Material master data includes details such as descriptions, units of measure, and procurement types. The SAP Master Data Management Guide confirms this.

* Supplier (Option D): Suppliers are another critical type of master data. They represent vendors from whom goods or services are procured. Supplier master data includes information such as addresses, payment terms, and tax details. The same SAP Master Data Management Guide lists suppliers as master data.

* A. Supplier Invoice: Supplier invoices are transactional data, not master data. They represent financial postings related to supplier payments.
