SAP C_SIGDA_2403 Reliable Exam Bootcamp & C_SIGDA_2403 Latest Dumps Sheet

Our C_SIGDA_2403 exam materials are flexible and changeable, and the servide provide by our company is quite specific. Our C_SIGDA_2403 test questions have been following the pace of digitalization, constantly refurbishing, and adding new things. I hope you can feel the C_SIGDA_2403 exam prep sincerely serve customers. We also attach great importance to the opinions of our customers. As long as you make reasonable recommendations for our C_SIGDA_2403 test material, we will give you free updates to the system's benefits. We have always advocated customer first. If you use our learning materials to achieve your goals, we will be honored. C_SIGDA_2403 exam prep look forward to meeting you.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q39-Q44):

NEW QUESTION # 39
Which of the following is essential information that an Eventlog must contain?Note: There are 3correct answers to this question.

- A. Unique Case ID
- B. Timestamp
- C. Variant ID
- D. Attributes
- E. Activity name

Answer: A,B,E

Explanation:
For Process Mining and analysis purposes, an Eventlog must contain the following essential information:
* Option A (Unique Case ID):This identifies each instance of the process, allowing for the tracking of individual cases through the process flow.
* Option C (Activity name):This specifies what action or step is being taken at each point in the process, providing the basis for mapping the process flow.
* Option E (Timestamp):Timestamps indicate when each activity occurred. This is critical for understanding the sequence and duration of process steps, as well as for identifying bottlenecks and opportunities for optimization.
These elements are foundational for reconstructing and analyzing the actual execution of business processes based on log data.

NEW QUESTION # 40
How do you filter all published processes in the workspace?

- A. Switch to Advanced Search, and select the field "Publishing date".
- B. Type the word "Publishing state" in the search field and press Enter.
- C. Switch to Advanced Search, and select the field "Publishing state".
- D. Type the word "Publish" in the Search field and press Enter.

Answer: B

NEW QUESTION # 41
What is the benefit of the Over Time Widget?

- A. It visualizes the process flow in a certain timeframe.
- B. It visualizes selected case attributes for a given period.
- C. It visualizes the variants of a period.
- D. It visualizes how KPI's are calculated in a certain timeframe.

Answer: A

NEW QUESTION # 42
What can be defined within an 'Integration' in ETL Data Pipeline configuration?Note: There are 3 correct answ-ers to this que-stion.

- A. Data to be pseudonymized
- B. Columns to be extracted
- C. Tables to be extracted
- D. Other source systems to connect to
- E. Data Objects to collect information from

Answer: A,B,C

NEW QUESTION # 43
What features does the SQL Query Editor offer? Note: There are 2 correct answers to this question.

- A. Creates inner joins
- B. Provides custom functions
- C. Avoids manipulation of process data
- D. Queries data from multiple tables

Answer: B,C

Explanation:
The SQL Query Editor in SAP Signavio Process Intelligence allows users to write custom queries to analyze process data. The documentation details its capabilities:
* Exact Extract:"The SQL Query Editor in SAP Signavio Process Intelligence provides:
* Protection against data manipulation by restricting queries to read-only operations.
* Support for custom functions to perform advanced calculations or data transformations within queries." (SAP Signavio Process Intelligence User Guide, section on "SQL Query Editor Features").
* Explanation:
* Option B (Avoids manipulation of process data):The SQL Query Editor is designed to ensure data integrity by allowing only read-only queries, preventing accidental or unauthorized changes to the underlying process data.
* Option D (Provides custom functions):Users can define custom functions within the SQL Query Editor to perform specific calculations or transformations, such as aggregating data in unique ways or applying complex logic.
* Option A (Queries data from multiple tables)is incorrect because, while the editor can query data, it typically operates on a single event log or case attributes table within an investigation, not multiple unrelated tables.
* Option C (Creates inner joins)is incorrect as inner joins are not a primary feature of the SQL Query Editor in Process Intelligence, which focuses on querying pre-structured process data.
