## **Pass Guaranteed Quiz 2026 Microsoft High-quality Reliable MB-335 Exam Answers**

These Microsoft MB-335 exam questions have a high chance of coming in the actual Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert MB-335 test. You have to memorize these Microsoft MB-335 questions and you will pass the Microsoft MB-335 test with brilliant results. The price of Microsoft MB-335 updated exam dumps is affordable. You can try the free demo version of any Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert MB-335 exam dumps format before buying.

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q15-Q20):

### NEW QUESTION # 15

You are using the manufacturing execution module in Dynamics 365 Supply Chain Management. License plate labels must be printed for products in the Report as finished step. You need to use the manufacturing execution functionality that meets this requirement. What should you use?

- A. License plates
- **B. Job card device**
- C. Work templates
- D. Load planning workbench

**Answer: B**

Explanation:

The manufacturing execution functionality that meets the requirement of printing license plate labels for products in the Report as finished step is License plates. Here is the explanation:

License plates are unique identifiers that are assigned to containers, pallets, or individual items in inventory. License plates can be used to track and manage inventory throughout the warehouse processes, such as receiving, put away, picking, packing, and shipping<sup>1</sup>. License plates can also be used in production processes, such as reporting as finished and raw material picking<sup>2</sup>.

To print license plate labels for products in the Report as finished step, you must enable the Generate license plate option on the mobile device menu item that is used for reporting as finished<sup>2</sup>. You must also set up a document routing layout and a document routing for license plate labels<sup>3</sup>. When you use the mobile device to report a production order as finished, the system will generate a license plate for the finished product and print a license plate label to the specified printer<sup>2</sup>. The license plate label can include information such as the item number, batch number, quantity, and barcode of the finished product<sup>3</sup>.

1: License plates 2: Enable license plate label printing 3: Document routing label layouts

### NEW QUESTION # 16

A manufacturing company uses Dynamics 365 Supply Chain Management.

The shop floor has multiple pieces of the same model of equipment. The equipment produces a finished good that requires special handling.

The equipment has a visual guide available. The shop floor manager requires the following:

- \* The most recent visual guide must be available for all pieces of the equipment at the same time.
- \* The shop floor workers must have a visual guide available for handling of the finished good.

You need to configure the visual guides to meet the shop floor requirements.

What should you configure for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation:

### NEW QUESTION # 17

You are the lead product design manager at a Process manufacturing plant.

A formula that produces egg yolks as a by-product. This by-product is added back into inventory at standard cost and can be used in other production batches.

You need to select the by-product cost allocation.

Which cost allocation type should you use?

- A. Per series
- **B. Recycled**
- C. Percent
- D. Per quantity

**Answer: B**

### NEW QUESTION # 18

A discrete manufacturer uses the time and attendance registration for production operations.

All employees register daily clock in and clock out times during a 40-hour, Monday through Friday workweek.

Pay periods are every two weeks. Workers are paid hourly.

The production manager will create work schedules with the following windows:

- \* Mandatory work hours
- \* Work hours during which employees can leave early without accruing absences
- \* Work hours during which employees can work extra time

If a junior production worker works over 90 hours in a pay period, the worker will receive time and a half over 80 hours. If a senior production worker works over 90 hours in a pay period, the worker will receive double time over 80 hours.

You need to configure the system for these requirements.

Where should you configure this functionality? To answer, drag the appropriate forms to the correct requirements. Each form may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

To configure the system for these requirements, you should use the following forms:

\* Configure the overtime calculations: You should use the Workers form. This form allows you to set up and maintain information about workers, such as their personal details, employment status, and compensation<sup>1</sup>. You can also specify the overtime rate for each worker on the Time and attendance tab<sup>2</sup>. For example, you can set the overtime rate to 1.5 for junior production workers and 2 for senior production workers.

\* Configure the periods of time that a worker can choose whether to work: You should use the Flex groups form. This form allows you to set up and maintain flex groups, which are groups of workers who have flexible work hours<sup>3</sup>. You can also define flex profiles for each flex group, which specify the mandatory work hours, the flex time hours, and the extra time hours for each day of the week<sup>3</sup>. For example, you can create a flex profile that has mandatory work hours from 8:00 AM to 4:00 PM, flex time hours from 4:00 PM to 6:00 PM, and extra time hours from 6:00 PM to 8:00 PM.

1: Workers 2: Set up overtime rates 3: Flex groups : [Flex profiles]

### NEW QUESTION # 19

A manufacturing company is implementing Dynamics 365 Supply Chain Management.

Bill of materials (BOMs) must be calculated using standard cost principles.

Miscellaneous charges must be included in the unit cost price. The explosion mode must always be enforced as single level.

You need to configure the system to meet the requirements.

Which configuration should you enable for each requirement? To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation
