## Exams JN0-460 Torrent - JN0-460 Latest Test Report

Why do most people choose UpdateDumps? Because UpdateDumps could bring great convenience and applicable. It is well known that UpdateDumps provide excellent Juniper JN0-460 exam certification materials. Many candidates do not have the confidence to win Juniper JN0-460 Certification Exam, so you have to have UpdateDumps Juniper JN0-460 exam training materials. With it, you will be brimming with confidence, fully to do the exam preparation.

## Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Which statement is correct regarding the Mist UI?

- A. The Mist UI is used to distribute routes between your wireless and physical networks.
- B. The Mist UI is used by clients to connect to wireless networks.
- C. The Mist UI is used by cloud providers to provision VMs.
- D. The Mist UI is used to manage network devices.

**Answer: D**

Explanation:

The Mist UI (User Interface) is Juniper's cloud-based management platform used to manage both wired and wireless devices,

including EX, QFX, and SRX platforms.

It provides centralized visibility, configuration, analytics, and AI-driven insights for the entire enterprise network infrastructure.

WithinWired Assurance, the Mist UI enables device claiming, switch templates, configuration management, and SLE monitoring.

#### NEW QUESTION # 48

When deploying wired assurance, which of the following deployment options is best suited for a dynamic environment with frequent configuration changes?

- A. Fixed network architecture
- B. Manual switch configuration
- C. Template-based provisioning
- D. Static IP assignment

Answer: C

#### NEW QUESTION # 49

Which three parameters should be provided through DHCP when using ZTP during a Mist AI greenfield deployment? (Choose three.)

- A. IP address
- B. name server
- C. NTP server
- D. NETCONF

Answer: A,B,C

#### NEW QUESTION # 50

Which of the following are features of managing switches with MistAI Wired Assurance? (Select two)

- A. Automatic switch configuration rollback
- B. AI-driven insights for switch health
- C. Real-time gaming
- D. Manual switch discovery

Answer: A,B

#### NEW QUESTION # 51

A company has a Mist campus fabric with a single VRF and must configure group-based policy (GBP) tags to isolate different types of endpoints.

What would be an appropriate solution for this scenario?

- A. Assign a single GBP tag to all endpoints.
- B. Assign GBP tags based on endpoint location.
- C. Assign a separate GBP tag to each endpoint.
- D. Assign GBP tags based on endpoint type.

Answer: D

Explanation:

Juniper Mist AI for Wired uses group-based policy (GBP) to enforce segmentation within a single VRF, without requiring separate VRFs per user group. GBP tags classify endpoints logically (e.g., employees, guests, IoT devices) and enforce security rules across the EVPN-VXLAN fabric.

"Group-Based Policy (GBP) provides scalable segmentation by assigning tags to endpoints based on attributes such as user type, role, or device type. These GBP tags are then used in policies to control communication between groups." Option A is inefficient: assigning unique tags per endpoint is not scalable.

Option C is incorrect: GBP is identity-based segmentation, not location-based.

Option D is incorrect: assigning a single tag defeats the purpose of segmentation.

Option B is correct: the best practice is to assign GBP tags based on endpoint type (e.g., servers, staff, IoT, guests), which then drives policy enforcement.
