## Pass4sure VMware Cloud Operations 8.x Professional V2 certification - VMware 2V0-32.24 sure exam practice

These VMware 2V0-32.24 questions will give you an accurate foresight of the VMware 2V0-32.24 examination format. This VMware 2V0-32.24 is easily downloadable and even printable, this way you can also pursue paper study if that is your preferred method. The portability of this material makes it handier since you can access it on any smart device such as smart phones, laptops, tablets, etc. These VMware 2V0-32.24 features make this prep method the most comfortable one.

## VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Administrative and Operational Tasks: This section of the exam measures skills of Cloud Administrators and covers daily operational tasks such as content and environment management in vRealize Suite Lifecycle Manager. It also includes managing licensing, alert systems, dashboards, metrics, cost assessments, capacity optimization, workload planning, and system monitoring. Additionally, it explores access control, patching, and retention settings in vRealize Log Insight, ensuring ongoing operational excellence across VMware tools.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Installing, Configuring, and Setting Up: This section of the exam measures skills of Implementation Specialists and covers the end-to-end setup process for vRealize Suite Lifecycle Manager, vRealize Operations, and Log Insight. It includes prerequisites, installation steps (manual and automated), identity and access configuration, environment settings, data sources, content packs, and system integrations to enable a functional cloud management platform.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Planning and Designing: This section of the exam measures the skills of Cloud Architects and covers the architectural models and sizing requirements for vRealize Operations and vRealize Log Insight. It evaluates the ability to choose between standalone, clustered, and high-availability setups, and to plan appropriately based on scenario-based requirements for capacity and deployment type, ensuring well-designed cloud solutions.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Architecture and Technologies: This section of the exam measures the skills of Cloud Architects and covers the core differences between VMware Cloud Management offerings, focusing on SaaS versus on-premises deployments. It introduces the capabilities of vRealize Suite Lifecycle Manager, vRealize Operations, and vRealize Log Insight, helping professionals understand the foundational technologies that support VMware's cloud ecosystem.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Performance-tuning, Optimization, and Upgrades: This section has no testable objectives and therefore is not directly assessed in the exam.</li> </ul>

## VMware Cloud Operations 8.x Professional V2 Sample Questions (Q50-Q55):

### NEW QUESTION # 50

An administrator needs to change the password for the admin user account on vRealize Operations.

Which two methods can the administrator use to complete this task? (Choose two.)

- A. Log in to vRealize Suite Lifecycle Manager and use the rotate password functionality
- B. Log in to the Primary node via SSH and use the appropriate command to reset the admin user account password**
- C. Log in to the vRealize Operations admin UI as the admin user and use the change password functionality
- D. Log in to the vRealize Operations admin UI as the admin user, take the cluster offline and use the change password functionality
- E. Log in to each node via SSH and use the appropriate script to reset the admin user account password**

**Answer: B,E**

**Explanation:**

To change the password for the admin user account in vRealize Operations, these methods can be used:

Log in to the Primary node via SSH and use the appropriate command to reset the admin user account password: This method allows the administrator to directly reset the admin password on the primary node via SSH using command-line utilities specific to vRealize Operations.

Log in to each node via SSH and use the appropriate script to reset the admin user account password. In a multi-node environment, the password reset might need to be performed on each node using a script to ensure that the new password is applied across all nodes in the cluster.

#### NEW QUESTION # 51

An administrator has been tasked with deploying vRealize Operations using a new vRealize Suite Lifecycle Manager (vRSLCM) instance that has already been configured with VMware Identity Manager.

Which item must be configured in vRSLCM before the administrator can complete the deployment?

- A. A valid license for vRealize Suite Lifecycle Manager
- **B. A registered authentication provider**
- C. A valid license for vRealize Suite
- D. Outbound notifications settings

**Answer: B**

Explanation:

Before completing the deployment of vRealize Operations through vRSLCM, an authentication provider must be registered. This step ensures that users can authenticate using appropriate credentials, which is especially important when VMware Identity Manager is already configured. Without a registered authentication provider, users would not be able to access the environment or perform necessary tasks.

#### NEW QUESTION # 52

An administrator is updating a Content Pack within vRealize Log Insight which has user modifications.

What step should the administrator take to ensure the user modifications persist after the update?

- A. Export the modifications as a Content Pack and import the changes to the system profile after the update is completed.
- B. Update the content pack as per the standard procedure.
- C. Export the modifications as a Content Pack and import the changes to the user profile after the update is completed.
- D. Persist user modifications is not available when updating the Content Pack.

**Answer: A**

Explanation:

When updating a Content Pack in vRealize Log Insight that has user modifications, it is essential to export the custom changes (such as modified queries, dashboards, etc.) as a separate Content Pack. After the update is completed, the exported Content Pack containing the user modifications can be imported back into the system profile to ensure that the customizations persist and are not lost during the update process.

**NEW QUESTION # 53**

In vRealize Operations, which of these statements is correct?

- A. A symptom can include a combination of alerts
- B. An alert can include a combination of notifications
- C. An alert can include a combination of symptoms
- D. A notification can include a combination of symptoms

**Answer: C**

Explanation:

In vRealize Operations, an alert is triggered based on symptoms. A symptom represents a specific condition or threshold violation (such as high CPU usage, memory pressure, etc.), and an alert can be the result of one or more symptoms. Therefore, it is correct that an alert can include a combination of symptoms, as it represents the aggregation of various conditions that indicate an issue.

**NEW QUESTION # 54**

An administrator has been tasked to configure vRealize Operations to securely forward vRealize Operations logs to a centralized syslog server. The logs should be forwarded in their original format.

What would be the resulting Protocol and Port configuration?

- A. Port: 9543 - Protocol: cfapi
- B. Port: 6514 - Protocol: syslog
- C. Port: 514 - Protocol: syslog
- D. Port: 9000 - Protocol: cfapi

**Answer: B**

Explanation:

To securely forward vRealize Operations logs to a centralized syslog server, the syslog protocol over port 6514 is used. Port 6514 is the default port for secure syslog (Syslog over TLS), ensuring that logs are transmitted in their original format while being encrypted for security.

**NEW QUESTION # 55**

.....

Our 2V0-32.24 test braindumps are carefully developed by experts in various fields, and the quality is trustworthy. What's more, after you purchase our products, we will update our 2V0-32.24 exam questions according to the new changes and then send them to you in time to ensure the comprehensiveness of learning materials. We also have data to prove that 99% of those who use our 2V0-32.24 Latest Exam torrent to prepare for the exam can successfully pass the exam and get VMware certification. So if you are preparing to take the test, you can rely on our learning materials. You will also be the next beneficiary. After you get VMware certification, you can get boosted and high salary to enjoy a good life.
