And with the certification, they all live a better life now.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q425-Q430):

NEW QUESTION # 425

A security engineer is reviewing a Cisco Secure Endpoint public cloud instance. The engineer discovers a malicious verdict for a SHA-256 hash of

689efc1ecd023ec0b0885a80663e30ea013d493f8e88224b570a1234567890.

Which configuration action must be done in Secure Endpoint console to mitigate the threat?

- A. Add the hash to the custom detection list.
- B. Configure correlation policy to block the hash.
- C. Set access control policy and deny files with the hash.
- D. Apply regular expression to block the malicious file.

Answer: A

Explanation:

To mitigate a known malicious file in Cisco Secure Endpoint, the security engineer can add the hash (SHA-256) to the custom detection list. This action ensures that Cisco Secure Endpoint will automatically block or quarantine any file matching this hash in the environment, preventing it from executing or spreading further.

NEW QUESTION # 426

Within Cisco Firepower Management Center, where does a user add or modify widgets?

- A. summary tool
- B. context explorer
- C. dashboard
- D. reporting

Answer: C

Explanation:

https://www.cisco.com/c/en/us/td/docs/security/firepower/60/configuration/guide/fpmc-config-guide-v60/Using_Dashboards.html

NEW QUESTION # 427

An administrator needs to configure Cisco FMC to send a notification email when a data transfer larger than 10 MB is initiated from an internal host outside of standard business hours. Which Cisco FMC feature must be configured to accomplish this task?

- A. application detector
- B. file and malware policy
- C. intrusion policy
- D. correlation policy

Answer: B

NEW QUESTION # 428

Refer to the exhibit. An engineer is modifying an access control policy to add a rule to inspect all DNS traffic that passes through the firewall. After making the change and deploying the policy, they see that DNS traffic is not being inspected by the Snort engine.

What is the problem?

□

- A. The rule must specify the security zone that originates the traffic.
- B. The action of the rule is set to trust instead of allow.
- C. The rule is configured with the wrong setting for the source port.
- D. The rule must define the source network for inspection as well as the port.

Answer: B

NEW QUESTION # 429

Refer to the exhibit. An engineer is analyzing the Attacks Risk Report and finds that there are over 300 instances of new operating systems being seen on the network.

How is the Firepower configuration updated to protect these new operating systems?

- A. The administrator manually updates the policies.
- B. Cisco Firepower automatically updates the policies.
- C. The administrator requests a Remediation Recommendation Report from Cisco Firepower
- **D. Cisco Firepower gives recommendations to update the policies.**

Answer: D

Explanation:

Firepower Recommendations for IPS policies is a tool that work with network discovery to apply recommendations to IPS policies, but you have to apply that unless you configure your custom IPS policy to automatically take recommendations (not suggested for low end FW like 1010 because of the memory limit).
