질문 # 51

When you create a table report with filter groups, what is the logical relationship between filter groups?

- A. AND
- B. OR
- C. NOT

정답：**B**

설명：

* Filter Groups in Table ReportsWhen using filter groups in table reports, the logical relationship between the groups is "OR." This means the report includes data that matches any one of the filter groups.
* Explanation of Correct Answer
* Filter groups are designed to broaden the scope of a query by including records that satisfy at least one group of filters.
* The logical "OR" ensures inclusivity between groups, rather than restricting to matching all groups (which would be "AND").

질문 # 52

You need to create a chart of type Indicator: Numeric Point that displays the following output:
count of employees with the gender male divided by the count of employee with the gender female.
The chart can then be filtered for different departments. What calculation is required to create the metric?

- A. In Chart Builder, use a calculation of type: Restricted Measure.
- B. In Query Builder, use a calculated column.
- C. In Chart Builder, use a calculation of type: Calculated Measure.
- D. In Chart Builder, use a calculation of type: Aggregation.

정답：**C**

설명：

* Understanding the Chart Type
* Indicator: Numeric Point charts display a single numeric value based on a calculated metric.
* The desired output requires dividing the count of male employees by the count of female employees.
* Solution
* A Calculated Measure in Chart Builder is the appropriate method to perform this calculation within the context of the chart.
* Why Other Options are Incorrect
* A (Aggregation): Aggregation alone cannot handle the required calculation.
* B (Calculated Column): Calculated columns are created at the query level and are not specific to the chart.
* D (Restricted Measure): Restricted measures limit data based on conditions but do not perform calculations across dimensions.
