

# PSE-Strata-Pro-24 Deutsche Prüfungsfragen, PSE-Strata-Pro-24 Originale Fragen

P.S. Kostenlose 2025 Palo Alto Networks PSE-Strata-Pro-24 Prüfungsfragen sind auf Google Drive freigegeben von ZertPruefung verfügbar: <https://drive.google.com/open?id=1sEV4Gm-zYUt2msqfSSIMOOoc632oS6LU>

Die Prüfungsfragen und Antworten zur Palo Alto Networks PSE-Strata-Pro-24 Zertifizierung von ZertPruefung enthalten unbeschränkte Antwortenspeicherungen. So können Sie ganz mühlos die Prüfung bestehen. Die Schulungsunterlagen zur Palo Alto Networks PSE-Strata-Pro-24 Prüfung von ZertPruefung sind die besten. Mit deren Hilfe können Sie ganz einfach die Prüfung bestehen und das Zertifikat für Palo Alto Networks PSE-Strata-Pro-24 Prüfung erhalten.

## Palo Alto Networks PSE-Strata-Pro-24 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"><li>Network Security Strategy and Best Practices: This section of the exam measures the skills of Security Strategy Specialists and highlights the importance of the Palo Alto Networks five-step Zero Trust methodology. Candidates must understand how to approach and apply the Zero Trust model effectively while emphasizing best practices to ensure robust network security.</li></ul>
Thema 2	<ul style="list-style-type: none"><li>Business Value and Competitive Differentiators: This section of the exam measures the skills of Technical Business Value Analysts and focuses on identifying the value proposition of Palo Alto Networks Next-Generation Firewalls (NGFWs). Candidates will assess the technical business benefits of tools like Panorama and SCM. They will also recognize customer-relevant topics and align them with Palo Alto Networks' best solutions. Additionally, understanding Strata's unique differentiators is a key component of this domain.</li></ul>
Thema 3	<ul style="list-style-type: none"><li>Architecture and Planning: This section of the exam measures the skills of Network Architects and emphasizes understanding customer requirements and designing suitable deployment architectures. Candidates must explain Palo Alto Networks' platform networking capabilities in detail and evaluate their suitability for various environments. Handling aspects like system sizing and fine-tuning is also a critical skill assessed in this domain.</li></ul>
Thema 4	<ul style="list-style-type: none"><li>Deployment and Evaluation: This section of the exam measures the skills of Deployment Engineers and focuses on identifying the capabilities of Palo Alto Networks NGFWs. Candidates will evaluate features that protect against both known and unknown threats. They will also explain identity management from a deployment perspective and describe the proof of value (PoV) process, which includes assessing the effectiveness of NGFW solutions.</li></ul>

## bestehen Sie PSE-Strata-Pro-24 Ihre Prüfung mit unserem Prep PSE-Strata-Pro-24 Ausbildung Material & kostenloser Dowload Torrent

Wir sind der Schnellste, der daa Palo Alto Networks PSE-Strata-Pro-24 Zertifikat erhält; wir sind noch der höchste, der Ihre Interessen schützt. Wir sind ZertPruefung. ZertPruefung kann Ihnen versprechen, dass die Testaufgaben von Palo Alto Networks PSE-Strata-Pro-24 Zertifizierungsprüfung 100% richtig und ganz umfassend sind. Nachdem Sie die Testfragen zur Palo Alto Networks PSE-Strata-Pro-24 Zertifizierung gekauft haben, werden Sie kostenlos die einjährige Aktualisierung genießen.

## Palo Alto Networks Systems Engineer Professional - Hardware Firewall PSE-Strata-Pro-24 Prüfungsfragen mit Lösungen (Q44-Q49):

### 44. Frage

Which two methods are valid ways to populate user-to-IP mappings? (Choose two.)

- A. Captive portal
- B. SCP log ingestion
- C. XML API
- D. User-ID

**Antwort: A,C**

Begründung:

Step 1: Understanding User-to-IP Mappings

User-to-IP mappings are the foundation of User-ID, a core feature of Strata Hardware Firewalls (e.g., PA-400 Series, PA-5400 Series). These mappings link a user's identity (e.g., username) to their device's IP address, enabling policy enforcement based on user identity rather than just IP. Palo Alto Networks supports multiple methods to populate these mappings, depending on the network environment and authentication mechanisms.

\* Purpose: Allows the firewall to apply user-based policies, monitor user activity, and generate user-specific logs.

\* Strata Context: On a PA-5445, User-ID integrates with App-ID and security subscriptions to enforce granular access control.

### 45. Frage

As a team plans for a meeting with a new customer in one week, the account manager prepares to pitch Zero Trust. The notes provided to the systems engineer (SE) in preparation for the meeting read:

"Customer is struggling with security as they move to cloud apps and remote users." What should the SE recommend to the team in preparation for the meeting?

- A. Design discovery questions to validate customer challenges with identity, devices, data, and access for applications and remote users.
- B. Lead with a product demonstration of GlobalProtect connecting to an NGFW and Prisma Access, and have SaaS security enabled.
- C. Guide the account manager into recommending Prisma SASE at the customer meeting to solve the issues raised.
- D. Lead with the account manager pitching Zero Trust with the aim of convincing the customer that the team's approach meets their needs.

**Antwort: A**

Begründung:

When preparing for a customer meeting, it's important to understand their specific challenges and align solutions accordingly. The notes suggest that the customer is facing difficulties securing their cloud apps and remote users, which are core areas addressed by Palo Alto Networks' Zero Trust and SASE solutions.

However, jumping directly into a pitch or product demonstration without validating the customer's specific challenges may fail to build trust or fully address their needs.

\* Option A: Leading with a pre-structured pitch about Zero Trust principles may not resonate with the customer if their challenges are not fully understood first. The team needs to gather insights into the customer's security pain points before presenting a solution.

\* Option B (Correct): Discovery questions are a critical step in the sales process, especially when addressing complex topics like Zero Trust. By designing targeted questions about the customer's challenges with identity, devices, data, and access, the SE can identify specific pain points. These insights can then be used to tailor a Zero Trust strategy that directly addresses the customer's concerns.

This approach ensures the meeting is customer-focused and demonstrates that the SE understands their unique needs.

\* Option C: While a product demonstration of GlobalProtect, Prisma Access, and SaaS security is valuable, it should come after discovery. Presenting products prematurely may seem like a generic sales pitch and could fail to address the customer's actual challenges.

\* Option D: Prisma SASE is an excellent solution for addressing cloud security and remote user challenges, but recommending it without first understanding the customer's specific needs may undermine trust. This step should follow after discovery and validation of the customer's pain points.

Examples of Discovery Questions:

- \* What are your primary security challenges with remote users and cloud applications?
- \* Are you currently able to enforce consistent security policies across your hybrid environment?
- \* How do you handle identity verification and access control for remote users?
- \* What level of visibility do you have into traffic to and from your cloud applications?

References:

- \* Palo Alto Networks Zero Trust Overview: <https://www.paloaltonetworks.com/zero-trust>
- \* Best Practices for Customer Discovery: <https://docs.paloaltonetworks.com/sales-playbooks>

## 46. Frage

A security engineer has been tasked with protecting a company's on-premises web servers but is not authorized to purchase a web application firewall (WAF).

Which Palo Alto Networks solution will protect the company from SQL injection zero-day, command injection zero-day, Cross-Site Scripting (XSS) attacks, and IIS exploits?

- A. Threat Prevention, Advanced URL Filtering, and PAN-OS 10.2 (and higher)
- **B. Advanced Threat Prevention and PAN-OS 11.x**
- C. Threat Prevention and PAN-OS 11.x
- D. Advanced WildFire and PAN-OS 10.0 (and higher)

### Antwort: B

Begründung:

Protecting web servers from advanced threats like SQL injection, command injection, XSS attacks, and IIS exploits requires a solution capable of deep packet inspection, behavioral analysis, and inline prevention of zero-day attacks. The most effective solution here is Advanced Threat Prevention (ATP) combined with PAN-OS 11.x.

\* Why "Advanced Threat Prevention and PAN-OS 11.x" (Correct Answer B)? Advanced Threat Prevention (ATP) enhances traditional threat prevention by using inline deep learning models to detect and block advanced zero-day threats, including SQL injection, command injection, and XSS attacks.

With PAN-OS 11.x, ATP extends its detection capabilities to detect unknown exploits without relying on signature-based methods. This functionality is critical for protecting web servers in scenarios where a dedicated WAF is unavailable.

ATP provides the following benefits:

- \* Inline prevention of zero-day threats using deep learning models.
- \* Real-time detection of attacks like SQL injection and XSS.
- \* Enhanced protection for web server platforms like IIS.
- \* Full integration with the Palo Alto Networks Next-Generation Firewall (NGFW).
- \* Why not "Threat Prevention and PAN-OS 11.x" (Option A)? Threat Prevention relies primarily on signature-based detection for known threats. While it provides basic protection, it lacks the capability to block zero-day attacks using advanced methods like inline deep learning. For zero-day SQL injection and XSS attacks, Threat Prevention alone is insufficient.
- \* Why not "Threat Prevention, Advanced URL Filtering, and PAN-OS 10.2 (and higher)" (Option C)? While this combination includes Advanced URL Filtering (useful for blocking malicious URLs associated with exploits), it still relies on Threat Prevention, which is signature-based. This combination does not provide the zero-day protection needed for advanced injection attacks or XSS vulnerabilities.
- \* Why not "Advanced WildFire and PAN-OS 10.0 (and higher)" (Option D)? Advanced WildFire is focused on analyzing files and executables in a sandbox environment to identify malware. While it is excellent for identifying malware, it is not designed to provide inline prevention for web-based injection attacks or XSS exploits targeting web servers.

#### 47. Frage

What does Policy Optimizer allow a systems engineer to do for an NGFW?

- A. Identify Security policy rules with unused applications
- B. Recommend best practices on new policy creation
- C. Show unused licenses for Cloud-Delivered Security Services (CDSS) subscriptions and firewalls
- D. Act as a migration tool to import policies from third-party vendors

**Antwort: A**

Begründung:

Policy Optimizer is a feature designed to help administrators improve the efficiency and effectiveness of security policies on Palo Alto Networks Next-Generation Firewalls (NGFWs). It focuses on identifying unused or overly permissive policies to streamline and optimize the configuration.

\* Why "Identify Security policy rules with unused applications" (Correct Answer C)? Policy Optimizer provides visibility into existing security policies and identifies rules that have unused or outdated applications. For example:

- \* It can detect if a rule allows applications that are no longer in use.
- \* It can identify rules with excessive permissions, enabling administrators to refine them for better security and performance. By addressing these issues, Policy Optimizer helps reduce the attack surface and improves the overall manageability of the firewall.
- \* Why not "Recommend best practices on new policy creation" (Option A)? Policy Optimizer focuses on optimizing existing policies, not creating new ones. While best practices can be applied during policy refinement, recommending new policy creation is not its purpose.
- \* Why not "Show unused licenses for Cloud-Delivered Security Services (CDSS) subscriptions and firewalls" (Option B)? Policy Optimizer is not related to license management or tracking. Identifying unused licenses is outside the scope of its functionality.
- \* Why not "Act as a migration tool to import policies from third-party vendors" (Option D)? Policy Optimizer does not function as a migration tool. While Palo Alto Networks offers tools for third-party firewall migration, this is separate from the Policy Optimizer feature.

#### 48. Frage

In which two locations can a Best Practice Assessment (BPA) report be generated for review by a customer?  
(Choose two.)

- A. PANW Partner Portal
- B. Customer Support Portal
- C. Strata Cloud Manager (SCM)
- D. AIOps

**Antwort: C,D**

Begründung:

Step 1: Understand the Best Practice Assessment (BPA)

\* Purpose: The BPA assesses NGFW (e.g., PA-Series) and Panorama configurations against best practices, including Center for Internet Security (CIS) Critical Security Controls, to enhance security and feature adoption.

\* Process: Requires a Tech Support File (TSF) upload or telemetry data from onboarded devices to generate the report.

\* Evolution: Historically available via the Customer Support Portal, the BPA has transitioned to newer platforms like AIOps and Strata Cloud Manager.

"BPA measures security posture against best practices" ([paloaltonetworks.com](http://paloaltonetworks.com), Best Practice Assessment Overview).

Step 2: Evaluate Each Option

Option A: PANW Partner Portal

Description: The Palo Alto Networks Partner Portal is a platform for partners (e.g., resellers, distributors) to access tools, resources, and customer-related services.

BPA Capability:

Historically, partners could generate BPAs on behalf of customers via the Customer Success Portal (accessible through Partner Portal integration), but this was not a direct customer-facing feature.

As of July 17, 2023, the BPA generation capability in the Customer Support Portal and related partner tools was disabled, shifting focus to AIOps and Strata Cloud Manager.

Partners can assist customers with BPA generation but cannot directly generate reports for customer review in the Partner Portal itself; customers must access reports via their own interfaces (e.g., AIOps).

Verification:

"BPA transitioned to AIOps; Customer Support Portal access disabled after July 17, 2023" (live).

paloaltonetworks.com, BPA Transition Announcement, 07-10-2023).

No current documentation supports direct BPA generation in the Partner Portal for customer review.

Conclusion: Not a customer-accessible location for generating BPAs. Not Applicable.

Option B: Customer Support Portal

Description: The Customer Support Portal ([support.paloaltonetworks.com](https://support.paloaltonetworks.com)) provides customers with tools, case management, and historically, BPA generation.

BPA Capability:

Prior to July 17, 2023, customers could upload a TSF under "Tools > Best Practice Assessment" to generate a BPA report (HTML, XLSX, PDF formats).

Post-July 17, 2023, this functionality was deprecated in favor of AIOps and Strata Cloud Manager. Historical BPA data was maintained until December 31, 2023, but new report generation ceased.

As of March 08, 2025, the Customer Support Portal no longer supports BPA generation, though it remains a support hub.

Verification:

"TSF uploads for BPA in Customer Support Portal disabled after July 17, 2023" ([docs.paloaltonetworks.com/panorama/10-2/panorama-admin/panorama-best-practices](https://docs.paloaltonetworks.com/panorama/10-2/panorama-admin/panorama-best-practices)).

"Transition to AIOps for BPA generation" ([live.paloaltonetworks.com](https://live.paloaltonetworks.com), BPA Transition to AIOps, 07-10-2023).

Conclusion: No longer a valid location for BPA generation as of the current date. Not Applicable.

Option C: AIOps

Description: AIOps for NGFW is an AI-powered operations platform for managing Strata NGFWs and Panorama, offering real-time insights, telemetry-based monitoring, and BPA generation.

BPA Capability:

Supports two BPA generation methods:

On-Demand BPA: Customers upload a TSF (PAN-OS 9.1 or higher) via "Dashboards > On Demand BPA" to generate a report, even without telemetry or onboarding.

Continuous BPA: For onboarded devices with telemetry enabled (PAN-OS 10.0+), AIOps provides ongoing best practice assessments via the Best Practices dashboard.

Available in free and premium tiers; the free tier includes BPA generation.

Reports include detailed findings, remediation steps, and adoption summaries.

Use Case: Ideal for customers managing firewalls with or without full AIOps integration.

Verification:

"Generate on-demand BPA reports by uploading TSFs in AIOps" ([docs.paloaltonetworks.com/aiops/aiops-for-ngfw/dashboards/on-demand-bpa](https://docs.paloaltonetworks.com/aiops/aiops-for-ngfw/dashboards/on-demand-bpa)).

"AIOps Best Practices dashboard assesses configurations continuously" ([live.paloaltonetworks.com](https://live.paloaltonetworks.com), AIOps On-Demand BPA, 10-25-2022).

Conclusion: A current, customer-accessible location for BPA generation. Applicable.

Option D: Strata Cloud Manager (SCM)

Description: Strata Cloud Manager is a unified, AI-powered management interface for NGFWs and SASE, integrating AIOps, digital experience management, and configuration tools.

BPA Capability:

Supports on-demand BPA generation by uploading a TSF under "Dashboards > On Demand BPA," similar to AIOps, for devices not sending telemetry or not fully onboarded.

For onboarded devices, provides real-time best practice checks via the "Best Practices" dashboard, analyzing policies against Palo Alto Networks and CIS standards.

Available in Essentials (free) and Pro (paid) tiers; BPA generation is included in both.

Use Case: Offers a modern, centralized platform for customers to manage and assess security posture.

Verification:

"Run BPA directly from Strata Cloud Manager with TSF upload" ([docs.paloaltonetworks.com/strata-cloud-manager/dashboards/on-demand-bpa](https://docs.paloaltonetworks.com/strata-cloud-manager/dashboards/on-demand-bpa), 07-24-2024).

"Best Practices dashboard measures posture against guidance" ([paloaltonetworks.com](https://paloaltonetworks.com), Strata Cloud Manager Overview).

Conclusion: A current, customer-accessible location for BPA generation. Applicable.

Step 3: Select the Two Valid Locations

C (AIOps): Supports both on-demand (TSF upload) and continuous BPA generation, accessible to customers via the Palo Alto Networks hub.

D (Strata Cloud Manager): Provides identical on-demand BPA capabilities and real-time assessments, designed as a unified management interface.

Why Not A or B?

A (PANW Partner Portal): Partner-focused, not a direct customer tool for BPA generation.

B (Customer Support Portal): Deprecated for BPA generation post-July 17, 2023; no longer valid as of March 08, 2025.

Step 4: Verified References

AIOps BPA: "On-demand BPA in AIOps via TSF upload" ([docs.paloaltonetworks.com/aiops/aiops-for-ngfw](https://docs.paloaltonetworks.com/aiops/aiops-for-ngfw)

/dashboards/on-demand-bpa).

Strata Cloud Manager BPA: "Generate BPA reports in SCM" (docs.paloaltonetworks.com/strata-cloud- manager/dashboards/on-demand-bpa).

Customer Support Portal Transition: "BPA moved to AIOps/SCM; CSP access ended July 17, 2023" (live. paloaltonetworks.com, BPA Transition, 07-10-2023).

## 49. Frage

.....

Das Leben ist mit den Wahlen gefüllt. Wahl kann nicht unbedingt Ihnen das absolute Glück bringen, aber sie kann Ihnen viele Chancen bringen. Wenn Sie die Chance verpasst haben, können Sie nur bereuen. Die Fragenpool zur Palo Alto Networks PSE-Strata-Pro-24 Zertifizierungsprüfung von ZertPruefung sind die Grundbedarfsbedürfnisse für jeden Kandidaten. Mit ihr können Sie alle Probleme lösen. Die Fragenpool zur Palo Alto Networks PSE-Strata-Pro-24 Zertifizierungsprüfung von ZertPruefung sind umfassend und zielgerichtet, am schnellsten aktualisiert und die vollständigsten. Mit ZertPruefung brauchen Sie sich nicht mehr um die PSE-Strata-Pro-24 Zertifizierungsprüfung befürchten. Sie werden alle PSE-Strata-Pro-24 Prüfungen ganz mühlos bestehen.
