

Valid Test NCP-CI-AWS Testking - Relevant NCP-CI-AWS Answers

How to Get Ready for the Nutanix NCP-CI-AWS Exam Quickly?

In today's challenging IT sector, earning the Nutanix NCP-CI-AWS certification helps you accelerate your career. The Nutanix Certified Professional NCP-CI-AWS certification proves your technical expertise and also bolsters your credibility in the industry. Furthermore, success in the NCP-CI-AWS certification exam differentiates you from a pool of thousands of job seekers and enhances your chances of landing well-paid jobs and promotions. However, many applicants encounter problems such as a short time and a lack of self-assessment while preparing for the Nutanix Certified Professional - Cloud Integration - AWS v6.7 NCP-CI-AWS exam. If you are also facing these challenges, don't worry and choose JustCerts, which is dedicated to providing actual and the latest NCP-CI-AWS exam questions in three formats. With the help of these real [Nutanix Dumps](#), you can get ready for the exam in a short time.

Authentic (Valid) Details Regarding The Nutanix NCP-CI-AWS Exam Questions

- VENDOR: (Nutanix)
- EXAM CODE: (NCP-CI-AWS)
- EXAM NAME: (Nutanix Certified Professional - Cloud Integration - AWS v6.7)
- Number OF Questions: (75)
- Certification Name: (Nutanix Certified Professional)
- Exam Language: (ENGLISH)

What's more, part of that ActualTestsQuiz NCP-CI-AWS dumps now are free: <https://drive.google.com/open?id=1zO-PqwOgWbWuoZH33T6TZUwkEwLGQhCT>

Our industry experts are constantly adding new content to NCP-CI-AWS test dumps based on constantly changing syllabus and industry development breakthroughs. We also hired dedicated IT staff to continuously update our question bank daily, so no matter when you buy NCP-CI-AWS Study Materials, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our NCP-CI-AWS test answers, we will still provide you with the benefits of free updates within a year.

Nutanix NCP-CI-AWS Exam Overview:

Certification Vendor:	Nutanix
Exam Name:	Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS)
Exam Number:	NCP-CI-AWS
Exam Price:	USD 199
Exam Duration:	120 minutes
Passing Score:	3000 (scaled score, range 1000–6000)
Real Exam Qty:	75
Related Certifications:	Nutanix Certified Specialist - Multi-Cloud Nutanix Certified Professional (NCP)
Certificate Validity Period:	2 years
Available Languages:	English

Exam Format:	Multiple select, Multiple choice, Scenario-based
Recommended Training:	Nutanix Cloud Clusters on AWS Administration Nutanix Official Learning Path
Exam Registration:	Pearson VUE Registration
Sample Questions:	Nutanix NCP-CI-AWS Sample Questions
Exam Way:	Online proctored or onsite at Pearson VUE test centers
Pre Condition:	Recommended: 2 years IT experience, 12 months Nutanix experience, 6 months AWS experience; no mandatory prerequisites
Official Syllabus URL:	https://www.nutanix.com/support-services/training-certification/certifications/certification-details-nutanix-certified-professional-cloud-integration-aws

Hot Valid Test NCP-CI-AWS Testking Pass Certify | Professional Relevant NCP-CI-AWS Answers: Nutanix Certified Professional - Cloud Integration - AWS

We have been developing our NCP-CI-AWS practice engine for many years. We have no doubt about our quality. Our experience is definitely what you need. To combine many factors, our NCP-CI-AWS real exam must be your best choice. And our NCP-CI-AWS Exam Questions have been tested by many of our loyal customers, as you can find that the 98% of them all passed their NCP-CI-AWS exam and a lot of them left their warm feedbacks on the website.

Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details
Topic 1	Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.
Topic 2	Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.
Topic 3	Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.
Topic 4	Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.

Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q121-Q126):

NEW QUESTION # 121

In a heterogeneous NC2 cluster on AWS, what is the maximum number of different instance types that can be mixed in a single cluster?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

A heterogeneous cluster allows organizations to mix different bare-metal instance types to satisfy diverse workload requirements, such as combining compute-heavy and storage-heavy nodes. According to Nutanix architectural guidelines for NC2 on AWS, administrators can mix a maximum of 3 different instance types within a single cluster. This limitation ensures that the Distributed Storage Fabric (DSF) can maintain predictable performance and balanced data distribution across the varied hardware. When designing such a cluster, it is also vital that the number of nodes of each type is a multiple of the Replication Factor (RF) to ensure data redundancy is maintained. Mixing more than three types could lead to significant performance skews and complex management of hardware affinity rules.

NEW QUESTION # 122

What is an available log module when configuring a syslog server in the Prism Central Admin Center?

- A. API Audit
- B. Prism
- C. Zookeeper
- D. Acropolis

Answer: D

Explanation:

* When configuring a syslog server in the Prism Central Admin Center for Nutanix, one of the available log modules is Acropolis.
* The Acropolis module logs system events related to the Nutanix Acropolis operating system, which is critical for monitoring and auditing system activities and performance.
* Configuring syslog with the Acropolis module ensures that important events and issues related to the Acropolis environment are captured and can be forwarded to an external syslog server for centralized logging and analysis.
Refer to the Nutanix documentation on Prism Central and syslog configuration for the full list of available log modules and detailed steps for configuration.

NEW QUESTION # 123

Where would tasks related to a recovery using Multi-Cloud Snapshot Technology be monitored?

- A. Nutanix NC2 Console > Tasks > List
- B. Nutanix Marketplace > Day Two Operations
- C. PC > Data Protection > Protection Policies
- D. PC > Data Protection > Recovery Plans

Answer: D

Explanation:

Multi-Cloud Snapshot Technology (MST) allows Nutanix clusters to protect data by taking snapshots directly to cloud object storage, such as Amazon S3.

When an administrator initiates a recovery from these snapshots, the process is managed through Prism Central (PC), which serves as the orchestration layer for disaster recovery. Specifically, the execution and progress of the recovery are tracked under the Recovery Plans section within the Data Protection menu.

Recovery Plans define the order of VM power-ons, IP address changes, and script executions. By monitoring this section, administrators can verify the status of each step, ensure that the RTO (Recovery Time Objective) is being met, and troubleshoot any failures during the restoration of workloads from the cloud snapshots.

NEW QUESTION # 124

What role is needed to create a cluster?

- A. Cluster Super Admin
- B. Customer Security Administrator
- C. Customer Administrator
- D. Cluster Administrator

Answer: A

Explanation:

- * To create a cluster in Nutanix Cloud Integration with AWS, the role needed is Cluster Super Admin.
 - * The Cluster Super Admin role provides the highest level of privileges required to perform critical operations such as creating, managing, and deleting clusters.
 - * This role is essential for overseeing the cluster setup and configuration processes, ensuring the user has full control over the cluster lifecycle.
- Refer to the Nutanix documentation on roles and permissions for NC2 on AWS for further details on the capabilities and required permissions for cluster creation.

NEW QUESTION # 125

The cluster is configured as follows:

- * 8 nodes
- * Prism Central Deployed
- * Files Deployed

Following the deployment, the administrator experiences network connectivity issues.

Which reason explains the connectivity issues?

- A. The 192.168.5.0/24 range is reserved by IANA,
- B. The 192.168.5.0/24 range is not a valid CIDR range.
- C. The 192.168.5.0/24 range is reserved for internal cluster usage.
- D. The 192.168.5.0/24 range does not have enough IP addresses available.

Answer: C

Explanation:

The 192.168.5.0/24 range is often reserved for internal cluster communication within Nutanix deployments.

Using this CIDR range for other purposes could lead to network conflicts and connectivity issues, as it might interfere with the internal operations and communication channels of the Nutanix cluster.

Ensuring that the CIDR range is not overlapping with any reserved ranges is crucial for maintaining proper network connectivity and cluster functionality.

Reference:

Refer to the Nutanix documentation on network configuration and best practices for NC2 deployments to confirm reserved IP ranges and their appropriate use.
