AP-209-2 (Rev. 3/05/18)

TEXAS APPLICATION FOR TAX EXEMPTION FOR RELIGIOUS AND RELIGION-BASED ORGANIZATIONS

- TYPE OR PRINT
- Do NOT write in shaded areas.

Page 1

SECTION A

1. ORGANIZATION NAME
Legal name as provided in Articles of Incorporation, or, if unincorporated, the governing document. For out-of-state corporations, name must match the official corporate name as filed in the home state of charter.

2. ORGANIZATION MAILING ADDRESS
Street number, P.O. Box, or rural route and box number.

City _____ State/Province _____ ZIP code _____ County (or county, if outside the U.S.) _____

3. Texas Taxpayer number (if applicable) _____

4. For TEXAS corporations ONLY, filing information issued by the Secretary of State:
File Number _____ File Date _____ Month _____ Day _____ Year _____

5. For NON-TEXAS corporations ONLY, filing information issued by the Texas Secretary of State:
Certificate of Authority File Number _____ File Date _____ Month _____ Day _____ Year _____
Home State of Incorporation _____ Date of Incorporation _____ Month _____ Day _____ Year _____ Home State Filing or Registration Number _____

6. Federal Employer's Identification Number (EIN) (Required if applying for exemption on the basis of a federal exemption) _____

7. Average attendance at worship service _____ If average attendance is less than 50, indicate the number of families represented in the average attendance: _____

8. Date of first worship service _____ Time _____ Frequency _____

9. Time and frequency of worship services _____

10. Name, address and daytime phone number of the person submitting this application.
Name _____ Title _____
Organization Name _____ Daytime Phone (Area code and number) _____ Extension _____
Address _____ City _____ State _____ Zip _____

If address provided is not the same as the organization's mailing address, indicate to which address our response should be mailed:
☐ To organization mailing address ☐ To mailing address of submitter

SECTION B

Provide the following additional information as it applies to the appropriate option below:

☐ **Option A** (Member of a common denomination or convention of churches):
• If your organization is a church that is a member of a common denomination or convention of churches, and the parent organization either has a 501(c)(3) federal group exemption, or has previously obtained a religious exemption in Texas for the churches under its jurisdiction, your church can obtain exemption based on its affiliation with the parent organization. Attach a letter from the parent organization stating that your church is a recognized subordinate, or provide the web address of the parent organization where your church's affiliation can be verified.

☐ **Option B** (Independent church or nondenominational church that does not meet the requirements under Option A):
• A copy of your organization's governing document (file-stamped Articles of Incorporation, or Bylaws or Constitution or Articles of Association if not incorporated)
• A copy of your group's statement of faith
• Documentation such as a bulletin, brochure, Web address (URL) or written statement that indicates the regular order of what takes place during the worship services.
• A statement containing the physical address (no P.O. Box) and a description of the facility where worship services are regularly conducted, if available, include pictures of the interior and exterior of the facility. If renting or leasing, include a copy of the rental/lease agreement.
• A statement confirming the services are open to the public. The statement must indicate how the services are advertised to the public.

If your church has its own 501(c)(3) federal exemption, provide a copy of the IRS determination letter along with the information in option A or B so that we may update our records.

APPLICATIONS RECEIVED WITHOUT SUPPORTING DOCUMENTATION REQUIRED UNDER OPTION A OR OPTION B WILL BE RETURNED.

2026 Latest PrepAwayPDF AP-209 PDF Dumps and AP-209 Exam Engine Free Share: https://drive.google.com/open?id=1Br0doi9j1euh2tAV-vwi_wytu-stx0kx

Passing the Advanced Field Service Accredited Professional certification test is an important step in professional development, and preparing with actual Advanced Field Service Accredited Professional exam questions can help applicants achieve this certification. The AP-209 Study Material promotes an organized approach to studying, aid applicants in identifying areas for development, build confidence and reduces exam anxiety. PrepAwayPDF has created three formats for applicants to pass the Advanced Field Service Accredited Professional test on the first try.

Salesforce AP-209 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Mobile: This domain covers offline functionality in the Field Service Mobile app, mobile customization and extension options, technician management capabilities, and communication features between dispatchers, technicians, and customers.
Topic 2	<ul style="list-style-type: none">• Implementation Strategies and Design: This domain covers the full consulting project lifecycle from planning and requirements gathering through deployment, and determining appropriate deployment strategies and licensing needs for Field Service implementations.

Topic 3	<ul style="list-style-type: none"> • Foundation: This domain addresses modeling complex work structures like work orders, constructing maintenance plans for recurring service, and customizing the dispatcher console to improve operational efficiency.
Topic 4	<ul style="list-style-type: none"> • Optimization: This domain covers using service objectives for automated scheduling, global optimization engine capabilities, troubleshooting optimization issues, and strategies to improve scheduling quality and efficiency.

Instant and Proven Way to Crack Salesforce AP-209 Exam

The Advanced Field Service Accredited Professional (AP-209) PDF format, desktop practice test software, and web-based practice test software, all three formats of actual exam questions are ready for quick download. You just need to pay the affordable Salesforce AP-209 Exam Questions charges and click on the download button. Get them now and start Advanced Field Service Accredited Professional (AP-209) exam preparation today.

Salesforce Advanced Field Service Accredited Professional Sample Questions (Q26-Q31):

NEW QUESTION # 26

A dispatcher notices that the Service Territory schedule for the next week is full with routine maintenance appointments, while there are several urgent repair jobs still waiting to be scheduled in the appointment list. Which three actions should the dispatcher take to schedule the urgent repair jobs?

- A. Check the 'Scheduling Priority' of the repair and maintenance Service Appointments
- B. Use 'Global Optimization' to optimize the territory schedule for the next week
- C. Invoke 'Resource Schedule Optimization' for each Service Resource in the Service Territory
- D. Ensure that the maintenance Service Appointments are not 'Pinned' and can be rescheduled
- E. Manually update the 'Assigned Resource' on each of the urgent repairs

Answer: A,B,D

Explanation:

The goal is to fit high-priority work into a schedule already filled with low-priority work.

* Option B is correct. The system must know that the Repair jobs are more important than the Maintenance jobs. This is handled by the Scheduling Priority field (used in the optimization logic to decide which job to drop if there is a conflict) or the Priority field mapped to Service Objectives.

* Option C is correct. Global Optimization is the best tool here. It will look at the entire week, see the high-priority unscheduled jobs, and the low-priority scheduled jobs. It will then un-schedule or move the maintenance jobs to make room for the urgent repairs.

* Option D is correct. For Optimization to work, the existing maintenance appointments must not be Pinned. If they are pinned, the optimizer treats them as immovable rock, and it won't be able to free up the time needed for the repairs.

* Option A (Manual assignment) is inefficient and risky (could double-book). Option E (Resource Schedule Optimization) optimizes one person at a time; Global Optimization is better suited for balancing the load across the whole territory.

NEW QUESTION # 27

Universal Containers wants to use 'Capacity Based' contractors to complete installations that often require crews and can take more than one day.

What is true about 'Capacity Based Resources'? (Choose 2 options)

- A. Crews can be Capacity Based Resources
- B. Complex Work does not support Capacity Based Resources
- C. Capacity Based Resources can be assigned to Service Appointments that have a Scheduling Dependency
- D. Multi-Day Work does not support Capacity Based Resources

Answer: B,D

Explanation:

Capacity-Based Scheduling is a simplified scheduling model (buckets of work) compared to the standard, granular optimization. Because it ignores specific travel times and start times, it has significant limitations.

* Option B is correct: Capacity-Based Resources (contractors) cannot be assigned Multi-Day Service Appointments. They work on a "Hours per Day" or "Jobs per Day" limit, and the system cannot span a single appointment record across multiple days for them.

* Option C is correct: They cannot handle Complex Work (dependencies like "Start Same Time" or

"Follow Immediately"). Since the engine doesn't calculate their precise start time (it just ensures they have enough hours in the day), it cannot synchronize their work with other resources.

* Option D is incorrect: You cannot create a Service Crew composed of Capacity-Based resources.

NEW QUESTION # 28

Which two statements describe 'Global Optimization' accurately?

- A. Global Optimization is the only process that supports Service Objectives and Work Rules that are defined in the Scheduling Policy
- B. Global Optimization runs faster than the Auto Scheduling process
- C. Optimization can move appointments that were previously scheduled, meaning that the optimizer can slide scheduled service appointments right or left of their current time slot
- D. It's recommended to run Global Optimization during the day of service to fix unexpected in-day changes
- E. The Global Optimization process can assess millions of time slots and mobile worker options to produce schedules

Answer: C,E

Explanation:

Global Optimization is the heavy-lifting batch process in Salesforce Field Service designed to create the most efficient schedule possible.

* Option B is correct: Global Optimization uses a powerful algorithm to evaluate millions of potential combinations of resources, times, and routes to find the best overall score based on the Service Objectives.

* Option C is correct: Unlike "Appointment Booking" (which finds a slot for a single job without disturbing others), Global Optimization has the authority to shuffle (move) existing appointments. It can slide jobs earlier or later, or reassess assignments to minimize travel time and white space (gaps) in the schedule.

* Option A is incorrect; Optimization is a batch process that takes significantly longer than the near real-time "Auto Scheduling."

* Option D describes "In-Day Optimization." Global Optimization is typically run overnight because it changes the whole schedule, which is disruptive during the work day.

* Option E is incorrect; all scheduling methods (Global, In-Day, Resource Schedule Optimization, and Appointment Booking) utilize the Scheduling Policy (Work Rules and Objectives).

NEW QUESTION # 29

Universal Containers (UC) sell Service Contracts to their customers. One of the terms of the Service Contract determines that a UC technician will perform annual maintenance on all the customer's Assets until the contract expires.

UC would like to ensure that when a technician is sent to the customer, the maintenance work is completed in a single visit, and all covered Assets are listed on the Work Order's Service Report.

What Maintenance Plan configuration should a consultant recommend UC?

- A. 'Work Order Generation Method' is set to 'One Work Order Line Item per Asset' and 'Service Appointment Generation Method' is set to 'One Service Appointment per Work Order Line Item'
- B. 'Work Order Generation Method' is set to 'One Work Order per Asset' and 'Service Appointment Generation Method' is set to 'One Service Appointment per Work Order'
- C. 'Work Order Generation Method' is set to 'One Work Order Line Item per Asset' and 'Service Appointment Generation Method' is set to 'One Service Appointment per Work Order'
- D. 'Work Order Generation Method' is set to blank and 'Service Appointment Generation Method' is set to 'One Service Appointment per Work Order'

Answer: C

Explanation:

This question tests the Maintenance Plan generation logic.

* Option D is correct. The requirement is Single Visit (One Appointment) for Multiple Assets.

* One Work Order Line Item per Asset. This groups all the assets under a single parent Work Order. Each asset gets its own line item

(WOLI) for tracking purposes.

* One Service Appointment per Work Order: This creates a single appointment for the parent Work Order. The technician arrives once and works through the list of line items (Assets).

* Option B ("One Work Order per Asset") would create separate Work Orders (and likely separate Appointments) for every single asset, resulting in multiple visits or a cluttered schedule.

* Option C ("One SA per WOLI") would explicitly create a separate appointment for every single asset line item, causing massive double-booking/overlap.

NEW QUESTION # 30

What is the best practice to upload a photo that is taken by the mobile worker to a Work Order? (Choose 2 options)

- **A. Use a quick action of type 'Upload Photo'**
- B. Edit the Work Order record through the SFS Mobile App and add the photo as an attachment
- **C. Leverage the Field Service Mobile flow and add image upload component**
- D. Use a quick action of type 'Attach File'
- E. Post the photo via the 'Feed' tab

Answer: A,C

Explanation:

Salesforce Field Service provides specific tools for capturing rich media in a structured way.

* Option B is correct (Mobile Flow): This is the modern best practice. By using a flow with the File Upload (or Image) screen component, you can guide the technician to take a photo at a specific step in the process (e.g., "Take a photo of the completed installation"). This ensures consistency.

* Option A is correct (Quick Action): You can configure Quick Actions (specifically Global or Object-Specific actions for File Uploads) in the Field Service Mobile app extension settings. This provides a one-tap button for technicians to launch the camera and attach a file directly to the record.

* Note: While Option D (Chatter Feed) is possible, it is unstructured data. Options A and B are the "Best Practice" recommendations for process adherence.

NEW QUESTION # 31

.....

In order to serve you better, we have offline and online chat service stuff, and any questions about AP-209 training materials, you can consult us directly or you can send your questions to us by email. In addition, AP-209 exam dumps of us will offer you free demo, and you can have a try before purchasing. Free demo will help you to have a deeper understanding of what you are going to buy.
