NOTE: Each correct selection is worth one point.

Required secrets:

Certificate
Personal access token
Shared Access Authorization token
Username and password

Storage location:

Azure Data Lake
Azure Key Vault
Azure Storage with HTTP access
Azure Storage with HTTPS access

Answer:

Required secrets:

Certificate
Personal access token
Shared Access Authorization token
Username and password

Storage location:

Azure Data Lake
Azure Key Vault
Azure Storage with HTTP access
Azure Storage with HTTPS access

Explanation:

Every request made against a storage service must be authorized, unless the request is for a blob or container resource that has been made available for public or signed access. One option for authorizing a request is by using Shared Key.

Scenario: The mobile applications must be able to call the share pricing service of the existing retirement fund management system. Until the system is upgraded, the service will only support basic authentication over HTTPS.

The investment planning applications suite will include one multi-tier web application and two iOS mobile application. One mobile application will be used by employees; the other will be used by customers.

The C_BW4H_2505 learning materials are of high quality, mainly reflected in the adoption rate. As for our C_BW4H_2505 exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our C_BW4H_2505 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our C_BW4H_2505 Quiz guide has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our C_BW4H_2505 exam question is 99%. So our product is a good choice for you. Choose our C_BW4H_2505 learning materials, you will gain a lot and lay a solid foundation for success.

The objective of SAP C_BW4H_2505 is to assist candidates in preparing for the SAP C_BW4H_2505 certification test by equipping them with the actual C_BW4H_2505 questions PDF and C_BW4H_2505 practice exams to attempt the C_BW4H_2505 Exam successfully. The SAP C_BW4H_2505 practice material comes in three formats, desktop C_BW4H_2505 practice test software, web-based C_BW4H_2505 practice exam, and C_BW4H_2505 Dumps PDF that cover all exam topics.

C_BW4H_2505 Exam Preview - C_BW4H_2505 Technical Training

Will you feel nervous while facing a real exam environment? If you do choose us, we will provide you the most real environment through the C_BW4H_2505 exam dumps. Our soft online test version will stimulate the real environment, through this, you will know the process of the real exam. C_BW4H_2505 Exam Dumps will build up your confidence as well as reduce the mistakes. If

you need the practice just like this, just contact us.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which development object needs to be built to generate an HDI Container?

- A. SQL script procedure
- B. Space
- C. HDB module
- D. Package

Answer: C

NEW QUESTION # 47

Where is the button that automatically generates a process chain?

- A. In the SAP GUI transaction for Process Chain Maintenance
- B. In the editor of a data transfer process
- C. In the app called Process Chain Editor
- D. In the editor of a data flow object

Answer: D

NEW QUESTION # 48

What does a CompositeProvider allow you to do in SAP BW/4HANA? Note: There are 3 correct answers to this question.

- A. Create new calculated fields
- B. Integrate SAP HANA calculation views
- C. Join two ABAP CDS views
- D. Combine InfoProviders using Joins and Unions
- E. Define new restricted key figures

Answer: A,D,E

NEW QUESTION # 49

What are some of the prerequisites for using SAP S/4HANA ABAP CDS views for extraction into SAP BW/4HANA in an ODP context? Note: There are 2 correct answers to this question.

- A. The ABAP CDS views must be defined with the appropriate data extraction annotations.
- B. The ABAP CDS views must be released through the program RODPS_OS_EXPOSE for BW extraction.
- C. The Operational Data Provisioning Framework must be configured in SAP BW/4HANA.
- D. An ODP source system with context ODP_CDS must be created in SAP BW/4HANA.

Answer: B,D

Explanation:

Extracting data from SAP S/4HANA ABAP CDS (Core Data Services) views into SAP BW/4HANA using the Operational Data Provisioning (ODP) framework requires specific prerequisites. These ensure that the CDS views are properly exposed and accessible for extraction. Below is a detailed explanation of why the verified answers are correct.

* ABAP CDS Views: ABAP CDS views are reusable data models defined in SAP S/4HANA. They provide a semantic layer for querying data and can be used for reporting and analytics.

* Operational Data Provisioning (ODP): ODP is a framework in SAP BW/4HANA that enables real-time or near-real-time data extraction from various source systems, including SAP S/4HANA.

* ODP Contexts: ODP contexts define the type of source system and data extraction method. For CDS views, the context ODP_CDS is used.

* Data Extraction Annotations: Annotations in CDS views specify metadata for extraction purposes, such as field properties and extraction behavior.

Key Concepts:

* Option A: The ABAP CDS views must be released through the program RODPS_OS_EXPOSE for BW extraction.

* Why Correct? To make an ABAP CDS view available for extraction via ODP, it must be explicitly released using the program RODPS_OS_EXPOSE. This step registers the view in the ODP framework and makes it accessible to SAP BW/4HANA.

* Option B: The Operational Data Provisioning Framework must be configured in SAP BW/4HANA.

* Why Incorrect? While configuring the ODP framework is a general prerequisite for any ODP-based extraction, it is not specific to extracting ABAP CDS views. This option is too broad to be considered a direct prerequisite.

* Option C: An ODP source system with context ODP_CDS must be created in SAP BW/4HANA.

* Why Correct? To extract data from ABAP CDS views, you must create an ODP source system in SAP BW/4HANA with the context ODP_CDS. This context specifies that the source system provides data from CDS views.

* Option D: The ABAP CDS views must be defined with the appropriate data extraction annotations.

* Why Incorrect? While annotations are important for defining metadata in CDS views, they are not mandatory for ODP-based extraction. The primary requirement is releasing the view using RODPS_OS_EXPOSE.

Verified Answer Explanation:

* SAP BW/4HANA Extraction Guide: The guide outlines the steps for extracting data from ABAP CDS views using the ODP framework, including the use of RODPS_OS_EXPOSE and the creation of an ODP source system.

* SAP Note 2700850: This note provides detailed instructions on releasing CDS views for BW extraction and configuring the ODP framework.

* SAP Best Practices for ODP Extraction: SAP recommends using the ODP_CDS context for extracting data from ABAP CDS views and emphasizes the importance of releasing views using RODPS_OS_EXPOSE.

NEW QUESTION # 50

Which of the following are possible delta-specific fields for a generic DataSource in SAP S/4HANA? Note:

There are 3 correct answers to this question.

- A. Numeric pointer
- B. Request ID
- C. Record mode
- D. Calendar day
- E. Time stamp

Answer: C,D,E

Explanation:

In SAP S/4HANA, delta-specific fields are used to identify and extract only the changes (deltas) in data since the last extraction. These fields are critical for ensuring efficient data replication and minimizing the volume of data transferred between systems. For a generic DataSource, the following delta-specific fields are commonly used:

* Calendar Day (A): The calendar day field is often used as a delta-specific field to track changes based on the date when the data was modified. This is particularly useful for scenarios where data changes are logged daily, such as transactional or master data updates. By filtering records based on the calendar day, you can extract only the relevant changes.

* Record Mode (D): The record mode field indicates the type of change that occurred for a specific record (e.g., insert, update, or delete). This field is essential for delta management because it allows the system to distinguish between new records, updated records, and deleted records. For example:

* "N" (New) for inserts.

* "U" (Update) for updates.

* "D" (Delete) for deletions.

* Time Stamp (E): The time stamp field captures the exact date and time when a record was created or modified. This is one of the most common delta-specific fields because it provides precise information about when changes occurred. By comparing the time stamp of the last extraction with the current data, you can extract only the changes made after the last run.

* Request ID (B): The request ID is not typically used as a delta-specific field. It identifies the extraction request but does not provide information about the changes in the data itself. Instead, it is used internally by the system to track extraction processes.

* Numeric Pointer (C): A numeric pointer is another internal mechanism used by SAP to manage delta queues. However, it is not a delta-specific field that can be directly used in generic DataSources.

Numeric pointers are managed automatically by the system and are not exposed for custom delta logic.

Incorrect Options:

SAP Data Engineer - Data Fabric Context: In the context of SAP Data Engineer - Data Fabric, understanding delta-specific fields is crucial for designing efficient data integration pipelines. Generic DataSources are often used to extract data from SAP S/4HANA

systems into downstream systems like SAP BW/4HANA or other analytics platforms. Proper use of delta-specific fields ensures that only the necessary data is extracted, reducing latency and improving performance.

For further details, refer to:

* SAP S/4HANA Embedded Analytics Documentation: Explains delta mechanisms and delta-specific fields for generic DataSources.

* SAP BW/4HANA Extraction Guides: Provides best practices for configuring delta extraction in SAP BW/4HANA.

By selecting A (Calendar day), D (Record mode), and E (Time stamp), you ensure that the correct delta-specific fields are identified for efficient data extraction.

NEW QUESTION # 51

.....

Choosing our C_BW4H_2505 exam quiz will be a wise decision that you make, because this decision may have a great impact in your future development. Having the C_BW4H_2505 certificate may be something you have always dreamed of, because it can prove that you have certain strength. Our C_BW4H_2505 Exam Questions can provide you with services with pretty quality and help you obtain a certificate. The quality of our C_BW4H_2505 learning materials can withstand the test of practice.
