Oracle 1Z0-1055-25 Accurate Answers | 1Z0-1055-25 Valid Exam Preparation

1Z0-1055-25 practice test software can be used on devices that range from mobile devices to desktop computers. We provide the Oracle 1Z0-1055-25 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. TestkingPDF provides proprietary preparation guides for the certification exam offered by the 1Z0-1055-25 Exam Dumps. In addition to containing numerous questions similar to the Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) exam, the 1Z0-1055-25 exam questions are a great way to prepare for the Oracle 1Z0-1055-25 exam dumps.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q33-Q38):

NEW QUESTION # 33

You are trying to use the Match in Full option for a purchase order, but your search for the PO is returning no results. Which two are the reasons for this?

- A. The Supplier or Purchase Order is set up for self-billing
- B. The match approval level is set to 3-way matching
- C. The match approval level is set to 4-way matching
- D. The Purchase Order is already partially matched to an invoice

Answer: A,D

NEW QUESTION # 34

Which three are valid reasons why you cannot close your Payables period?

- A. Unaccounted invoices and payments
- B. Bills payable requiring maturity
- C. Incomplete payment files
- D. Unapplied prepayments
- E. Suppliers on payment holds

Answer: A,B,C

Explanation:

Comprehensive and Detailed In-Depth

Closing a Payables period in Oracle Financials Cloud requires that all transactions for the period are fully processed and accounted for. The system enforces certain checks to ensure data integrity and accurate financial reporting. The following are valid reasons that can prevent the closure of a Payables period:

Incomplete Payment Files (Option B):

Payment files that have been initiated but not completed will prevent period closure. All payment processes must be finalized to ensure that all disbursements are accurately recorded.

Reference:

Bills Payable Requiring Maturity (Option C):

Bills payable that have not yet reached their maturity date or have not been accounted for will block the period from closing. It's essential to update the status of all bills payable to reflect their maturity and ensure they are accounted for in the correct period.

Unaccounted Invoices and Payments (Option D):

Invoices and payments that have been entered but not yet accounted for will prevent period closure. All such transactions must be fully processed and posted to the general ledger to ensure financial statements are accurate and complete.

Options A and E are not valid reasons for preventing period closure:

Unapplied Prepayments (Option A):

While unapplied prepayments represent amounts paid in advance that have not yet been matched to invoices, they do not prevent the closure of a Payables period. These can remain unapplied across periods and do not impact the period close process.

Suppliers on Payment Holds (Option E):

Suppliers placed on payment holds indicate that payments to these suppliers are temporarily suspended. This status does not affect the ability to close a Payables period, as it pertains to future payments rather than existing transactions within the period.

In summary, to successfully close a Payables period, ensure that all payment files are complete, bills payable are matured and accounted for, and all invoices and payments are fully processed and posted.

NEW QUESTION # 35

Your company requests you to establish Expense delegates to assist with the management of expenses. Expense delegates will receive a digest notification for each employee they are a delegate for and can then take quick action to identify and fix pending expense items, including outstanding corporate card charges.

After you set up digest notifications, which corporate card charge statuses are included in the outstanding expense reports?

- A. Saved, Withdrawn, Rejected, or Returned
- B. Only Withdrawn
- C. Submitted and Saved
- D. Only Rejected

Answer: A

NEW QUESTION # 36

An installment for \$2,000 USD is due for payment on July 31, 2022. The installment has two discounts: the first discount date is June 15, 2022 for \$150 USD and the second discount date is June 30, 2022 for \$50 USD.

You submit a Payment Process Request with the following criteria:

Payment Date = June 20, 2022

Pay Through Date = July 30, 2022

Date Basis = Due Date

What will be the resulting status of the installment and discount?

- A. The installment is selected and a discount of \$150 USD is applied.
- B. The installment is selected and no discount is applied.
- **C. The installment is not selected because the due date is after the Pay Through Date.**
- D. The installment is not selected because the discount dates are before the Pay Through Date.
- E. The installment is selected and a discount of \$50 USD is applied.

Answer: C

NEW QUESTION # 37

You are trying to use the Match in Full option for a purchase order, but your search for the PO is returning no results.

Which two are the reasons for this?

- **A. The Supplier or Purchase Order is set up for self-billing**
- B. The match approval level is set to 3-way matching
- C. The match approval level is set to 4-way matching
- **D. The Purchase Order is already partially matched to an invoice**

Answer: A,D

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Match in Full feature allows users to create invoices by matching the full amount of a purchase order (PO) efficiently. However, certain conditions can prevent a PO from appearing in the Match in Full search results.

Analysis of Each Option:

A . The match approval level is set to 4-way matching

The match approval level determines the matching requirements between the PO, receipt, inspection, and invoice. A 4-way matching requires that the PO, receipt, accepted quantities from inspection, and invoice quantities all match within defined tolerances before payment approval. This setting, however, does not impact the availability of the PO in the Match in Full search results. Therefore, a 4-way matching configuration is not a reason for the PO not appearing in the search results.

B . The Supplier or Purchase Order is set up for self-billing

Self-billing arrangements mean that the buyer generates the invoice on behalf of the supplier. In such scenarios, the Match in Full feature is not applicable because the invoicing process is handled differently. As per Oracle documentation, "Match in Full can't be used in the following circumstances:... A supplier or the purchase order is set up for self-billing." docs.oracle.com Therefore, if the supplier or PO is configured for self-billing, the PO will not appear in the Match in Full search results.

C . The match approval level is set to 3-way matching

Similar to 4-way matching, a 3-way matching requires that the PO, receipt, and invoice quantities match within tolerances before payment approval. This setting ensures that the goods received and invoiced align with the PO terms. However, the match approval level, whether 3-way or 4-way, does not affect the PO's availability in the Match in Full search results. Thus, a 3-way matching configuration is not a reason for the PO not appearing in the search results.

D . The Purchase Order is already partially matched to an invoice

The Match in Full feature is designed for situations where the supplier sends an invoice for the full amount of the PO. If a PO has already been partially matched to an invoice, it indicates that some portions of the PO have been invoiced, and the remaining amounts do not represent the full PO value. According to Oracle documentation, "Match in Full can't be used in the following circumstances:... The purchase order has already been partially matched to an invoice." docs.oracle.com Therefore, a PO that has been partially matched will not appear in the Match in Full search results.

Conclusion:

The two reasons preventing the purchase order from appearing in the Match in Full search results are:

B . The Supplier or Purchase Order is set up for self-billing

D . The Purchase Order is already partially matched to an invoice

These conditions make the Match in Full feature inapplicable, thereby excluding the PO from the search results.
