# Implementing and Configuring Cisco Identity Services Engine certkingdom actual exam dumps & 300-715 pdf practice

Each format of the Cisco Certification Exams not only offers updated exam questions but also additional benefits. A free trial of the Implementing and Configuring Cisco Identity Services Engine (300-715) exam dumps prep material before purchasing, up to 1 year of free updates, and a money-back guarantee according to terms and conditions are benefits of buying Implementing and Configuring Cisco Identity Services Engine (300-715) real questions today. A support team is also available 24/7 to answer any queries related to the Implementing and Configuring Cisco Identity Services Engine (300-715) exam dumps.

We cannot overlook the importance of efficiency because we live in a society emphasize on it. So to get our latest 300-715 exam torrent, just enter the purchasing website, and select your favorite version with convenient payment and you can download our latest 300-715 exam torrent immediately within 5 minutes. This way you can avoid the problems in waiting for arrival of products and you can learn about the knowledge of 300-715 Quiz guides in a short time. Latest 300-715 exam torrent can vividly embody the spirits and effort we have put into them. And the power of our 300-715 test prep permit you to apprehend the essence of the exam. All elites in this area vindicate the accuracy and efficiency of our 300-715 quiz guides.

Free PDF Online 300-715 Training & Accurate 300-715 Braindump Pdf Ensure You a High Passing Rate

They work together and strive hard to design and maintain the top standard of Cisco 300-715 exam questions. So you rest assured that the 300-715 exam questions you will not only ace your Implementing and Configuring Cisco Identity Services Engine certification exam preparation but also be ready to perform well in the final 300-715 Certification Exam. The 300-715 exam are the real 300-715 exam practice questions that will surely repeat in the upcoming Implementing and Configuring Cisco Identity Services Engine (300-715) exam and you can easily pass the exam.

To pass the Cisco 300-715 Exam, you will need to have a solid understanding of Cisco ISE architecture, deployment models, and best practices. You will also need to be familiar with the various Cisco ISE components, such as the Policy Service, Monitoring and Troubleshooting, and Guest Services. In addition, you should be able to configure and troubleshoot Cisco ISE policies, network access devices, and user and device authentication.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q30-Q35):

NEW QUESTION # 30
An engineer is starting to implement a wired 802.1X project throughout the campus. The task is for failed authentication to be logged to Cisco ISE and also have a minimal impact on the users. Which command must the engineer configure?

- A. authentication host-mode multi-auth
- B. monitor-mode enabled
- C. pae dot1x enabled
- D. authentication open

Answer: D

Explanation:
In the context of a wired 802.1X deployment with Cisco ISE, the requirement is to log failed authentications while minimizing user impact. Let's analyze each option:
A). authentication open - This command configures the port to allow network access regardless of the authentication state. It's useful in situations where specific devices can't perform 802.1X authentication but should still be allowed network access. However, it doesn't specifically address the logging of failed authentications.
B). pae dot1x enabled - PAE (Port Access Entity) refers to the entity on a network device that enforces access control. This command enables 802.1X on the port, which is a prerequisite for implementing 802.1X, but doesn't directly relate to logging failed authentication attempts.
C). authentication host-mode multi-auth - This command configures the port to allow multiple authenticated sessions. This mode is used when multiple devices are connected to the same port (like in a conference room).
While it's relevant for 802.1X environments, it doesn't specifically cater to logging failed authentications or minimizing user impact.
D). monitor-mode enabled - This command is used in the context of 802.1X to enable Monitor Mode on a port.
Monitor Mode allows a port to grant limited network access to endpoints without 802.1X capabilities. It's often used to ease the deployment of 802.1X by monitoring the authentication status without fully enforcing access control, thereby minimizing user impact. It also helps in logging authentication attempts, including failures.
Given these options, the most appropriate command for logging failed authentications while having minimal impact on users would be D. monitor-mode enabled. This command ensures that authentication attempts are monitored and logged, including failures, without fully restricting access, thus minimizing the impact on users who might face issues with the authentication process.

NEW QUESTION # 31
In a Cisco ISE split deployment model, which load is split between the nodes?

- A. device admission
- B. log collection
- C. AAA
- D. network admission

Answer: B

Explanation:
Section: Architecture and Deployment

NEW QUESTION # 32

When setting up profiling in an environment using Cisco ISE for network access control, an organization must use non-proprietary protocols for collecting the information at layer 2.
Which two probes will provide this information without forwarding SPAN packets to Cisco ISE?
(Choose two.)

- A. SNMP query probe
- B. DNS probe
- C. NetFlow probe
- D. DHCP SPAN probe
- E. RADIUS probe

Answer: A,E

Explanation:
https://ciscocustomer.lookbookhq.com/iseguidedjourney/ISE-profiling-design

NEW QUESTION # 33

Which three default endpoint identity groups does cisco ISE create? (Choose three)

- A. blacklist
- B. whitelist
- C. end point
- D. profiled
- E. Unknown

Answer: A,D,E

Explanation:
Default Endpoint Identity Groups Created for Endpoints Cisco ISE creates the following five endpoint identity groups by default:
Blacklist, GuestEndpoints, Profiled, RegisteredDevices, and Unknown. In addition, it creates two more identity groups, such as
Cisco-IP-Phone and Workstation, which are associated to the Profiled (parent) identity group. A parent group is the default identity
group that exists in the system.

NEW QUESTION # 34

Which Cisco ISE node does not support automatic failover?

- A. Inline Posture node
- B. Admin node
- C. Policy Services node
- D. Monitoring node

Answer: C

NEW QUESTION # 35

......

If you purchase Cisco 300-715 exam questions and review it as required, you will be bound to successfully pass the exam. And if
you still don't believe what we are saying, you can log on our platform right now and get a trial version of Implementing and
Configuring Cisco Identity Services Engine 300-715 study engine for free to experience the magic of it.
