SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q47-Q52):

NEW QUESTION # 47
What is the correct release code for the second feature delivery in February 2025?

- A. 2025.2
- B. 0
- C. 2502.2
- D. 2025.2.2

Answer: C

Explanation:
The release code for SAP S/4HANA Cloud Public Edition follows the format YYYY.MM.X, where YYYY is the year, MM is the month, and X is the feature delivery number. The first feature delivery is always in February, and the second feature delivery is always in May. Therefore, the release code for the second feature delivery in February 2025 is 2502.2. NEW QUESTION # 48
When using the Local SAP S/4HANA Database Schema migration approach, what is the maximum file size?
Note: There are 2 correct answers to this question.

- A. 160 MB per ZIP file

- B. 160 MB per file
- C. 100 MB per ZIP file
- D. 100 MB per file

Answer: A,B

Explanation:
When using the Local SAP S/4HANA Database Schema migration approach, you can upload multiple XML files at once by using a ZIP file. The total maximum permitted size for the XML files in the ZIP file is 160 MB. The limit for the ZIP file is also 160 MB. Therefore, the maximum file size is 160 MB per ZIP file and
160 MB per file. References = SAP Help Portal - SAP Online Help, SAP Help Portal - SAP Online Help

NEW QUESTION # 49
Which type of testing should be done after a release upgrade has occurred?

- A. Integration tests
- B. String tests
- C. User Acceptance tests
- D. Regression tests

Answer: D

Explanation:
Regression tests are a type of testing that should be done after a release upgrade has occurred. Regression tests are performed to ensure that the existing functionality of the system is not affected by the changes introduced by the new release. Regression tests help to identify any defects or errors that may have been introduced or uncovered by the release upgrade. Regression tests are part of the quality assurance process and are essential for ensuring the stability and reliability of the system. NEW QUESTION # 50
Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?
Note: There are 2 correct answers to this question.

- A. Data marked for deletion is picked for execution.
- B. The process steps have been reordered.
- C. The test process failed the execution pre-check.
- D. An execution variant has not been maintained.

Answer: C,D

Explanation:
The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:
* An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it1.
* The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run2.
The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:
* Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system will ignore the data marked for deletion and use the available data for the test process3.
* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process4.
