Using C\_CPI\_2506 Real Questions will not only help you clear exam with less time and money but also bring you a bright future. We are looking forward to your join.

## SAP Certified Associate - Integration Developer Sample Questions (Q25-Q30):

### NEW QUESTION # 25

You are creating an API in the API management capability within SAP Integration Suite using Edit in API Designer. What is the next step to consolidate the resources?

- A. Generate the microservices.
- B. Generate the client stubs
- C. Generate the server stubs
- D. Generate the database tables.

**Answer: C**

**Explanation:**

After creating an API in the API management capability within SAP Integration Suite using Edit in API Designer, the next step to consolidate the resources is to generate the server stubs. Server stubs are code snippets that implement the API operations on a

server-side application. They can be generated in different languages and frameworks, such as Java, Node.js, Python, or Spring Boot. Generating server stubs can help you to quickly prototype and test your API functionality without writing much code. Reference: Create an API Using the API Designer | SAP Help Portal, Generate Server Stubs | SAP Tutorials

#### NEW QUESTION # 26

Which of the following capabilities within SAP Integration Suite are core for integration? Note: There are 3 correct answers to this question.

- A. Integration Advisor
- B. API Management
- C. Cloud Integration
- D. Open Connectors
- E. Integration Assessment

**Answer: B,C,E**

Explanation:

The following capabilities within SAP Integration Suite are core for integration: Integration Assessment, Cloud Integration, and API Management. Integration Assessment allows you to evaluate your integration landscape and strategy and identify the best-fit integration technologies and tools for your scenarios. Cloud Integration allows you to design, deploy, and monitor integration flows between cloud and on-premise systems using various adapters and protocols. API Management allows you to create, publish, secure, and monitor APIs across different environments and platforms. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

#### NEW QUESTION # 27

You have created an API provider of the type Internet. What http response code indicates success?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

Explanation:

The http response code that indicates success is 200. The 200 response code means that the request was successfully processed and the response contains the expected data. Other response codes in the 2xx range also indicate success, but with some variations. For example, 201 means that a resource was created, 202 means that a request was accepted but not completed yet, and 204 means that there is no content in the response. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

#### NEW QUESTION # 28

What does the messaging model of the Apache Camel Data Model consist of?

- A. Header, body, attachment
- B. Header, properties, attachment
- C. Header, body, properties
- D. Header, Exchange ID, in-message

**Answer: C**

Explanation:

The Apache Camel Data Model, which underpins SAP Cloud Integration's message processing model, consists of:  
Header # Metadata about the message (e.g., content type, correlation IDs).

Body # Main payload of the message.

Properties # Exchange-level metadata, persisted throughout processing but not transferred with the message.

Other options mix in elements like attachments or exchange IDs, but the standard messaging model is header, body, properties.

### NEW QUESTION # 29

What can you use to prevent overload in an OData request and reply call?

- A. Stop parameter
- B. Query filter
- C. HTTP adapter
- D. Paging

**Answer: D**

Explanation:

To prevent overload in an OData request and reply call, you can use paging. Paging is a technique that allows you to retrieve a large number of data sets in smaller chunks or pages. You can use the OData query options \$top and \$skip to specify how many records you want to fetch and how many records you want to skip in each request. This reduces the network load and improves the performance of the OData service. Reference: OData API | SAP Help Portal, SAP Integration Suite: enrich a payload with OData Service | SAP Blogs

### NEW QUESTION # 30

.....

Although at this moment, the pass rate of our SAP C\_CPI\_2506 exam braindumps can be said to be the best compared with that of other exam tests, our experts all are never satisfied with the current results because they know the truth that only through steady progress can our SAP Certified Associate - Integration Developer C\_CPI\_2506 Preparation materials win a place in the field of exam question making forever.
