## Quiz Juniper - Efficient JN0-351 - Authorized Enterprise Routing and Switching, Specialist (JNCIS-ENT) Exam Dumps

You many attend many certificate exams but you unfortunately always fail in or the certificates you get can't play the rules you wants and help you a lot. So what certificate exam should you attend and what method should you use to let the certificate play its due rule? You should choose the test Juniper certification and buys our JN0-351 learning file to solve the problem. Passing the test JN0-351 certification can help you increase your wage and be promoted easily and buying our JN0-351 prep guide dump can help you pass the test smoothly. Our JN0-351 Certification material is closely linked with the test and the popular trend among the industries and provides all the information about the test. The answers and questions seize the vital points and are verified by the industry experts. Diversified functions can help you get an all-around preparation for the test. Our online customer service replies the clients' questions about our JN0-351 certification material at any time.

## Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q110-Q115):

### NEW QUESTION # 110

You have configured a GRE interface, but no traffic will flow.  
Referring to the exhibit, which statement is true?

□

- A. The source and destination addresses cannot have the same third octet.
- B. The IP subnet mask cannot be a /32.
- C. The unit number cannot be 0.
- D. The gr-1/2/0 interface is an invalid GRE interface.

**Answer: B**

#### NEW QUESTION # 111

What are two reasons for creating multiple areas in OSPF? (Choose two.)

- A. to increase the size of the LSDB
- **B. to reduce the convergence time**
- **C. to reduce LSA flooding across the network**
- D. to increase the number of adjacencies in the backbone

**Answer: B,C**

Explanation:

Explanation

Option A is correct. Creating multiple areas in OSPF can help to reduce the convergence time . This is because changes in one area do not affect other areas, so fewer routers need to run the SPF algorithm in response to a change.

Option D is correct. Creating multiple areas in OSPF can help to reduce Link State Advertisement (LSA) flooding across the network. This is because LSAs are not flooded out of their area of origin.

#### NEW QUESTION # 112

Which statement is correct about GRE tunnels?

- **A. The time-to-live field in the tunnel payload is decremented during transit.**
- B. There are 20 bytes of overhead with GRE encapsulation.
- C. GRE tunnels only support encapsulating non-IP traffic.
- D. GRE tunnels only support encapsulating IP traffic.

**Answer: A**

#### NEW QUESTION # 113

Which two statements are correct about using firewall filters on EX Series switches? (Choose two.)

- **A. You can apply firewall filters to both Layer 2 and Layer 3 traffic on an EX Series switch.**
- **B. You can deploy only stateless firewall filters on an EX Series switch.**
- C. You can only apply firewall filters to Layer 2 traffic on an EX Series switch.
- D. You can deploy both stateless and stateful firewall filters on an EX Series switch.

**Answer: A,B**

Explanation:

A is correct because you can deploy only stateless firewall filters on an EX Series switch. A stateless firewall filter is a filter that evaluates each packet individually based on the header information, such as source and destination addresses, protocol, and port numbers<sup>1</sup>. A stateless firewall filter does not keep track of the state or context of a packet flow, such as the sequence number, flags, or session information<sup>1</sup>. EX Series switches support only stateless firewall filters, which are also called access control lists (ACLs) or packet filters<sup>2</sup>.

C is correct because you can apply firewall filters to both Layer 2 and Layer 3 traffic on an EX Series switch. Layer 2 traffic is traffic that is switched within a VLAN or a bridge domain, while Layer 3 traffic is traffic that is routed between VLANs or networks<sup>3</sup>. EX Series switches support three types of firewall filters: port (Layer 2) firewall filters, VLAN firewall filters, and router (Layer 3) firewall filters<sup>4</sup>. You can apply these filters to different interfaces and directions to control the traffic entering or exiting the switch.

#### NEW QUESTION # 114

Based on the traceoptions output shown in the exhibit, what is the problem with the adjacency?

□

- **A. area mismatch**
- B. authentication mismatch

- C. connectivity
- D. MTU mismatch

**Answer: A**

## NEW QUESTION # 115

.....

Success in the JN0-351 test of the Juniper JN0-351 credential is essential in today's industry to verify the skills and get well-paying jobs in reputed firms around the whole globe. Earning the Enterprise Routing and Switching, Specialist (JNCIS-ENT) JN0-351 Certification sharpens your skills and helps you to accelerate your career in today's cut throat competition in the Juniper industry. It is not easy to clear the JN0-351 exam on the maiden attempt.
