Pass Guaranteed 2026 Accurate UiPath UiPath-ABA Av1: UiPath Automation Business Analyst Associate Exam (2023.10) Test Topics Pdf

As we all know, the examination fees about UiPath-ABA Av1 exam test is too expensive, so many IT candidates want to get the most valid and useful UiPath-ABA Av1 study material and expect to pass the actual test at first attempt. ExamCost provide you with the latest UiPath-ABA Av1 exam prep study material which can ensure you 100% pass. The quality & service of UiPath-ABA Av1 exam dumps will give you a good shopping experience. The quality and quantities are controlled by strict standards. ExamCost has IT experts handling the latest IT information so as to adjust the outline for the exam dumps at the first time, thus to ensure the UiPath UiPath-ABA Av1 training exam cram shown front of you is the latest and most relevant.

UiPath Automation Business Analyst Associate Exam (2023.10) Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which document outlines the future state of the process and modules to be developed?

- A. Statement of Work (SOW)
- B. UAT Test Script
- C. Project Charter
- **D. Solution Design Document (SDD)**

Answer: D

Explanation:

The Solution Design Document (SDD) outlines the future state (To-Be) of the business process, including the detailed technical components and modules to be developed. It is a critical output of the Solution Design stage and serves as the blueprint for the development team.

The SDD includes:

- * Automation logic and flow diagrams
- * Breakdown of reusable modules
- * Exception handling logic
- * Integration and system interaction points
- * Technical configurations and assumptions

Prepared primarily by the Solution Architect, the SDD ensures that development follows a clear and consistent direction. It helps prevent misinterpretation of business requirements and facilitates better collaboration among developers, testers, and architects.

NEW QUESTION # 21

What is the role of the Automation Developer in the Automation Implementation Methodology?

- **A. Building automation workflows and resolving UAT defects**
- B. Performing business case validation
- C. Managing internal escalations
- D. Defining access and infrastructure needs

Answer: A

Explanation:

The Automation Developer is responsible for building the automation workflows in accordance with the Solution Design Document (SDD) and the Process Definition Document (PDD). Their work includes following UiPath best practices, ensuring reusability, scalability, and maintainability of code, and integrating various UiPath components like Studio, Orchestrator, and Document Understanding if needed.

In addition to development, the developer is also responsible for fixing any defects found during UAT, ensuring that the automation meets business requirements before being deployed to production. Throughout the development and Hypercare stages, they may also make improvements or handle minor changes based on stakeholder feedback.

The Automation Developer also plays a key communication role by keeping the project manager and solution architect informed of any blockers, changes, or risks. Their ability to transform business requirements into effective automation is critical to the project's success.

NEW QUESTION # 22

Which role is responsible for fixing any defects found during UAT?

- A. Business Analyst
- B. Infrastructure Engineer
- **C. Automation Developer**
- D. Solution Architect

Answer: C

Explanation:

During the User Acceptance Testing (UAT) stage, any defects or issues identified are addressed by the Automation Developer. This role is responsible for building the automation based on the agreed design and then making any required corrections based on UAT feedback.

The automation developer collaborates closely with the business analyst, solution architect, and project manager to ensure that the solution functions correctly in a production-like environment. If testers from the Client Team identify bugs or unexpected behavior, the developer investigates and applies fixes promptly.

Furthermore, the developer must also document changes, update stakeholders, and sometimes revise the test cases or SDD if significant adjustments are made. Their ability to respond quickly and effectively to UAT issues directly influences user confidence and the success of the production rollout.

NEW QUESTION # 23

Which of the following roles is primarily responsible for defining automation architecture and technical strategy?

- A. Business Analyst
- B. Infrastructure Engineer
- C. Solution Architect
- D. Project Manager

Answer: C

Explanation:

The Solution Architect is the primary role responsible for defining the automation architecture and technical strategy in a UiPath automation project. This includes choosing the right components (e.g., Studio, Orchestrator, attended vs. unattended bots), designing reusable modules, and ensuring scalability and maintainability.

They act as the technical leader, providing guidance to the development team and ensuring that the architecture adheres to best practices. The Solution Architect is also involved in every major stage - from Business Case Validation and Solution Design to UAT and Deployment - to maintain consistency and resolve any technical challenges.

Their expertise ensures that the automation is technically sound, aligns with infrastructure constraints, and integrates seamlessly into the client's existing ecosystem. They also play a key role in identifying technical risks and proposing solutions early in the project.

NEW QUESTION # 24

What is the responsibility of the Project Manager in the UiPath Automation Implementation Methodology?

- A. Coordinating implementation activities and managing risks
- B. Managing solution design and deployment
- C. Writing and approving code modules
- D. Providing infrastructure-related configurations

Answer: A

Explanation:

The Project Manager is responsible for coordinating all implementation activities and managing project risks, timelines, and resources throughout the automation lifecycle. They serve as the primary point of contact between the Client Team and the Implementation Team.

Their key responsibilities include:

- * Defining and tracking project schedules
- * Managing communication among stakeholders
- * Facilitating meetings and escalations
- * Handling changes in scope, resources, or timelines
- * Monitoring deliverables and ensuring quality

The Project Manager ensures that the team adheres to UiPath's methodology and that all phases - from Kickoff to Project Closure - are completed effectively. Their oversight ensures alignment, accountability, and timely delivery of the automation solution.

NEW QUESTION # 25

.....

It is very important for us to keep pace with the changeable world and update our knowledge if we want to get a good job, a higher standard of life and so on. First, we need to get a good UiPath-ABAAv1 quiz prep. Because we only pass UiPath-ABAAv1 exam and get a certificate, we can have the chance to get a decent job and make more money. But there are question is that how you can pass the UiPath-ABAAv1 Exam and get a certificate. The best answer is to download and learn our UiPath-ABAAv1 quiz torrent. Our products will help you get what you want in a short time.
