

NCP-BC Real Exam Questions in Three Formats

P.S. Free & New NCP-BC dumps are available on Google Drive shared by Dumps4PDF: <https://drive.google.com/open?id=1MGSWSx-XcOsRwBODdk0ilwWfVmk3yS4>

We can't forget the advantages and the conveniences that reliable NCP-BC real dump complied by our companies bring to us. First, by telling our customers what the key points of learning, and which learning NCP-BC exam training questions is available, they may save our customers money and time. They guide our customers in finding suitable jobs and other information as well. Secondly, a wide range of practice types and different version of our NCP-BC Exam Training questions receive technological support through our expert team. Without this support our customers would have to pay much more for practicing. Thirdly, perfect NCP-BC practice materials like us even provide you the opportunities to own goal, ideal struggle, better work, and create a bright future.

Nutanix NCP-BC Exam Syllabus Topics:

Topic	Details
Topic 1	• Test Business Continuity & Disaster Recovery (BCDR) Solutions: Covers validating DR readiness by executing planned and unplanned failovers, testing connectivity and throughput between sites, and verifying recovery plan accuracy.
Topic 2	• Perform Business Continuity & Disaster Recovery (BCDR) Tasks: Covers hands-on execution of DR operations including self-service restores, snapshot recovery, failover tasks, post-failover cleanup, and migrating from legacy protection domains to modern protection policies.

Topic 3	• Interpret and Configure Business Continuity & Disaster Recovery (BCDR) Requirements: Covers planning and configuring DR solutions by evaluating RPO needs, resource limits, security settings, recovery plans, and network • storage requirements across various Nutanix environments.
Topic 4	• Troubleshoot Business Continuity & Disaster Recovery (BCDR) Failures: Covers diagnosing and resolving DR failures related to network issues, replication errors, third-party backup problems, and misconfigured DR setups.

Nutanix NCP-BC Book Pdf | Pass NCP-BC Rate

Do you worry about not having a long-term fixed study time? Do you worry about not having a reasonable plan for yourself? NCP-BC exam dumps will solve this problem for you. Based on your situation, including the available time, your current level of knowledge, our study materials will develop appropriate plans and learning materials. You can use NCP-BC test questions when you are available, to ensure the efficiency of each use, this will have a very good effect. You don't have to worry about yourself or anything else. Our study materials allow you to learn at any time. Regardless of your identity, what are the important things to do in NCP-BC Exam Prep, when do you want to learn when to learn?

Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 Sample Questions (Q79-Q84):

NEW QUESTION # 79

A Protection Policy is configured with a Nearsync replication schedule (15-minute RPO). An administrator observes that the system has temporarily transitioned to an hourly replication schedule.

Which scenario would cause this automatic transition from Nearsync to Asynchronous (hourly) replication?

- A. The Nutanix Cloud Infrastructure license expired.
- **B. A new VM was added to the protection category, triggering a full initial sync.**
- C. The bandwidth is insufficient for the change rate.
- D. A Test Failover operation is currently running on the recovery site.

Answer: B

NEW QUESTION # 80

An administrator has recently completed the initial configuration of Nutanix Disaster Recovery for a production environment. Protection Policies and Recovery Plans have been configured and validated by the senior infrastructure team.

The administrator has confirmed that the expected categories are correctly associated with both the Protection Policies and Recovery Plans. During a scheduled test failover, the administrator notices that several VMs are missing from the recovery.

The administrator reviews the environment and notes the following:

The Protection Summary tab does not show any warnings or errors

No replication tasks are currently ongoing

The missing VMs were all deployed within the last two weeks as part of a new application rollout. The missing VMs are running on the same cluster as other VMs that recovered successfully during the test failover. The application team followed the standard VM deployment checklist but did not coordinate with the infrastructure team during provisioning. Given this information, what is the most likely cause of the missing VMs?

- A. The new VMs require an initial full replication before they are eligible to appear in a test failover.
- B. The Protection Policies experienced replication lag during the two-week period, resulting in incomplete recovery points for the newly deployed VMs.
- C. The Recovery Plans were not re-synchronized after the new VMs were deployed, causing them to be excluded from the test failover.
- **D. The newly deployed VMs were not assigned the correct categories during provisioning, so they were never included in the Protection Policy.**

Answer: D

NEW QUESTION # 81

An administrator has set up asynchronous replication between the Marseille and Paris clusters for the VMs in the FIN-PROD storage container. After a planned production failover from Paris to Marseille, the administrator noticed that the VMs were scattered across all the storage containers in the Marseille cluster.

Which statement is true regarding this scenario?

- **A. A storage policy is setup on the Paris cluster and missing on the Marseille cluster.**
- B. The recovery plan did not contain a valid network mapping.
- C. The recovery plan did not contain a valid storage mapping.
- D. The FIN-PROD storage container does not exist on Marseille cluster.

Answer: A

NEW QUESTION # 82

When designing a Disaster Recovery strategy to an NC2 cluster using MST, which technical limitation impacts the Recovery Plan and workload compatibility?

- **A. Automated failover is natively supported in the "Zero Compute" configuration but strictly requires configuring an external IPAM to manage and reassign IP addresses.**
- B. The "Pilot Light" configuration allows to select multiple on-premise clusters as sources within a single protection policy to automate the failover of AHV and ESXi VMs.
- C. The "Zero Compute" configuration requires manual restoration of workloads (automated failover is not supported), and MST currently only protects AHV VMs.
- D. To ensure resilience on NC2, both MST DR and "Cluster Protect" features must be configured simultaneously on the same cluster.

Answer: A

NEW QUESTION # 83

While attempting to execute a Commvault backup plan, an administrator received the following error for several VMs:

Virtual Machine not found

After confirming the VMs exist, the administrator digs deeper and finds the following related error message:

Event Code 91:4 Virtual machine [Nutanix-Web-Server] was not found. Please verify that the virtual machine still exists and that the host is in the connected state. If the virtual machine does not exist remove it from the subclient. If the virtual machine does exist reselect the virtual machine and re-add it to the subclient content.

Which action should the administrator take to enable successful backups?

- A. Ensure Virtual Trusted Platform Module (vTPM) is disabled on the VMs.
- B. Ensure the VM is created with local Key Management Server (KMS).
- C. Ensure primary and recovery clusters are not registered to the same KMS.
- **D. Upgrade Nutanix Guest Tools (NGT) on the VM to the latest version.**

Answer: D

NEW QUESTION # 84

.....

Our Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 (NCP-BC) exam dumps comes in three formats: Nutanix NCP-BC PDF dumps file, desktop-based practice test software, and a web-based practice exam. These versions are specially designed to make Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 (NCP-BC) preparation for users easier. NCP-BC Questions in these formats of Dumps4PDF's material are enough grasp every test topic in the shortest time possible.
