CheckPoint 156-215.82 Practice Exams In Online Format

We will free provide you part of the exercises of CheckPoint Certification 156-215.82 Exam on the Internet to let you try to test our product's quality. After your trail you will find Actual4Exams's exercises is the most comprehensive one and is what you want to.

CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q50-Q55):

NEW QUESTION # 50

Which is NOT an encryption algorithm that can be used in an IPSEC Security Association (Phase 2)?

- A. AES-GCM-128
- **B. AES-CBC-256**
- C. AES-GCM-256

Answer: B

Explanation:

The answer is B because AES-CBC-256 is not a supported encryption algorithm for IPsec Security Associations (Phase 2) in R81. The supported encryption algorithms are AES-GCM-128, AES-GCM-256, AES-CBC-128, 3DES, and NULL3. Check Point R81 VPN Administration Guide

NEW QUESTION # 51

Which of the following is NOT a valid deployment option for R80?

- A. Log server
- **B. Multi-domain management server**
- C. All-in-one (stand-alone)
- D. SmartEvent

Answer: B

Explanation:

Multi-domain management server is a valid deployment option for R81, not R80. R80 supports multi-domain security management, which is a centralized management solution for large-scale, distributed environments with many different domain networks¹. Multi-Domain Security Management Administration Guide R80

NEW QUESTION # 52

Which of the following is considered a "Subscription Blade", requiring renewal every 1-3 years?

- A. Identity Awareness Blade
- B. Firewall Blade
- C. IPSEC VPN Blade
- **D. IPS blade**

Answer: D

Explanation:

The following is considered a "Subscription Blade", requiring renewal every 1-3 years: IPS blade⁴. The IPS blade is a software blade that provides protection against network attacks and exploits by inspecting traffic and blocking malicious packets. The IPS blade requires a subscription license that includes updates for the IPS signatures and Geo Protection database. Other subscription blades include Anti-Bot, Anti-Virus, URL Filtering, Application Control, Threat Emulation, and Threat Extraction. Check Point Licensing and Contract Operations User Guide

NEW QUESTION # 53

Why is a Central License the preferred and recommended method of licensing?

- A. Central Licensing ties to the IP address of a gateway and can be changed to any gateway if needed.
- B. Central Licensing is the only option when deploying Gaia
- **C. Central Licensing ties to the IP address of the management server and is not dependent on the IP of any gateway in the event it changes.**
- D. Central Licensing is actually not supported with Gaia.

Answer: C

Explanation:

Central License is the preferred and recommended method of licensing because it ties to the IP address of the management server and is not dependent on the IP of any gateway in the event it changes. Central License allows administrators to manage licenses for all Security Gateways from one central location. If the IP address of a gateway changes, the license remains valid as long as it is connected to the same management server. Central Licensing is supported with Gaia and is not the only option when deploying Gaia. Central Licensing does not tie to the IP address of a gateway and can not be changed to any gateway if needed.

NEW QUESTION # 54

Which Identity Source(s) should be selected in Identity Awareness for when there is a requirement for a higher level of security for sensitive servers?

- **A. Endpoint Identity Agent and Browser-Based Authentication**
- B. AD Query
- C. Terminal Servers Endpoint Identity Agent
- D. RADIUS and Account Logon

Answer: A

Explanation:

Endpoint Identity Agent and Browser-Based Authentication are the identity sources that provide the highest level of security for sensitive servers, as they require user authentication and can enforce granular access rules based on user identity. AD Query, Terminal Servers Endpoint Identity Agent, and RADIUS and Account Logon are less secure, as they rely on passive methods of identity acquisition or do not support identity-based access control.

NEW QUESTION # 55

.....

Improving your efficiency and saving your time has always been the goal of our 156-215.82 preparation exam. If you are willing to try our 156-215.82 study materials, we believe you will not regret your choice. With our 156-215.82 Practice Engine for 20 to 30 hours, we can claim that you will be quite confident to attend your exam and pass it for sure for we have high pass rate as 98% to 100% which is unmatched in the market.
