Pegasystems PEGACPSA24V1 Exam Pass Guide - PEGACPSA24V1 Simulations Pdf

The Certified Pega System Architect 24 PEGACPSA24V1 exam dumps are top-rated and real Certified Pega System Architect 24 PEGACPSA24V1 practice questions that will enable you to pass the final Certified Pega System Architect 24 PEGACPSA24V1 exam easily. With the Certified Pega System Architect 24 Exam Questions you can make this task simple, quick, and instant. Using the Certified Pega System Architect 24 PEGACPSA24V1 can help you success in your exam. GetValidTest offers reliable guide files and reliable exam guide materials for 365 days free updates.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q201-Q206):

NEW QUESTION # 201

Which action occurs when a child case is withdrawn?

- A. The parent case is also withdrawn
- **B. The parent case remains open unless specified otherwise**
- C. All related cases are automatically closed
- D. The case is reassigned to a different queue

Answer: B

Explanation:

When a child case is withdrawn, the parent case remains open unless configured otherwise. This allows flexibility in managing multiple case dependencies. The parent case may require manual action to close or continue processing. This prevents premature closure of ongoing workflows.

NEW QUESTION # 202

Which two components allow users to enter and modify structured data in a form? (Choose Two)

- A. Case Status
- B. SLA Timer
- **C. Dropdown**
- **D. Text Input**

Answer: C,D

Explanation:

A Text Input allows users to enter free-text values, such as names or comments. A Dropdown provides predefined selectable options, ensuring data consistency. These components improve data capture accuracy and user experience. They are widely used in registration forms, search filters, and case data inputs.

NEW QUESTION # 203

Which feature allows copying multiple property values from one object to another?

- A. Declare Expression
- **B. Data Transform**
- C. Decision Table
- D. SLA Urgency Calculation

Answer: B

Explanation:

A Data Transform can copy multiple property values from one object to another, simplifying data handling. It is useful for duplicating customer details, mapping values between cases, and setting initial field values. This reduces manual input while ensuring consistency. Data Transforms enhance workflow automation and efficiency.

NEW QUESTION # 204

Which two approval mechanisms can be used for hierarchical approvals? (Choose Two)

- A. SLA Timeouts
- **B. Cascading Approvals**
- C. Round-Robin Distribution
- **D. Authority Matrix**

Answer: B,D

Explanation:

Cascading Approvals allow sequential approvals based on hierarchy, while Authority Matrix assigns tasks based on defined permissions. These methods ensure structured decision-making in corporate governance. SLA timeouts and round-robin do not manage approval hierarchy. Both methods prevent unauthorized approvals.

NEW QUESTION # 205

Which inheritance model allows sharing rules based on naming conventions?

- A. SLA Escalation Rule
- **B. Pattern Inheritance**
- C. Work Queue Prioritization
- D. Direct Inheritance

Answer: B

Explanation:

Pattern Inheritance enables rules to be shared across classes with similar naming structures, reducing manual rule duplication. This supports scalability and modularity. SLA escalation rules and work queue prioritization do not affect rule inheritance.

NEW QUESTION # 206

.....

Pegasystems PEGACPSA24V1 certification exam is among those popular IT certifications. It is also the dream of ambitious IT professionals. This part of the candidates need to be fully prepared to allow them to get the highest score in the PEGACPSA24V1 Exam, make their own configuration files compatible with market demand.
