You may be get refused by so many Professional-Cloud-Security-Engineer study dumps in the present market, facing so many similar Professional-Cloud-Security-Engineer study guide , so how can you distinguish the best one among them? We will give you some suggestions, first of all, you need to see the pass rate, for all the efforts we do to the Professional-Cloud-Security-Engineer Study Dumps is to pass . Our company guarantees the high pass rate. Second, you need to see the feedback of the customers, since the customers have used it, and they have the evaluation of the Professional-Cloud-Security-Engineer study guide.

Up to now, there are three versions of Professional-Cloud-Security-Engineer exam materials for your choice. So high-quality contents and flexible choices of Professional-Cloud-Security-Engineer learning mode will bring about the excellent learning experience for you. Though the content of these three versions of our Professional-Cloud-Security-Engineer study questions is the same, their displays are totally different. And you can be surprised to find that our Professional-Cloud-Security-Engineer learning quiz is developed with the latest technologies as well.

## Google Professional-Cloud-Security-Engineer Reliable Braindumps Pdf | Reliable Professional-Cloud-Security-Engineer Real Exam

All our regular candidates have impulse to choose again when they have the similar Professional-Cloud-Security-Engineer exam. So they totally trust us. All exams are not insuperable obstacle anymore with our Professional-Cloud-Security-Engineer training materials. Our credibility is unquestionable. In the course of obtaining success, we need a number of helps, either external or internal, but to the exam, the quality of Professional-Cloud-Security-Engineer practice materials are of great importance. So our Professional-Cloud-Security-Engineer learning dumps are acclaimed as masterpieces.

### Google Cloud Certified - Professional Cloud Security Engineer Exam Sample Questions (Q31-Q36):

#### NEW QUESTION # 31

You want to set up a secure, internal network within Google Cloud for database servers. The servers must not have any direct communication with the public internet. What should you do?

- A. Assign a static public IP address to each database server. Use firewall rules to restrict external access.
- B. Assign a private IP address to each database server. Use a NAT gateway to provide internet connectivity to the database servers.
- C. Create a VPC with a private subnet. Assign a private IP address to each database server.
- D. Assign both a private IP address and a public IP address to each database server.

**Answer: B**

#### NEW QUESTION # 32

Applications often require access to "secrets" - small pieces of sensitive data at build or run time. The administrator managing these secrets on GCP wants to keep a track of "who did what, where, and when?" within their GCP projects.

Which two log streams would provide the information that the administrator is looking for? (Choose two.)

- A. Data Access logs
- B. Agent logs
- C. System Event logs
- D. VPC Flow logs
- E. Admin Activity logs

**Answer: A,E**

Explanation:

<https://cloud.google.com/secret-manager/docs/audit-logging>

#### NEW QUESTION # 33

What are the steps to encrypt data using envelope encryption?

- \* A. Generate a data encryption key (DEK) locally.
- \* Use a key encryption key (KEK) to wrap the DEK.
- \* Encrypt data with the KEK.
- \* Store the encrypted data and the wrapped KEK.
- \* B. Generate a key encryption key (KEK) locally.
- \* Use the KEK to generate a data encryption key (DEK).
- \* Encrypt data with the DEK.
- \* Store the encrypted data and the wrapped DEK.
- \* C. Generate a data encryption key (DEK) locally.
- \* Encrypt data with the DEK.
- \* Use a key encryption key (KEK) to wrap the DEK.
- \* Store the encrypted data and the wrapped DEK.

- \* D. Generate a key encryption key (KEK) locally.
- \* Generate a data encryption key (DEK) locally.
- \* Encrypt data with the KEK

**Answer:**

Explanation:

C

Explanation/Reference: <https://cloud.google.com/kms/docs/envelope-encryption>

#### NEW QUESTION # 34

You want to use the gcloud command-line tool to authenticate using a third-party single sign-on (SSO) SAML identity provider. Which options are necessary to ensure that authentication is supported by the third-party identity provider (IdP)? (Choose two.)

- A. Identity-Aware Proxy
- B. Cloud Identity
- C. SSO SAML as a third-party IdP
- D. Identity Platform
- E. OpenID Connect

**Answer: C,E**

Explanation:

To provide users with SSO-based access to selected cloud apps, Cloud Identity as your IdP supports the OpenID Connect (OIDC) and Security Assertion Markup Language 2.0 (SAML) protocols.

<https://cloud.google.com/identity/solutions/enable-ssso>

#### NEW QUESTION # 35

What is the best course of action regarding data privacy and model tuning when using Vertex AI?

- A. Do nothing. Vertex AI foundation models are frozen by default and do not use your data for model-tuning purposes.
- B. Do not use Vertex AI for sensitive data. Use only public data with minimal privacy requirements.
- C. Contact Google support to opt out of model tuning.
- D. Encrypt your data by using customer-managed encryption keys (CMEK) to have full control over encryption key access.

**Answer: A**

Explanation:

When using Google Cloud's generative AI platforms like Vertex AI for model tuning, the contractual and technical safeguards are designed to protect customer data from being used for public model training.

Google's policy is that the content (data) uploaded for model tuning is used only for that specific, express purpose (tuning your model) and is not used to tune Google's foundational public models or shared with other customers.

Extracts:

"Google only uses content that you import or upload to our model tuning feature for that express purpose." (Source 6.1)

"Tuning content may be retained in connection with your tuned models for purposes of re-tuning when supported models change.

When you delete a tuned model, the related tuning content is also deleted." (Source

6.1)

Therefore, based on the documented commitment for Vertex AI model tuning, no additional action is required (Do nothing) to prevent Google from using the data for general model tuning.

#### NEW QUESTION # 36

.....

Thousands of Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) exam applicants are satisfied with our Professional-Cloud-Security-Engineer practice test material because it is according to the latest Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) exam syllabus and we also offer up to 1 year of free Google Dumps updates. Visitors of ValidBraindumps can check the Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) product by trying a free demo. Buy the

Professional-Cloud-Security-Engineer test preparation material now and start your journey towards success in the Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) examination.
