Reliable DSCI DCPLA Test Simulator - Test DCPLA Testking

Passing the test DCPLA certification can help you realize your goal and find an ideal job. Buying our DCPLA latest question can help you pass the exam successfully. DCPLA exam question provides the free update and the discounts for the old client and our experts check whether our test bank has been updated on the whole day and if there is the update the system will send the update

automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our DCPLA latest question is absolutely good choices for you

The DCPLA certification is ideal for professionals who are interested in pursuing a career in privacy management, such as privacy officers, data security professionals, and compliance officers. DSCI Certified Privacy Lead Assessor DCPLA Certification certification provides individuals with the necessary skills and knowledge to conduct privacy assessments and audits, develop privacy policies and procedures, and manage privacy risks.

DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q37-Q42):

NEW QUESTION # 37

Classify the following scenario as major or minor non-conformity.

"The organization is aware of the PI dealt by it at a broad level based on the business services provided but does not have the detailed view of which business functions, processes or relationships deal with what types of PI including usage, access, transmission, storage, etc."

- A. Minor
- B. None of the above
- **C. Major**
- D. Both Major & Minor

Answer: C

NEW QUESTION # 38

Its mandatory for the assessee to provide the pre-requisites to the assessor organization before commencement of the first phase of assessment.

- **A. True**
- B. False

Answer: A

NEW QUESTION # 39

Which of the following best describes 'Processing'?

- A. Processing is collection and use of personal data
- **B. Processing is storage and structuring personal data**
- C. Processing is recording and destruction of personal data
- D. Processing is a blanket term used for the wide range of operations performed on personal data

Answer: B

NEW QUESTION # 40

Categorise the following statement:

"For an identified data leakage scenario, security team is struggling to configure rules."

- A. Demonstration
- **B. Capability**
- C. Enforcement
- D. Visibility

Answer: B

Explanation:

The statement reflects an organization's difficulty in operationalizing privacy safeguards in response to a known threat scenario. According to the DSCI Assessment Framework for Privacy (DAF-P), "Capability" refers to an organization's ability to implement

and maintain technical, procedural, and administrative controls effectively.

A struggling security team in configuring rules for a known leakage scenario indicates a gap in technical expertise or resources, which directly correlates with a lack of "Capability." This category assesses how prepared an organization is in deploying privacy controls, managing incidents, and aligning security technologies with privacy requirements.

Thus, the challenge in configuring protective rules is best categorized under "Capability" as it denotes a functional inadequacy in handling privacy-related incidents.

NEW QUESTION # 41

FILL BLANK

PPP

Based on the visibility exercise, the consultants created a single privacy policy applicable to all the client relationships and business functions. The policy detailed out what PI company deals with, how it is used, what security measures are deployed for protection, to whom it is shared, etc. Given the need to address all the client relationships and business functions, through a single policy, the privacy policy became very lengthy and complex. The privacy policy was published on company's intranet and also circulated to heads of all the relationships and functions. W.r.t. some client relationships, there was also confusion whether the privacy policy should be notified to the end customers of the clients as the company was directly collecting PI as part of the delivery of BPM services. The heads found it difficult to understand the policy (as they could not directly relate to it) and what actions they need to perform. To assuage their concerns, a training workshop was conducted for 1 day. All the relationship and function heads attended the training. However, the training could not be completed in the given time, as there were numerous questions from the audiences and it took lot of time to clarify.

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than 500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.

The company is witnessing phenomenal growth in the BPM services over last few years including Finance and Accounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too has attracted company's attention given the phenomenal increase in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).

To get better access to this market, the company decided to invest in privacy, so that it is able to provide increased assurance to potential clients in the EU and this will also benefit its US operations because privacy concerns are also on rise in the US. It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.

The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.

Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.

Given the confusion among relationship and function heads, how would you proceed to address the problem and ensure that policy is well understood and deployed? (250 to 500 words)

Answer:

Explanation:

See the answer in explanation below.

Explanation:

In order to address the confusion among relationship and function heads, it is important to ensure that the privacy policy is effectively communicated and understood by all stakeholders. The following steps can be taken towards this end:

1. Awareness Campaigns - In order to educate the stakeholders about the importance of data privacy, various awareness campaigns should be launched through digital media, print media, and seminars. These campaigns must include topics such as why data privacy is important, the consequences of not adhering to the policy, and how to comply with it.
2. Training - In addition to awareness campaigns, proper training should be provided to all stakeholders on data privacy policies and procedures. The training should also focus on best practices such as secure coding, encryption techniques etc., so that they understand the importance of these security measures in protecting data from unauthorized access.

3. Policies and Procedures - All stakeholders should have access to a clear set of policies and procedures governing their actions related to data privacy. Such guidelines should include information about the types of sensitive information which needs to be kept confidential, what constitutes a violation of the policy, and how to take corrective measures if a violation occurs.
4. Auditing - The effectiveness of all the policies and procedures should be regularly audited in order to ensure that the data privacy policy is being followed properly. Any discrepancies or violations must be reported immediately so that appropriate action can be taken.
5. Reporting Mechanism - A reporting mechanism should also be put into place for stakeholders to report any suspected errors or breaches in data privacy policies. This will help in identifying potential risks early on and taking corrective action as soon as possible. These initiatives will not only reduce confusion among relationship and function heads but will also help build trust with customers by ensuring proper implementation of enterprise-wide privacy program, which in turn will help the company in leveraging outsourcing opportunities. Lastly, by following all these measures, the company will be able to demonstrate its commitment towards privacy and create a secure environment for its customers.

In conclusion, in order to ensure that policy is well understood and deployed, it is important to take appropriate steps such as launching awareness campaigns, providing training to stakeholders on data privacy policies, auditing policies and procedures regularly, and setting up a reporting mechanism for errors or breaches. Doing so will reduce confusion among relationship and function heads and help build trust with customers by ensuring proper implementation of an enterprise-wide privacy program.

NEW QUESTION # 42

.....

I am proud to tell you that our company is definitely one of the most authoritative companies in the international market for DCPLA exam. What's more, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week, therefore, our company is really the best choice for you to buy the DCPLA Training Materials. You can just feel rest assured that our after sale service staffs are always here waiting for offering you our services on our DCPLA exam questions. Please feel free to contact us. You will be surprised by our good DCPLA study guide.
