## EAEP2201 Practice Exams Free & Exam EAEP2201 Dumps

Perhaps your ability cannot meet the requirement of a high salary job. So you cannot get the job because of lack of ability. You must really want to improve yourself. Now, our EAEP2201 exam questions can help you realize your dreams. Not only our EAEP2201 study braindumps can help you obtain the most helpful knowledge and skills to let you stand out by solving the problems the others can't, but also our EAEP2201 preparation guide can help you get the certification for sure.

Esri EAEP2201 Certification Exam is a comprehensive test that assesses a candidate's knowledge and skills in enterprise GIS administration. EAEP2201 exam consists of multiple-choice questions that cover a wide range of topics related to the administration of enterprise GIS systems. Candidates are required to demonstrate their proficiency in a variety of areas, such as configuring and managing ArcGIS Server, creating and managing geodatabases, and securing web services.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q38-Q43):

### NEW QUESTION # 38

An administrator needs to share content with a specific group of users. The administrator is concerned that several important applications will stop working for the users if they leave the group.

Which action should the administrator perform to prevent users from leaving the group?

- A. Change the role of the users
- B. Create an administrative group
- C. Create a group visible only to group members

**Answer: C**

### NEW QUESTION # 39

An organization is considering deploying ArcGIS Enterprise. A needs assessment shows that all users need access to the following applications and capabilities:

\* ArcGIS Pro

\* ArcGIS StoryMaps

\* View, edit and create portal content items

Which user type should be assigned for these users?

- A. GIS Professional
- B. Editor
- C. Creator

**Answer: A**

Explanation:

To meet the listed requirements, the appropriate user type is GIS Professional. This user type includes:

\* Access to ArcGIS Pro (essential for desktop GIS work and analysis)

\* Full content management and sharing privileges in the portal

\* Use of premium apps like ArcGIS StoryMaps, Experience Builder, and others. The Creator user type provides access to web-based apps and content but does not include ArcGIS Pro without an additional add-on license. The Editor user type is limited to viewing and editing existing data and does not support app creation or use of ArcGIS Pro.

Reference Source: ArcGIS Enterprise user type documentation - Application access matrix

### NEW QUESTION # 40

An ArcGIS Pro user receives the following error when trying to publish to ArcGIS Enterprise:

"Unable to publish to ArcGIS Server, error 001369: failed to create service" The ArcGIS Server logs reveal:

\* Failed to create service

\* Internal server error

\* Unable to instantiate class for XML schema type

\* Invalid XML registry file

\* 390 ArcSOC processes running

\* Server uses only half of available RAM

Which action should the administrator perform?

- A. Scale up the ArcGIS Server machine resources
- B. Use more dedicated instances instead of shared
- C. Increase the non-interactive desktop heap size

**Answer: C**

Explanation:

This issue is consistent with desktop heap exhaustion, especially when a high number of ArcSOC processes (e.g., 390) are running on Windows. Desktop heap is a limited memory resource used for GUI and system object management. When it runs out, services can fail to start and produce XML-related errors.

Increasing the non-interactive desktop heap size in the Windows registry resolves this.

From Esri documentation:

"If the Windows desktop heap size is too low, ArcGIS Server may be unable to create new processes (ArcSOC), causing service failures and related internal server errors."

\* Option B is a generic fix and won't address the specific heap exhaustion issue.

\* Option C doesn't help if the root issue is OS-level heap size limits.

Reference: ArcGIS Enterprise - ArcSOC process limits and Windows desktop heap size

#### NEW QUESTION # 41

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Run usage reports in Portal for ArcGIS to determine the effect on the organization.
- B. Open ArcGIS Server statistics to create a report for commonly used items.
- C. Use ArcGIS Monitor to capture desired information over a period of time in a report.

**Answer: A**

Explanation:

Portal for ArcGIS provides built-in usage reports that allow administrators to monitor how members are using, sharing, and contributing resources. These reports offer insights into content creation, usage patterns, and group activities. Administrators can generate and export these reports in tabular formats for further analysis.

ArcGIS Server statistics focus on service-level metrics and do not provide detailed user or group content statistics. ArcGIS Monitor captures system performance metrics but is not designed for detailed content usage analysis by users or groups.

Reference Source: ArcGIS Enterprise documentation on usage reports in Portal for ArcGIS.

#### NEW QUESTION # 42

Some members of an ArcGIS Enterprise organization are unable to create web maps and web scenes. The users are only responsible for creating stories with ArcGIS StoryMaps.

What should the GIS administrator do to prevent confusion about non-accessible functionality to those users?

- A. Configure Page visibility settings to remove web maps and web scenes from the navigation bar
- B. Configure a maintenance notification to explain the access limitation in Portal for ArcGIS
- C. Configure the ArcGIS Enterprise home page to show only items that are accessible to the signed-in user

**Answer: C**

Explanation:

To prevent confusion among users who do not have access to certain functionalities, such as creating web maps and web scenes, the GIS administrator should configure the ArcGIS Enterprise home page to display only the items and tools that are accessible to the signed-in user. This customization ensures that users see a tailored interface that aligns with their permissions and responsibilities, reducing the likelihood of encountering inaccessible options.

Configuring a maintenance notification (Option A) is more appropriate for temporary service outages or updates, not for managing user interface elements. Adjusting Page visibility settings (Option B) affects the visibility of entire pages but does not provide the granular control needed to tailor the home page based on user roles and permissions.

Reference Source: ArcGIS Enterprise documentation on customizing the home page and user experience

#### NEW QUESTION # 43

.....

In the era of rapid development in the IT industry, we have to look at those IT people with new eyes. They use their high-end technology to create many convenient places for us. And save a lot of manpower and material resources for the state and enterprises. And even reached unimaginable effect. Of course, their income must be very high. Do you want to be the kind of person? Do you envy them? Or you are also IT person, but you do not get this kind of success. Do not worry, Exam4Labs's Esri EAEP2201 Exam Material can help you to get what you want. To select Exam4Labs is equivalent to choose a success.
