All Analytics-DA-201 practice materials fall within the scope of this exam for your information. The content is written promptly and helpfully because we hired the most professional experts in this area to compile the Salesforce Certified Tableau Data Analyst practice materials.

### **Salesforce Certified Tableau Data Analyst Sample Questions (Q169-Q174):**

#### **NEW QUESTION # 169**

Open the link to Book1 found on the desktop. Use the Superstore data source. Split the Customer Name field into two fields named First Name and Last Name.

#### **Answer:**

Explanation:

check the steps below in explanation.

Explanation:

To split the Customer Name field into two fields named First Name and Last Name, you need to do the following steps:

- \* Open the link to Book1 found on the desktop. This will open the Tableau workbook that uses the Superstore data source.
- \* Go to the Data Source tab at the bottom of the workbook to see the data source page. You will see a table that shows the fields and values from the Superstore data source.
- \* Right-click on Customer Name in the table and select Split from the menu. This will split the field into two fields based on a separator, which is a space by default. You will see two new fields named Customer Name - Split 1 and Customer Name - Split 2 in the table.
- \* Right-click on Customer Name - Split 1 and select Rename from the menu. Type First Name as the new name and press Enter. This will rename the field as First Name.
- \* Right-click on Customer Name - Split 2 and select Rename from the menu. Type Last Name as the new name and press Enter. This will rename the field as Last Name.

#### **NEW QUESTION # 170**

A Data Analyst needs to update an existing dashboard. The current dashboard shows financial results data, and users have asked for a comparison of budgets to be added to the dashboard. A new data source has been created that includes both the actual costs and budgets and was published to the corporate Tableau site.

How should the analyst update the existing dashboard?

- A. Create a new workbook in Tableau Desktop and connect to the new data source. Copy and paste all the tabs from the old workbook into the new one.
- **B. Edit the existing workbook on the Tableau site and connect to the new data source. From the Data menu, choose Replace Data Source.**
- C. Edit the existing workbook on the Tableau site and connect to the new data source. Blend the new data source with the existing data source.
- D. Create a copy of the existing workbook, open it in Tableau Desktop, and connect to the new data source. Update each

sheet, using fields from the new data source.

**Answer: B**

### NEW QUESTION # 171

Open the link to Book1 found on the desktop. Open the CategoryPercentage worksheet.

Modify the bar chart show the percentage of sales for each Subcategory within every Category. The total percentage for every Category must be 100%.

**Answer:**

Explanation:

check the steps below in explanation.

Explanation:

To modify the bar chart to show the percentage of sales for each Subcategory within every Category, you need to do the following steps:

- \* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the CategoryPercentage worksheet.
- \* Click on the CategoryPercentage tab at the bottom of the workbook to open the worksheet. You will see a bar chart that shows the total sales for each Subcategory across all Categories.
- \* Right-click on Sales on the Columns shelf and select Add Table Calculation from the menu. This will open a dialog box that allows you to apply a calculation to your measure.
- \* Select Percent of Total from the Calculation Type drop-down list. This will calculate the percentage of sales for each Subcategory out of the total sales for all Subcategories.
- \* Select Category from the Compute Using drop-down list. This will calculate the percentage of sales for each Subcategory within every Category, instead of across all Categories. The total percentage for every Category will be 100%.
- \* Click OK to apply the table calculation. You will see that the bar chart now shows the percentage of sales for each Subcategory within every Category.
