WGU Information Technology Management QGC1 Sample Questions (Q156-Q161):

NEW QUESTION # 156
What is the role of executive sponsors in a project?

- A. Tracking to ensure all key project milestones are completed on time
- B. Collaborating with project staff to ensure their own interests are represented
- C. Defining and developing the project plan
- D. Providing financial resources for a project

Answer: D

NEW QUESTION # 157
What improves IT sustainability?

- A. Buying the latest devices immediately upon release
- B. Using efficient hardware and power settings
- C. Standardizing high-performance hardware for all tasks
- D. Expanding the size and capacity of data centers

Answer: B

Explanation:
IT sustainability focuses on reducing environmental impact and promoting energy efficiency in technology use. This is achieved through measures such as:
Using energy-efficient hardware
Implementing green data center practices
Adjusting power management settings
Extending equipment life cycles where possible
These practices lower energy consumption, reduce waste, and support corporate social responsibility goals.
Option B: Incorrect-frequent replacement of devices increases e-waste and is not sustainable.
Option C: Incorrect-expanding data centers generally increases environmental footprint.
Option D: Incorrect-using high-performance hardware for all tasks wastes energy when simpler systems would suffice.
Therefore, IT sustainability is improved by using efficient hardware and power settings.

NEW QUESTION # 158
A manager asks a team member to identify the top five customers by total dollars spent on the company's services in the past calendar year. Which phase of the customer relationship management (CRM) system does this represent?

- A. Analyzing
- B. Predicting
- C. Distributing
- D. Reporting

Answer: D

Explanation:
Understanding Reporting in CRM:
The reporting phase of CRM involves extracting data to generate summaries and insights.
Reports help in understanding customer activities, such as identifying top customers based on spending.
Application in the Scenario:
The manager requests a report listing the top five customers by total spending, a classic example of CRM reporting.
Why Other Options Are Incorrect:
Option A (Distributing): Distributing is not a CRM phase.
Option B (Analyzing): Analyzing involves identifying trends or patterns, not generating a simple report.
Option C (Predicting): Predicting is forward-looking and does not match the scenario of reviewing past data.

NEW QUESTION # 159
Which open-source operating system provides a rich environment for high-end workstations and network servers?

- A. Android OS
- B. Linux
- C. Windows
- D. MS-DOS

Answer: B

Explanation:
Linux is an open-source, Unix-like operating system widely used for servers, cloud computing, and high-performance workstations. It offers flexibility, security, and customization, making it the preferred choice for enterprise and web hosting environments.

NEW QUESTION # 160
Which type of memory describes a special type of rewritable memory that is compact and portable?

- A. Random access
- B. Read-only
- C. Flash
- D. Cache

Answer: C

Explanation:
Flash memory is a type of non-volatile rewritable memory that is compact and portable. It is commonly used in USB drives, SSDs, and memory cards. Unlike RAM, which loses data when power is off, flash memory retains stored information even without power.
