NEW QUESTION # 47

Which of the following is a benefit of an organization being and doing agile?

- A. Setting all tolerances to zero
- B. Faster time-to-market
- C. Focusing on completing tasks
- D. Using agile techniques

Answer: B

Explanation:

A primary benefit of an organization being and doing agile is faster time-to-market. Agile methods emphasize iterative delivery, frequent releases, and continuous feedback, enabling organizations to deliver value sooner and adapt quickly to changes. This benefit directly supports business agility and competitive advantage.

Using agile techniques alone (B) is a means, not a benefit. Focusing solely on tasks (C) ignores value and flow, and setting tolerances to zero (D) is neither practical nor encouraged.
