Taking these mock exams is important because it tells you where you stand. People who are confident about their knowledge and expertise can take these NCP-US-6.5 practice tests and check their scores to know where they lack. This is good practice to be a pro and clear your Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) exam with amazing scores. Prep4pass practice tests simulate the real NCP-US-6.5 exam questions environment.

Nutanix NCP-US-6.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Troubleshoot issues related to Nutanix Files• Explain Data Management processes for Files and Objects
Topic 2	<ul style="list-style-type: none">• Identify the steps to deploy Nutanix Files• Given a scenario, determine product and sizing parameters
Topic 3	<ul style="list-style-type: none">• Configure Nutanix Objects• Describe how to monitor performance and usage

Topic 4	<ul style="list-style-type: none"> • Deploy and Upgrade Nutanix Unified Storage • Perform upgrades • maintenance for Files • Objects implementations
Topic 5	<ul style="list-style-type: none"> • Analyze and Monitor Nutanix Unified Storage • Describe the use of Data Lens for data security
Topic 6	<ul style="list-style-type: none"> • Given a scenario, configure shares, buckets, and or Volume Groups • Troubleshoot a failed upgrade for Files • Objects

Pass Guaranteed Nutanix - Trustable NCP-US-6.5 - Vce Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Exam

Only 20-30 hours are needed for you to learn and prepare our NCP-US-6.5 test questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn. But you buy our NCP-US-6.5 Exam Materials you will save your time and energy and focus your attention mainly on your most important thing. And you can master the most important NCP-US-6.5 exam torrent in the shortest time and finally pass the NCP-US-6.5 exam successfully with our excellent NCP-US-6.5 learning prep.

Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q14-Q19):

NEW QUESTION # 14

What is the minimum and maximum file size limitations for Smart Tiering?

- A. 64 KiB minimum and 15 TiB maximum
- B. 128 KiB minimum and 13 TiB maximum
- **C. 64 KiB minimum and 5 TiB maximum**
- D. 128 IOB minimum and 5 TiB maximum

Answer: C

Explanation:

Smart Tiering is a feature that allows Files to tier data across different storage tiers based on the file size and access frequency. Smart Tiering supports files with a minimum size of 64 KiB and a maximum size of 5 TiB. Reference: Nutanix Files Administration Guide2

NEW QUESTION # 15

An administrator needs to allow individual users to restore files and folders hosted in Files.

How can the administrator meet this requirement?

- **A. Enable Self-Service Restore on shares/exports.**
- B. Configure a Protection Domain on the FSVMs.
- C. Configure a Protection Domain for the shares/exports.
- D. Enable Self-Service Restore on the FSVMs.

Answer: A

Explanation:

Self-Service Restore (SSR) is a feature that allows individual users to restore files and folders hosted in Files without requiring administrator intervention. SSR can be enabled on a per-share or per-export basis, and users can access the snapshots of their data

through a web portal or a Windows client application1. Reference: Nutanix Files Administration Guide1

NEW QUESTION # 16

An administrator has deployed a new Files cluster within a Windows Environment.

After some days, he Files environment is not able to synchronize users with the Active Directory server anymore. The administrator observes a large time difference between the Files environment and the Active Directory Server that is responsible for the behavior. How should the administrator prevent the Files environment and the AD Server from having such a time difference in future?

- A. Use 0.pool.ntp.org as the NTP Server for the AD Server.
- B. Use 0.pool.ntp.org as the NTP Server for the Files environment.
- C. Connect to every FSVM and edit the time manually.
- D. Use the same NTP Servers for the File environment and the AD Server.

Answer: D

Explanation:

The administrator should prevent the Files environment and the AD Server from having such a time difference in future by using the same NTP Servers for the File environment and the AD Server. NTP (Network Time Protocol) is a protocol that synchronizes the clocks of devices on a network with a reliable time source. NTP Servers are devices that provide accurate time information to other devices on a network.

By using the same NTP Servers for the File environment and the AD Server, the administrator can ensure that they have consistent and accurate time settings and avoid any synchronization issues or errors. References: Nutanix Files Administration Guide, page 32; Nutanix Files Troubleshooting Guide

NEW QUESTION # 17

What is the network requirement for a File Analytics deployment?

- A. Must use the CVM not work
- B. Must use the Storage-side network
- C. Must use the Backplane network
- D. Must use the Client-side network

Answer: D

Explanation:

Nutanix File Analytics is a feature that provides insights into the usage and activity of file data stored on Nutanix Files. File Analytics consists of a File Analytics VM (FAVM) that runs on a Nutanix cluster and communicates with the File Server VMs (FSVMs) that host the file shares. The FAVM collects metadata and statistics from the FSVMs and displays them in a graphical user interface (GUI). The FAVM must be deployed on the same network as the FSVMs, which is the Client-side network. This network is used for communication between File Analytics and FSVMs, as well as for accessing the File Analytics UI from a web browser. The Client-side network must have DHCP enabled and must be routable from the external hosts that access the file shares and File Analytics UI. Reference: Nutanix Files Administration Guide, page 93; Nutanix File Analytics Deployment Guide

NEW QUESTION # 18

A company uses Linux and Windows workstations. The administrator is evaluating solution for their file storage needs.

The solution should support these requirements:

- * Distributed File System
- * Active Directory integrated
- * Scale out architecture

- A. Objects
- B. Volumes
- C. Mine
- D. Files

Answer: D

Explanation:

The solution that meets the company's requirements for their file storage needs is Files. Files is a feature that allows users to create and manage file server instances (FSIs) on a Nutanix cluster. FSIs can provide SMB and NFS access to file shares and exports for different types of clients. Files supports these requirements:

* Distributed File System Files uses a distributed file system that spans across multiple FSVMs (File Server VMs), which improves scalability, performance, and availability.

* Active Directory integrated: Files can integrate with Active Directory for authentication and authorization of SMB clients and multiprotocol NFS clients.

* Scale out architecture: Files can scale out by adding more FSVMs to an existing FSI or creating new FSIs on the same or different clusters. References: Nutanix Files Administration Guide, page 27; Nutanix Files Solution Guide, page 6

NEW QUESTION # 19

Our Prep4pass's NCP-US-6.5 exam training materials are mainly downloaded in PDF and software. We will regularly update, and will always provide the latest and the most accurate Nutanix NCP-US-6.5 exam authentication information. With efforts for many years, the passing rate of our NCP-US-6.5 Exam has reached as high as 100%. If you have any concerns, you can try our NCP-US-6.5 pdf free demo and answers on probation first, and then make a decision whether to choose our NCP-US-6.5 dumps or not.
