## UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q88-Q93):

### NEW QUESTION # 88

How can attended process execution be scheduled?

- A. Both from Assistant and Orchestrator
- B. They cannot be scheduled but users can set reminders**
- C. Only from Assistant
- D. Only from Orchestrator

### Answer: B

Explanation:

Attended process execution in UiPath cannot be scheduled in the same way as unattended processes. However, users can set reminders using the UiPath Assistant. While the Assistant allows for reminders to be set, it does not schedule the process to run automatically. The user must manually start the process after being reminded.

This is in contrast to unattended processes, which can be scheduled to run automatically at specified times through the Orchestrator<sup>12</sup>.

References: The explanation is based on the UiPath Community Forum discussions and the UiPath Documentation Portal's information on scheduling processes<sup>12</sup>.

### NEW QUESTION # 89

Which of the following are one of the three features offered by UiPath Process Mining within the Automation Potential dashboard?

- A. Automation Rate, Manual Processing Time, Number of cases
- B. Automation Rate, Total case value, FTE
- C. Automation Rate, Manual Processing Time, FTE**
- D. Automation Rate, Avg. number of events, FTE

**Answer: C**

**NEW QUESTION # 90**

Where can you find details about business rules exceptions and how to be handled?

- A. In the PDD, in the As-Is Process Description
- **B. In the PDD, in the To-Be Process Description**
- C. In the Detailed As-Is Process Steps
- D. In the Traceability Matrix

**Answer: B**

Explanation:

Details about business rules exceptions and how they are to be handled can typically be found in the Process Design Document (PDD), specifically in the To-Be Process Description section. This section of the PDD outlines the future state of the process after automation, including how exceptions and business rules are managed. It provides a clear guide on how the automated process should handle different scenarios, including exceptions that may arise due to business rules1.

**NEW QUESTION # 91**

What is the correct order of the stages of Process Documentation?

Instructions: Drag and Drop the items on the left to the boxes on the right in a correct order.

**Answer:**

Explanation:

**NEW QUESTION # 92**

What are the 2 ways to document processes in UiPath Task Capture?

- A. a. Build diagram from scratch
- B. Use the Task Capture recorder to record the step-by-step actions in the process
- C. a. Build diagram from scratch
- D. a. Import diagram from Process Mining
- E. Use the UiPath Studio recorder to record the step-by-step actions in the process
- F. a. Import diagram from Task Mining
- **G. Use the UiPath Studio recorder to record the step-by-step actions in the process**
- H. Use the Task Capture recorder to record the step-by-step actions in the process

**Answer: G**

Explanation:

UiPath Task Capture provides two primary methods for documenting processes:

1. Build diagram from scratch: This method allows you to manually create a workflow diagram that outlines all the necessary actions in the process.

2. Use the Task Capture recorder to record the step-by-step actions in the process: With this method, you run through the process while Task Capture automatically captures your actions, takes screenshots with each mouse click, and builds a workflow diagram based on the collected data1.

These methods enable the creation of detailed process documentation that can be used for further analysis and automation development.

References: The explanation is based on the UiPath Documentation Portal's guide on documenting the process using Task Capture1.

**NEW QUESTION # 93**

.....

If you are a person who desire to move ahead in the career with informed choice, then the UiPath training material is quite beneficial for you. The UiPath-ABA1 pdf vce is designed to boost your personal ability in your industry. It just needs to spend 20-30 hours
