DP-600 Complete Exam Dumps, Reliable DP-600 Exam Camp

With the development of society, the DP-600 certificate in our career field becomes a necessity for developing the abilities. Passing the DP-600 and obtaining the certificate may be the fastest and most direct way to change your position and achieve your goal. And we are just right here to give you help. Being considered the most authentic brand in this career, our professional experts are making unremitting efforts to provide our customers the latest and valid Microsoft Certified exam simulation.

Microsoft Implementing Analytics Solutions Using Microsoft Fabric Sample Questions (Q120-Q125):

NEW QUESTION # 120

You have a Fabric tenant that contains JSON files in OneLake. The files have one billion items.

You plan to perform time series analysis of the items.

You need to transform the data, visualize the data to find insights, perform anomaly detection, and share the insights with other business users. The solution must meet the following requirements:

- Use parallel processing.
- Minimize the duplication of data.
- Minimize how long it takes to load the data.

What should you use to transform and visualize the data?

- A. a Microsoft Power BI report that uses core visuals
- **B. the PySpark library in a Fabric notebook**
- C. the pandas library in a Fabric notebook

Answer: B

Explanation:

PySpark provides robust capabilities for data transformation and manipulation, making it well- suited for preparing data for time series analysis. You can then use libraries like pandas for further data manipulation if needed and leverage Spark's machine learning capabilities for anomaly detection.

NEW QUESTION # 121

You have a Fabric tenant that contains a workspace named Workspace1. Workspace1 contains a warehouse named DW1. DW1 contains two tables named Employees and Sales. All users have read access to DW1.

You need to implement access controls to meet the following requirements:

- * For the Sales table, ensure that the users can see only the sales data from their respective region.
- * For the Employees table, restrict access to all Personally Identifiable Information (PII).
- * Maintain access to unrestricted data for all the users.

What should you use for each table? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐ Explanation:

☐

NEW QUESTION # 122

You have a Fabric tenant

You plan to create a data pipeline named Pipeline1. Pipeline1 will include two activities that will execute in sequence. You need to ensure that a failure of the first activity will NOT block the second activity. Which conditional path should you configure between the first activity and the second activity?

- A. Upon Skip
- B. Upon Success
- C. Upon Failure
- **D. Upon Completion**

Answer: D

Explanation:

Upon Success: downstream runs only if the first activity succeeds.

Upon Failure: downstream runs only if the first activity fails.

Upon Skip: downstream runs if the activity was skipped.

Upon Completion: downstream runs regardless of whether the first activity succeeded or failed.

Since we want the second activity to run even if the first fails, the correct answer is Upon Completion.

Reference: Pipeline activity dependencies in Fabric Data Factory

NEW QUESTION # 123

You have a Microsoft Power BI project that contains a file named definition.pbir. definition.pbir contains the following JSON.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

We are analyzing the JSON for definition.pbir in a Power BI Project:

```
{
  "version": "1.0",
  "datasetReference": {
    "byPath": {
      "path": "../Sales.Dataset"
    },
    "byConnection": null
  }
}
```

Statement 1:

"definition.pbir is in the PBIR-Legacy format."

No # The legacy PBIR format references datasets by byConnection (pointing to the Power BI service).

Here, it uses byPath, which is the new project format, not legacy.

Statement 2:

"The semantic model referenced by definition.pbir is located in the Power BI service." No # The JSON shows byPath:

"../Sales.Dataset", meaning the semantic model is referenced locally within the project folder (Sales.Dataset), not in the Power BI service.

Statement 3:

"When the related report is opened, Power BI Desktop will open the semantic model in full edit mode." Yes # Since the semantic model is referenced by path (local PBIP project files), Power BI Desktop will open the model in full edit mode. If it had been byConnection, it would open in live connect mode to the service instead.

Final Answer:

PBIR-Legacy format # No

Semantic model in Power BI service # No

Opens in full edit mode # Yes

References:

Power BI Project (PBIP) structure

PBIR formats: byPath vs byConnection

NEW QUESTION # 124

You have a Fabric tenant that contains a takehouse named lakehouse1. Lakehouse1 contains a Delta table named Customer.

When you query Customer, you discover that the query is slow to execute. You suspect that maintenance was NOT performed on the table.

You need to identify whether maintenance tasks were performed on Customer.

Solution: You run the following Spark SQL statement:

DESCRIBE HISTORY customer

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

Yes, the DESCRIBE HISTORY statement does meet the goal. It provides information on the history of operations, including maintenance tasks, performed on a Delta table. Reference = The functionality of the DESCRIBE HISTORY statement can be

verified in the Delta Lake documentation.

NEW QUESTION # 125

.....

Microsoft certifications have strong authority in this field and are recognized by all companies in most of companies in the whole world. DP-600 new test camp questions are the best choice for candidates who are determined to clear exam urgently. If you purchase our DP-600 New Test Camp questions to pass this exam, you will make a major step forward for relative certification. Also you can use our products pass the other exams.
