

Exam NetSec-Pro Format & Free Sample NetSec-Pro Questions

2026 Latest RealValidExam NetSec-Pro PDF Dumps and NetSec-Pro Exam Engine Free Share: <https://drive.google.com/open?id=1luov5Wp--ZRrlcbtTgyJaGMcfOSaZn0d>

With our Palo Alto Networks NetSec-Pro study material, you'll be able to make the most of your time to ace the test. Despite what other courses might tell you, let us prove that studying with us is the best choice for passing your Palo Alto Networks NetSec-Pro Certification Exam! If you want to increase your chances of success and pass your NetSec-Pro exam, start learning with us right away!

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.
Topic 2	<ul style="list-style-type: none"> NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.

Topic 3	<ul style="list-style-type: none"> • Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.
Topic 4	<ul style="list-style-type: none"> • Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.

Free Sample NetSec-Pro Questions & Test NetSec-Pro Collection Pdf

Our Palo Alto Networks Network Security Professional (NetSec-Pro) PDF format is user-friendly and accessible on any smart device, allowing applicants to study from anywhere at any time. We have included actual and updated Palo Alto Networks NetSec-Pro questions in this Palo Alto Networks Network Security Professional (NetSec-Pro) Dumps PDF file. Our Palo Alto Networks Network Security Professional (NetSec-Pro) exam dumps PDF format is designed to help individuals acquire the knowledge necessary to succeed in the test.

Palo Alto Networks Network Security Professional Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which two configurations are required when creating deployment profiles to migrate a perpetual VM-Series firewall to a flexible VM? (Choose two.)

- A. Deploy virtual Panorama for management.
- B. Choose "Fixed vCPU Models" for configuration type.
- C. Allocate the same number of vCPUs as the perpetual VM.
- D. Allow only the same security services as the perpetual VM.

Answer: C,D

Explanation:

When migrating from a perpetual VM-Series firewall license to a flexible VM licensing model, two critical steps are needed:

Allocate same number of vCPUs ?This ensures that the VM-Series capacity remains consistent and avoids resource bottlenecks.

When migrating perpetual VM-Series licenses to flexible VM licensing, allocate the same vCPU and memory resources to ensure equivalent performance.

Limit to same security services ?Flexible licensing requires maintaining the same security services to preserve licensing compliance.

Ensure that you allow only the same security services on the flexible VM instance as were licensed on the perpetual VM.

NEW QUESTION # 49

Which two types of logs must be forwarded to Strata Logging Service for IoT Security to function?

(Choose two.)

- A. WildFire
- B. Threat
- C. URL Filtering
- D. Enhanced application

Answer: B,D

Explanation:

For IoT Security to accurately classify and monitor IoT devices, the following logs must be forwarded to Strata Logging Service: Enhanced application logs - provide detailed application usage and behaviors, essential for profiling device types and roles.

Enhanced Application logs provide additional context on IoT device behavior and usage patterns, and must be forwarded to Strata Logging Service for IoT Security to build accurate Device-ID profiles.

Threat logs - essential for detecting suspicious or malicious activities by IoT devices.

Threat logs are critical for identifying potential exploits or suspicious activities involving IoT devices and are required for accurate threat visibility within IoT Security.

These logs collectively ensure accurate device classification and real-time threat visibility.

NEW QUESTION # 50

Which set of attributes is used by IoT Security to identify and classify appliances on a network when determining Device-ID?

- A. Device model, firmware version, and user credential
- B. Hostname, application usage, and encryption method
- **C. MAC address, device manufacturer, and operating system**
- D. IP address, network traffic patterns, and device type

Answer: C

Explanation:

IoT Security uses MAC address, device manufacturer, and OS information to identify and classify devices via Device-ID.

IoT Security uses passive network traffic analysis to fingerprint devices based on the MAC address, manufacturer, and operating system to ensure accurate classification.

These attributes provide a robust, manufacturer-agnostic method to fingerprint IoT devices.

NEW QUESTION # 51

How can a firewall administrator block a list of 300 unique URLs in the most time-efficient manner?

- A. Block multiple predefined URL categories.
- B. Use application filters to block the App-IDs.
- **C. Import the list into a custom URL category.**
- D. Use application groups to block the App-IDs.

Answer: C

Explanation:

For large lists of specific URLs, creating a custom URL category and importing the list is the most efficient approach for granular URL filtering.

You can create custom URL categories to define specific URLs or patterns and enforce policies for these categories. This is the most efficient way to handle large sets of URLs.

This approach saves time compared to manual rule creation or using generic application filters.

NEW QUESTION # 52

Which AI-powered solution provides unified management and operations for NGFWs and Prisma Access?

- **A. Strata Cloud Manager (SCM)**
- B. Prisma Access Browser
- C. Autonomous Digital Experience Manager (ADEM)
- D. Panorama

Answer: A

Explanation:

Strata Cloud Manager (SCM) offers a cloud-based unified management plane for both NGFWs and Prisma Access, enabling consistent policy enforcement, simplified management, and AI-driven operational insights.

Strata Cloud Manager provides a single interface for unified management of NGFWs and Prisma Access, leveraging AI to optimize security operations and streamline workflows.

Unlike Panorama, which is an on-premises management solution, SCM delivers cloud-based, AI-driven capabilities for centralized oversight.

NEW QUESTION # 53

.....

IT elite team of our RealValidExam make a great effort to provide large numbers of examinees with the latest version of Palo Alto Networks's NetSec-Pro exam training materials, and to improve the accuracy of NetSec-Pro exam dumps. Choosing RealValidExam, you can make only half efforts of others to pass the same NetSec-Pro Certification Exam. What's more, after you purchase NetSec-Pro exam training materials, we will provide free renewal service as long as one year.
