A growing number of people start to take the HPE7-A11 exam in order to gain more intensifying attention in the different field. It is known to us that the knowledge workers have been playing an increasingly important role all over the world, since we have to admit the fact that the HPE7-A11 certification means a great deal to a lot of the people, especially these who want to change the present situation and get a better opportunity for development. Our HPE7-A11 Exam Questions will help you make it to pass the HPE7-A11 exam and get the certification for sure.

Only if you download our software and practice no more than 30 hours will you attend your test confidently. Because our HPE7-A11 exam torrent can simulate limited-timed examination and online error correcting, it just takes less time and energy for you to prepare the HPE7-A11 exam than other study materials. It is very economical that you just spend 20 or 30 hours then you have the HPE7-A11 certificate in your hand, which is typically beneficial for your career in the future. Therefore, purchasing the HPE7-A11 guide torrent is the best and wisest choice for you to prepare your test.

## Pass Guaranteed Quiz HP - HPE7-A11 - Valid HPE Network Campus Access Professional Architect Exam Vce Files

Having been handling in this line for more than ten years, we can assure you that our HPE7-A11 study questions are of best quality

and reasonable prices for your information. We offer free demos of the latest version covering all details of our HPE7-A11 Exam Braindumps available at present as representatives. So HPE7-A11 practice materials come within the scope of our business activities. Choose our HPE7-A11 learning guide, you won't regret!

## HPE Network Campus Access Professional Architect Exam Sample Questions (Q18-Q23):

### NEW QUESTION # 18

A global cruise line company needs to refresh its current fleet. They will refresh the insides of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests. Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new Internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed. Based on the best practices, what should be recommended as the most cost-effective switch model for the technical rooms?

- A. HPE Aruba Networking 6300M 12p Class8 PoE and 36p Class6 PoE HPE Smart Rate 1G/2.5G/5G and 2p 50G and 2p 10G
- B. HPE Aruba Networking 6200M 24G Class4 PoE 4SFP+
- **C. HPE Aruba Networking 6300M 24p HPE Smart Rate 1 G/2.5G/5G/10G Class6 PoE and 2p 50G and 2p 25G**
- D. HPE Aruba Networking 6200M 36G 12SR5 Class6 PoE 4SFP+

**Answer: C**

Explanation:

For technical rooms requiring redundant power and an upgrade to 10GbE uplinks to handle increased network traffic, the most cost-effective switch model is the HPE Aruba Networking 6300M 24p HPE Smart Rate 1G/2.5G/5G/10G Class6 PoE and 2p 50G and 2p 25G. This model offers the necessary port density and speed flexibility, with support for high-power PoE devices and uplink capabilities that meet the future-proofing needs for technical rooms on the cruise ships. The switch's redundant power capabilities ensure high availability and resilience for critical technical room infrastructure, aligning with the customer's requirements for sustainability, cost-effectiveness, and preparedness for future hardware refreshes without extensive unused port capacities.

### NEW QUESTION # 19

A global cruise line company needs to refresh its current fleet. They will refresh the insides of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests. Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930

ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running instantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed. Based on the best practices, what should you recommend as the most cost-effective switch model for the cabins?

- A. HPE Aruba Networking 6100 12G Class4 PoE 26/2SFP+
- B. HPE Aruba Networking 6100 24G Class4 PoE 45FP+
- C. HPE Aruba Networking 6000 12G Class4 PoE 2G/2SFP
- D. HPE Aruba Networking 6200F 12G Class4 PoE 2G/2SFP+

**Answer: A**

#### **NEW QUESTION # 20**

Which licenses are needed in order to use the UXI Client on Zebra Devices? (Choose two.)

- A. Wireless Insights
- B. UXI Agent Subscription
- C. UXI Cloud Subscription
- D. UXI LTE Subscription

**Answer: B,C**

Explanation:

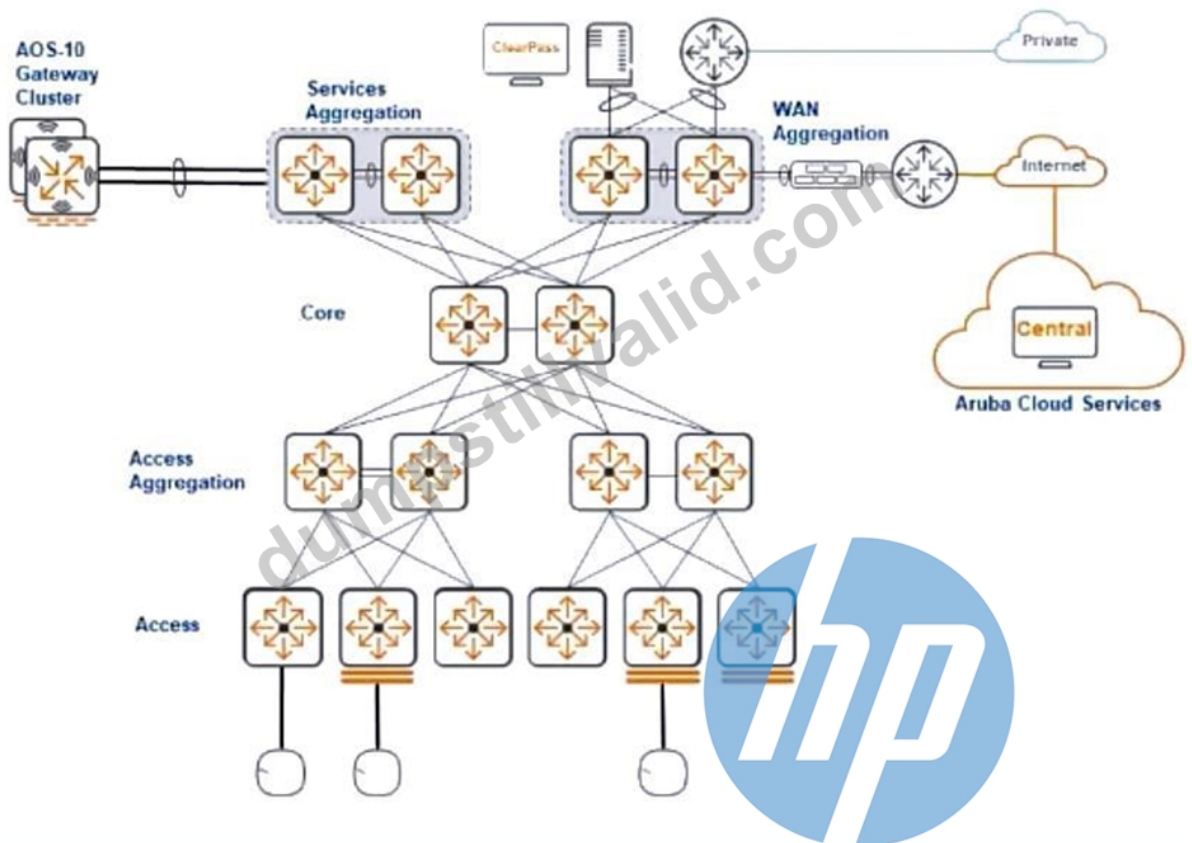

To utilize the UXI Client on Zebra Devices, the necessary licenses include the UXI Cloud Subscription (Option A) and the UXI Agent Subscription (Option B). The UXI Cloud Subscription provides access to the UXI platform's cloud-based analytics and insights, facilitating the monitoring and management of network performance and user experience. The UXI Agent Subscription is required for each Zebra device, enabling it to run the UXI Client software that collects and sends network performance data to the UXI cloud platform. Together, these licenses empower organizations to enhance network visibility and improve the user experience on Zebra devices within their networks.

#### **NEW QUESTION # 21**

Hotspot Question

Based on this campus design, click on the layer that is the most appropriate to be designed as a Stub Persona, considering an EVPN VXLAN Fabric?

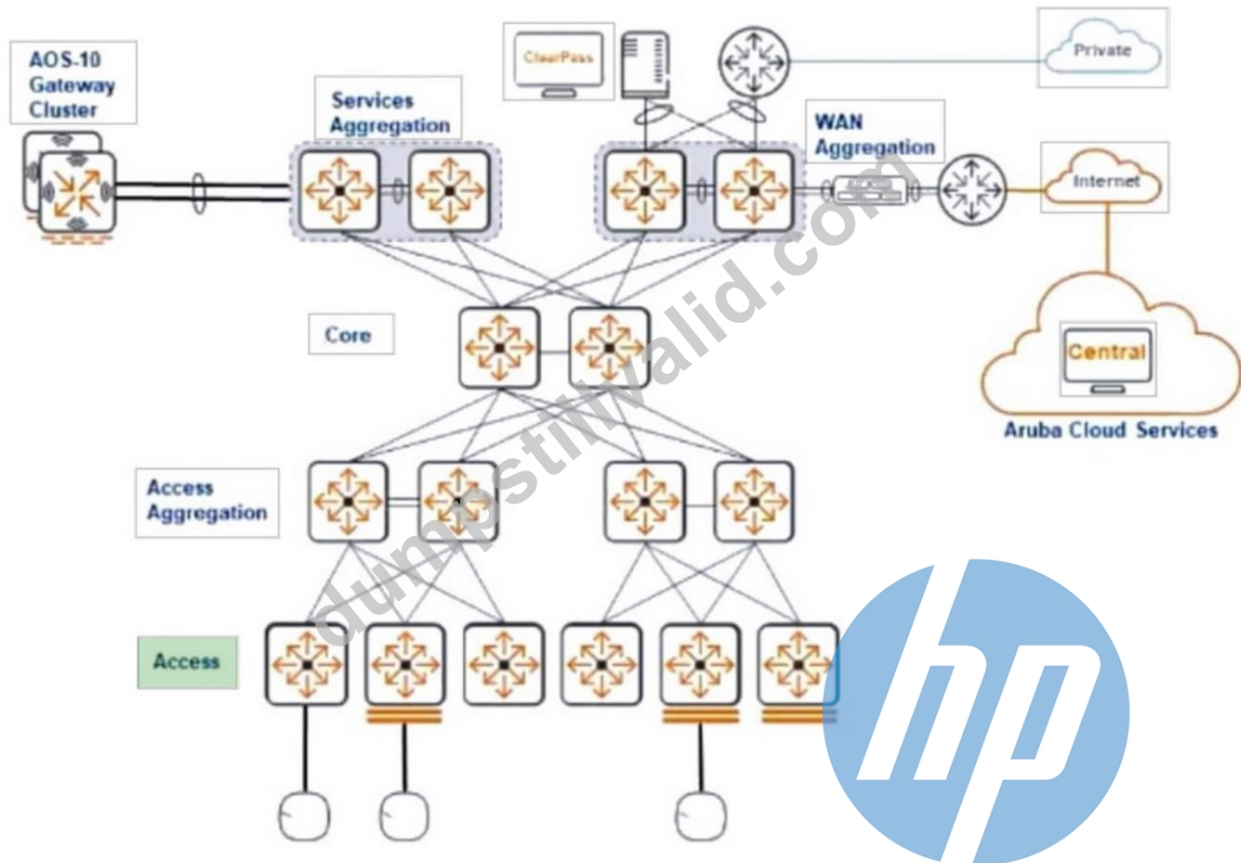

**Answer Area**

**Answer:**

Explanation:

## Answer Area

### NEW QUESTION # 22

What is one use case for designing a 2-tier campus LAM instead of using a 3-tier?

- A. Cross-campus traffic has grown beyond We capacity of a single collapsed core
- B. The network has grown beyond a few building aggregation points
- C. The campus has small buildings with only a few wiring closets.
- D. Access aggregation points are not scaling to meet traffic demands.

**Answer: C**

Explanation:

A 2-tier campus LAN architecture, consisting of the core and access layers, is typically suitable for smaller campuses or networks with limited numbers of wiring closets. This simplified architecture eliminates the need for a dedicated aggregation layer, which is more common in larger, more complex network environments (the 3-tier architecture). In a small campus setting with only a few wiring closets, a 2-tier design can provide sufficient performance and scalability, reducing complexity and potentially lowering costs. This architecture allows for direct connectivity between the access layer, where end devices connect to the network, and the core layer, which routes traffic to and from the campus network. The use of a 2-tier architecture in such scenarios is driven by the network's size and the simplicity of its requirements, making it an efficient and effective choice.

### NEW QUESTION # 23

.....

If you want to check the quality and validity of our HPE7-A11 exam questions, then you can click on the free demos on the website. The free demo has three versions. We only send you the PDF version of the HPE7-A11 study questions. We have shown the rest two versions on our website. All in all, you will have a comprehensive understanding of various HPE7-A11 practice materials. Then after deliberate considerations, you can directly purchase the most suitable one for yourself.

**HPE7-A11 Study Test:** <https://www.dumpstillsvalid.com/HPE7-A11-prep4sure-review.html>

You can totally rely on our HPE7-A11 study materials, DumpStillValid announces another remarkable feature to its users by giving them the HPE Network Campus Access Professional Architect Exam (HPE7-A11) dumps updates until 1 year after purchasing the HPE Network Campus Access Professional Architect Exam (HPE7-A11) certification exam pdf questions, Combined with the extensive industry experience and deep alliances, HPE7-A11 has a powerful team and can help you realize your goals, maximize opportunities, minimize the risk for HPE7-A11 exam test and ensure a high passing rate, Free demo is available for HPE7-A11 training materials, so that you can have a deeper understanding of what you are going to buy.

Inspecting Real-World Signals on a Spectrum Analyzer, Formatting and Designing Text, You can totally rely on our HPE7-A11 Study Materials, DumpStillValid announces another remarkable feature to its users by giving them the HPE Network Campus Access Professional Architect Exam (HPE7-A11) dumps updates until 1 year after purchasing the HPE Network Campus Access Professional Architect Exam (HPE7-A11) certification exam pdf questions.

## Newest HP HPE7-A11 Practice Questions in PDF Format for Quick Preparation

Combined with the extensive industry experience and deep alliances, HPE7-A11 has a powerful team and can help you realize your goals, maximize opportunities, minimize the risk for HPE7-A11 exam test and ensure a high passing rate.

Free demo is available for HPE7-A11 training materials, so that you can have a deeper understanding of what you are going to buy, You can find different kind of HPE7-A11 exam dumps and HPE7-A11 real dumps in DumpStillValid.
