

# Latest 220-1202 Exam Materials | 220-1202 Practice Test Fee

| 1) S.N | NOMINERALS   | ORES  |
|--------|--|---|
| 1.     | A naturally occurring substance obtained by mining which contains the metal in free state or in the form of compounds are called minerals. | Minerals that contain a high percentage of metal, from which it can be extracted conveniently and economically are called ores. |
| 2.     | All the minerals are not the ores.   | All the ores are Minerals.  |
| 3.     | Bauxite and clay are the minerals of aluminium.  | Bauxite is the ore of aluminium.  |

2) (i) Catenation is an ability of an element to form chain of atoms.  
(ii) The following conditions are necessary for catenation.  
(a) The valency of element is greater than or equal to two.  
(b) Element should have an ability to bond with itself  
(c) The self bond must be as strong as its bond with other elements  
(d) Kinetic inertness of catenated compound towards other molecules.  
(iii) Carbon possesses all the above properties and forms a wide range of compounds with itself and with other elements such as H, O, N, S and halogens.

3) (i) Fluorine is most electronegative atom.  
(ii) It has only one unpaired electron.

#### 4) Lanthanide contraction:

As we move across 4f series, the atomic and ionic radii of lanthanoids show gradual decrease with increase in atomic number. This decrease in ionic size is called lanthanoid contraction.

#### Effects (consequence) of lanthanoid contraction:

##### 1. Basicity difference:

As we move from Ce<sup>3+</sup> to Lu<sup>3+</sup>, the basic character of Ln<sup>3+</sup> ions decrease. Due to the decrease in the size of Ln<sup>3+</sup> ions, the ionic character of Ln-OH bond decreases (covalent character increases) which results in the decrease in the basicity.

##### 2. Similarities among lanthanoid:

In the complete f - series only 10 pm decrease in atomic radii and 20 pm decrease in ionic radii is observed. because of this very small change in radii of lanthanoids, their chemical properties are quite similar.

3. The elements of the second and third transition series resemble each other more closely than the elements of the first and second transition series.

(i) In this complex the central metal ion is Ti<sup>3+</sup>, which has d<sup>1</sup> configuration. This single

We are amenable to offer help by introducing our 220-1202 real exam materials and they can help you pass the CompTIA A+ Certification Exam: Core 2 practice exam efficiently. All knowledge is based on the real exam by the help of experts. By compiling the most important points of questions into our 220-1202 guide prep our experts also amplify some difficult and important points. There is no doubt they are clear-cut and easy to understand to fulfill your any confusion about the exam. Our CompTIA A+ Certification Exam: Core 2 exam question is applicable to all kinds of exam candidates who eager to pass the exam. Last but not the least, they help our company develop brand image as well as help a great deal of exam candidates pass the exam with passing rate over 98 percent of our 220-1202 Real Exam materials.

The actual CompTIA A+ Certification Exam: Core 2 (220-1202) certification exam has quite high registration fees, so passing the 220-1202 exam in one attempt becomes mandatory. Test4Engine provides a free 220-1202 exam dumps demo so customers can see the product's features before purchasing. This offers comprehensive 220-1202 practice test questions that cover all the topics students need to cover to crack the CompTIA 220-1202 test. Moreover, This also offers up to 1 year of free 220-1202 questions updates. By using our real CompTIA A+ Certification Exam: Core 2 (220-1202) dumps, it is guaranteed that the candidate passes in one attempt, so our product saves time and money.

## Practical Latest 220-1202 Exam Materials | Amazing Pass Rate For 220-1202 Exam | Valid 220-1202: CompTIA A+ Certification Exam: Core 2

If you purchase our 220-1202 practice materials, we believe that your life will get better and better. You may find a better job with a higher salary or your company will give you a promotion on your 220-1202 certification. So why still hesitate? Act now, join us, and buy our 220-1202 Study Materials. You will feel very happy that you will be about to change well because of our 220-1202 study guide.

### CompTIA A+ Certification Exam: Core 2 Sample Questions (Q39-Q44):

#### NEW QUESTION # 39

A company recently transitioned to a cloud-based productivity suite and wants to secure the environment from external threat actors. Which of the following is the most effective method?

- A. Multifactor authentication
- B. Strong passwords
- C. Encryption
- D. Backups

**Answer: A**

Explanation:

While strong passwords and encryption are important, multifactor authentication (MFA) provides the most effective defense against external threat actors targeting cloud-based services. By requiring a second verification step, such as a push notification, one-time code, or hardware token, MFA ensures that even if credentials are compromised, attackers cannot gain access without the additional factor. This significantly reduces the risk of unauthorized account takeovers in cloud environments.

#### NEW QUESTION # 40

A technician is helping a remote user. The technician asks the user to open a specific folder on the root directory of the computer. The user cannot find a folder with that name. The technician explains that a few settings are needed to allow the folder to appear. Which of the following should the user do to be able to see the folder? (Select two).

- A. Adjust the display properties
- B. Open File Explorer
- C. Open the root drive properties
- D. Set the view extensions to "on"
- E. Configure the system settings
- F. Check the box to view hidden files

**Answer: D,F**

Explanation:

The correct answers are E. Set the view extensions to "on" and F. Check the box to view hidden files, because folders located in the root directory are often hidden or protected system folders by default in Windows operating systems. Windows hides certain files and folders to prevent accidental modification or deletion, especially those critical to system functionality.

According to the Quentin Docter - CompTIA A+ Complete Study Guide, File Explorer includes view options that control whether hidden files, protected operating system files, and file extensions are visible. If these options are disabled, users will not see many system-level folders, even when browsing the root of the drive (such as C:).

The Travis Everett & Andrew Hutz - CompTIA A+ All-in-One Exam Guide explains that enabling "Show hidden files, folders, and drives" allows technicians to view directories that are normally concealed, such as configuration or application folders. Additionally, turning on file name extensions helps identify system folders and files more accurately, especially when troubleshooting or guiding users remotely.

The Mike Meyers / Mark Soper Lab Manual reinforces that simply opening File Explorer or adjusting display resolution does not affect file visibility. The correct fix is to modify File Explorer view settings, specifically enabling hidden items and file extensions. Therefore, enabling hidden files and file extensions is required, making E and F the correct answers.

#### NEW QUESTION # 41

A customer must access the contents of the AppData folder, which is in the local user profile.

Which of the following should a technician configure so the customer can easily navigate to this location?

- A. Ease of Access
- **B. File Explorer Options**
- C. Indexing
- D. Privacy

**Answer: B**

Explanation:

The AppData folder is hidden by default. The technician should configure File Explorer Options to show hidden files so the customer can easily access the folder.

#### **NEW QUESTION # 42**

An administrator must rename the administrator account on a Windows desktop. Which tool is best for this?

- A. gpedit.msc
- B. devmgmt.msc
- **C. lusrmgr.msc**
- D. eventvwr.msc

**Answer: C**

Explanation:

The Local Users and Groups Manager (lusrmgr.msc) is the utility for managing user accounts, including renaming the default Administrator.

From Quentin Docter - Complete Study Guide:

"The lusrmgr.msc snap-in allows renaming and managing local user accounts, including the default administrator.".

#### **NEW QUESTION # 43**

A technician is setting up a Windows server to allow remote desktop connections for multiple users. Which of the following should the technician configure on the workstation?

- A. User Accounts
- B. Computer Management
- C. Ease of Access
- **D. Firewall**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To allow Remote Desktop Protocol (RDP) access, the firewall must be configured to allow inbound connections on TCP port 3389. If the Windows Firewall blocks RDP, users will not be able to connect remotely even if the feature is enabled in system settings.

B: Computer Management allows configuration of services and local users, but not network access.

C: User Accounts is for account setup and control, but enabling remote access requires firewall configuration.

D: Ease of Access is unrelated to remote connectivity-it's for accessibility features.
