# SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q34-Q39):

## NEW QUESTION # 34
What is the purpose of using the small ghost icon in the WalkMe Editor when customizing an invisible Launcher?

- A. To change the Launcher's shape.
- B. To adjust the size of the Launcher.
- C. To add animations to the Launcher.
- D. To automatically make all colors of the Launcher transparent.

**Answer: D**

Explanation:
In the WalkMe Editor, the small ghost icon is a tool used when customizing Launchers to make them invisible by setting their colors to fully transparent. This feature is particularly useful for creating invisible Launchers that overlay and block interaction with specific UI elements without being visible to users. By clicking the ghost icon, the Launcher's colors (background, border, etc.) are automatically set to transparent, ensuring it blends seamlessly into the webpage while still functioning as an interactive element.
The other options are incorrect:
* Adding animations(A) is handled through other customization settings, not the ghost icon.
* Adjusting the size(B) is done via resizing controls, not the ghost icon.
* Changing the shape(C) is managed through shape settings, not transparency.
Extract from Official WalkMe Documentation:
According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.3: Launchers):
"The ghost icon in the WalkMe Editor's Launcher customization panel sets all colors of the Launcher to fully transparent, creating an invisible Launcher. This is ideal for scenarios where the Launcher needs to block interaction with an underlying element without being visible." The courseAdvancing Your Skills in Building WalkMe Solutionsnotes:
"To create an invisible Launcher, use the ghost icon to automatically apply transparency to all color settings, ensuring the Launcher is undetectable to users while maintaining its functionality." Option D correctly describes the purpose of the ghost icon.

- B. By monitoring employees through real-time video feeds
- C. By automatically restricting employees from using external software
- D. By displaying pop-ups for policy acknowledgment and using invisible Launchers to block sensitive fields

**Answer: D**

Explanation:
WalkMe supports organizations in enforcing policy and compliance requirements by providing tools to guide users and prevent non-compliant actions. Specifically, it usespop-ups for policy acknowledgment(e.g., via ShoutOuts or Smart Walk-Thrus) to ensure users confirm understanding of policies, andinvisible Launchers to block sensitive fields, preventing unauthorized interactions without altering the underlying application.
This approach ensures compliance while maintaining a seamless user experience.
The other options are incorrect:
* Restricting external software(A) is not a WalkMe capability; it focuses on in-app guidance.
* Monitoring via video feeds(B) is unrelated to WalkMe's functionality.
* Disabling access to non-compliant employees(C) is too extreme and not a WalkMe feature.
Extract from Official WalkMe Documentation:
