As we all know, respect and power is gained through knowledge or skill. The society will never welcome lazy people. Do not satisfy what you have owned. Challenge some fresh and meaningful things, and when you complete AD0-E725 exam, you will find you have reached a broader place where you have never reach. There must be one that suits you best. Your life will become more meaningful because of your new change, and our AD0-E725 question torrents will be your first step.

Adobe Commerce Developer Expert Sample Questions (Q33-Q38):

NEW QUESTION # 33

A client uses APIs on their Adobe Commerce platform and powers external programs with the data fed from the Adobe API systems. The client reports that it is becoming unmanageable to handle all the API endpoints and would like to have a centralized API system.

Which new feature will help the client with this problem?

- A. Adobe Commerce API Mesh
- B. Adobe I/O Events for Adobe Commerce
- C. Adobe Bulk API Handler

Answer: A

Explanation:

Adobe Commerce API Mesh provides a centralized GraphQL layer that aggregates data from multiple APIs (Commerce, third-party systems, microservices). This allows the client to interact with a single unified API endpoint, instead of managing multiple APIs individually.

A Bulk API Handler does not exist.

B Adobe I/O Events is for real-time event streaming, not API centralization.

C is correct: API Mesh is the official solution for centralized API management.

NEW QUESTION # 34

A Developer working on a Magento 2 store needs to modify the Content Security Policy (CSP) to allow loading of images from a trusted external domain while maintaining strict policies for other resources. To accomplish this, the `csp_whitelist.xml` file must be updated.

Which code snippet should the Developer use to update the CSP configuration?

- A.

```
<policies>
<policy id="default-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
</policy>
</policies>
```
- B.

```
<policies>
<policy id="img-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
```

- ```

</policy>
</policies>

```
- C. <csp>

```

<policies>
<policy id="media-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
</policy>
</policies>
</csp>

```

**Answer: B**

Explanation:

To allow loading of external images, the policy that must be updated is img-src in the csp\_whitelist.xml.

Option A (default-src) is too broad and not best practice.

Option C (media-src) applies only to audio/video sources, not images.

Thus, B is the correct solution.

### NEW QUESTION # 35

An Adobe Commerce Developer is tasked to frequently send data to a third-party API. The API utilizes a JSON Web Token (JWT) that expires every hour. The developer decides to store the JWT in a custom cache.

Which step should the Developer take to implement this new custom cache type correctly?

- A. Define the custom cache type directly in system.xml at the website level.
- B. Define the custom cache type in the di.xml, ensuring the cache model implements CacheInterface.
- C. Define the custom cache type in cache.xml with a unique name and instance.

**Answer: C**

### NEW QUESTION # 36

A Developer discovers the following code snippet in default.xml layout:

```

<referenceBlock name="content">
<block name="custom" template="example.phtml" cacheable="false" />
</referenceBlock>

```

Which caching behavior will occur?

- A. Only the custom block will not be cached.
- B. The content block and all its child blocks will become cacheable.
- C. All pages will be marked as non-cacheable.

**Answer: C**

### NEW QUESTION # 37

A Developer needs to subscribe to the customer\_register\_success event.

How should the observer be declared in the module?

- A. Declare in etc/events.xml:

```

<event name="customer_register_success">
<observer name="vendor_module_customer_register_observer" instance="
Vendor\Module\Observer\CustomerRegisterSuccess" />
</event>

```
- B. Declare in etc/observer.xml:

```

<observer name="vendor_module_customer_register_observer">

```
