- C. Open service request with Check Point Technical Support
- D. Open WebUI

Answer: B

Explanation:

The function that can NOT be performed in the Unified SmartConsole Gateways and Servers tab is Open SSH. SSH is a secure shell protocol that allows remote access to a device via command line interface. The Unified SmartConsole does not provide an option to open SSH from the Gateways and Servers tab, as it is not a graphical user interface. The other functions can be performed in the Unified SmartConsole Gateways and Servers tab, such as upgrading the software version, opening WebUI, or opening service request with Check Point Technical Support.

NEW QUESTION # 152

Which of the following Windows Security Events will NOT map a username to an IP address in Identity Awareness?

- **A. Kerberos Ticket Timed Out**
- B. Kerberos Ticket Requested
- C. Kerberos Ticket Renewed
- D. Account Logon

Answer: A

Explanation:

The Windows Security Event that will NOT map a username to an IP address in Identity Awareness is Kerberos Ticket Timed Out. This event occurs when a Kerberos ticket expires and is not renewed, which means that the user is no longer active on the network. Identity Awareness does not use this event to map a username to an IP address, as it does not indicate a valid user session. The other events are used by Identity Awareness to map a username to an IP address, as they indicate a successful user authentication or activity on the network.

NEW QUESTION # 153

Fill in the blank: SmartConsole, SmartEvent GUI client, and _____ allow viewing of billions of consolidated logs and shows them as prioritized security events.

- A. SmartReporter
- B. SmartTracker
- C. SmartMonitor
- **D. SmartView Web Application**

Answer: D

Explanation:

SmartConsole, SmartEvent GUI client, and SmartView Web Application allow viewing of billions of consolidated logs and shows them as prioritized security events. 1. SmartView Web Application is a web-based interface that provides access to SmartEvent reports and dashboards. 2. Check Point R81 Security Management Administration Guide, Check Point R81 SmartEvent Administration Guide

NEW QUESTION # 154

Fill in the blank: The position of an implied rule is manipulated in the _____ window.

- A. Firewall
- B. NAT
- C. Object Explorer
- **D. Global Properties**

Answer: D

Explanation:

The position of an implied rule is manipulated in the Global Properties window. Implied rules are predefined rules that are not displayed in the rule base. They allow or block traffic for essential services such as communication with Check Point servers, logging, and VPN traffic. The position of an implied rule can be changed in the Global Properties > Firewall > Implied Rules section. 56. How to view Implied Rules in R80.x / R81.x SmartConsole, Implied Rules

NEW QUESTION # 155

What are the three types of UserCheck messages?

- **A. inform, ask, and block**
- B. block, action, and warn
- C. ask, block, and notify
- D. action, inform, and ask

Answer: A

Explanation:

The three types of UserCheck messages are inform, ask, and block. Inform messages notify users about security events and do not require any user action. Ask messages prompt users to choose whether to allow or block an action. Block messages prevent users from performing an action and display a reason. 1. Check Point R81 Logging and Monitoring Administration Guide

NEW QUESTION # 156

.....
