更新するAP-211的中問題集 & 合格スムーズAP-211模擬対策問題 | 真実的なAP-211必殺問題集

ご存知のように、PassTestオフィスワーカーは試験の準備をする時間がほとんどありません。被験者の貴重な休息時間を無駄にするのは苦痛です。ただし、SalesforceのAP-211の練習資料がある場合は、状況が異なります。AP-211学習教材には、主要なコア知識が含まれているだけでなく、分散時間を使用して学習できるため、より簡単に学習して乗数効果を得ることができます。また、AP-211試験の質問で20~30時間学習した後、Salesforce Health Cloud Accredited ProfessionalのAP-211試験に確実に合格することができます。

Salesforce Health Cloud Accredited Professional 認定 AP-211 試験問題 (Q102-Q107):

質問 # 102

A consultant is preparing to install Health Cloud in a production org for the first time.
Which three tasks should the consultant ensure are completed prior to installing Health Cloud?
Choose 3 answers

- A. Enable Chatter.
- B. Enable Shield Event Monitoring.
- C. Enable Health Cloud Installation Monitor.
- D. Enable Contacts to Multiple Accounts,
- E. Enable Person Accounts.

正解: A、D、E

解説:

Step-by-Step Explanation:

Salesforce Health Cloud Prerequisites:

Enable Person Accounts:

Required for representing patients and healthcare contacts.

"Person Accounts must be enabled before installing Health Cloud."

- Reference: Health Cloud Installation Prerequisites

Enable Chatter:

Health Cloud uses Chatter for collaboration between care teams.

"Chatter must be enabled to use Health Cloud features like care coordination and notes."

- Reference: Health Cloud Installation Prerequisites

Enable Contacts to Multiple Accounts:

Necessary to relate patients to multiple organizations/providers.

"Enable Contacts to Multiple Accounts to relate contacts (patients) to more than one account (e.g., provider, payer)."

- Reference: Health Cloud Installation Prerequisites

Other Options:

B. Enable Shield Event Monitoring: Not required for Health Cloud installation (but is a best practice for auditing and compliance in some orgs).

D. Enable Health Cloud Installation Monitor: Not a standard Salesforce setting or prerequisite.

Reference:

Health Cloud Installation Prerequisites

質問 # 103

An external provider wants to get a patient's allergy information from Bloomington Caregivers' Health Cloud system. Which Health Cloud API should a consultant recommend?

- A. AllergyMedication API
- B. Patient Healthcare API
- C. Clinical Summary Healthcare API
- **D. Q Interoperability API**

正解: D

解説:

Step-by-Step Explanation:

Requirement:

External provider needs access to patient allergy information.

Interoperability API:

Salesforce Health Cloud provides FHIR-based Interoperability APIs that expose clinical data, including AllergyIntolerance resources.

"Use the Health Cloud Interoperability API (FHIR R4) to retrieve AllergyIntolerance resources and other clinical data for a patient."

- Health Cloud Interoperability API Guide

Other Options:

Clinical Summary Healthcare API: Provides a summary but not structured, granular allergy data.

AllergyMedication API: Not a standard Salesforce API.

Patient Healthcare API: Broader resource, but allergies specifically are available through the Interoperability API.

Reference:

Health Cloud Interoperability API Guide

質問 # 104

A pharma customer requires a scheduling tool to book infusions with multiple steps as part of its Health Cloud implementation. It needs a solution for care coordinators to book appointments without having to manually check availability and resources themselves. Which solution should a consultant recommend?

- **A. Advanced Therapy Management**
- B. Salesforce Scheduler
- C. Procedure Scheduling
- D. Intelligent Appointment Management

正解: A

質問 # 105

Bloomington Caregivers currently has the organization-wide default controlling patient access set to Private. A new respiratory therapist is being added to support a patient at Bloomington Caregivers, and the therapist needs access to the patient's data. How should an administrator grant access to the respiratory therapist using out-of-the-box Health Cloud features?

- A. Add the respiratory therapist to the patient's Account Team and default access will be automatically granted.
- B. Add the respiratory therapist to the patient's Account Team and grant Read or Read/Write access as needed.
- C. Add the respiratory therapist to the patient's Care Team and default access will be automatically granted.
- **D. Add the respiratory therapist to the patient's Care Team and grant Read or Read/Write access as needed.**

正解: D

解説:

When organization-wide default access to patient data is set to Private, Care Team functionality in Health Cloud is the standard, out-of-the-box method to manage individual access to patient records.

Step-by-Step Reference:

Health Cloud uses Care Teams to manage access to patient records.

Extract:

"Add care team members (users, contacts, or person accounts) to the patient's care team and assign appropriate access (Read or Read/Write) to patient records." (Source: Administer Health Cloud - Manage Care Teams) Administrators can specify the access level (Read or Read/Write) for each care team member, allowing for precise control as per role requirements.

Extract:

"Assign record access levels for care team members when adding them to a patient's care team. This is especially important when the OWD is set to Private." (Source: Administer Health Cloud - Care Team Access) This ensures compliance and proper segmentation of data, as required by healthcare regulations.

質問 # 106

As part of a post-visit summary, a client wants to send patients information documenting their visit and care plan. A patient advocate will select from templates to create personalized documents to send.

Which tool should a developer use to provide the necessary functionality?

- A. Health Cloud Email Manager
- **B. OmniStudio Document Generation**
- C. Salesforce PDF Generator
- D. Contract Lifecycle Management

正解: B

解説:

Step-by-Step Explanation:

Requirement Analysis:

The client wants to send patients a personalized summary document after their visit, including their care plan.

The process involves selecting from templates and generating patient-specific content.

Tool Comparison:

Health Cloud Email Manager:

Used for composing and sending emails, not for generating documents from templates.

Salesforce PDF Generator:

While Salesforce can generate PDFs from reports, it does not offer flexible, template-based document generation suited for post-visit summaries or complex care plans, especially with dynamic fields.

OmniStudio Document Generation:

Specifically designed to enable dynamic, template-based document creation in Health Cloud and other Salesforce verticals.

Allows users to select templates, merge patient/case data, and generate PDFs or DOCX that can be sent to patients or caregivers.

Supports integration within Health Cloud flows, empowering users (like a patient advocate) to initiate document generation with a few clicks.

Contract Lifecycle Management:

Focused on legal contracts and workflows, not patient summaries or care plans.

Exact Extracts and Reference from Salesforce Docs:

Extract from OmniStudio Standard Guide:

"OmniStudio Document Generation lets you generate dynamic documents from templates, such as care plans, patient summaries, or correspondence. Templates can be pre-built and allow for the insertion of Health Cloud data fields, enabling the creation of personalized documents for patients or members."

- OmniStudio Document Generation Overview

From Health Cloud Admin Guide, under Patient Correspondence:

"Patient advocates can use OmniStudio Document Generation to select templates and create personalized care documents for patients based on their Health Cloud data."

- Reference: Administer Health Cloud - Document Generation

Best Practice from Salesforce:

Salesforce recommends OmniStudio Document Generation for any scenario requiring dynamic, patient-specific document creation and distribution.
