ISO-45001-Lead-Auditor인증시험대비 공부자료, ISO-45001-Lead-Auditor 100% 시험패스 덤프문제

우리 Pass4Test에는 최신의 PECB ISO-45001-Lead-Auditor학습가이드가 있습니다. Pass4Test의 부지런한 IT전문가들이 자기만의 지식과 끊임없는 노력과 경험으로 최고의 PECB ISO-45001-Lead-Auditor합습자료로 PECB ISO-45001-Lead-Auditor인증시험을 응시하실 수 있습니다. PECB ISO-45001-Lead-Auditor인증시험은 IT업계에서의 비중은 아주 큼니다. 시험신청하시는 분들도 많아지고 또 많은 분들이 우리 Pass4Test의 PECB ISO-45001-Lead-Auditor자료로 시험을 패스했습니다. 이미 패스한 분들의 리뷰로 우리 Pass4Test의 제품의 중요함과 정확함을 증명하였습니다.

PECB ISO-45001-Lead-Auditor 시험요강:

주제	소개
주제 1	Conducting an ISO 45001 audit: This section of the exam measures the skills of Lead Auditors and covers the execution of an ISO 45001 audit. It focuses on gathering evidence, interviewing personnel, and assessing compliance with OHSMS requirements during the audit process.
주제 2	Domain 4: Preparing for an ISO 45001 audit: This section of the exam measures the skills of Audit Consultants and covers the preparation process for conducting an ISO 45001 audit. It emphasizes planning, resource allocation, and establishing audit objectives to ensure a thorough evaluation.

주제 3	Fundamental principles and concepts of an occupational health and safety management system: This section of the exam measures the skills of Health and Safety Managers and covers the essential principles and concepts underlying an occupational health and safety management system (OHSMS). It focuses on understanding the framework for managing health and safety risks to prevent workplace injuries and illnesses. One skill to be measured is identifying key components of an effective OHSMS.

최신 ISO 45001 ISO-45001-Lead-Auditor 무료샘플문제 (Q34-Q39):

질문 # 34

Worker's participation is a key factor for the success of OHSMS. Which three of the following ISO 45001 activities require workers' participation?

- A. Establishing OHS policy
- B. Determining what needs to be communicated
- C. Establishing OHS objectives
- D. Determining actions to eliminate hazards
- E. Determining competence requirements
- F. Managing internal audit programme

정답: A,C,D

설명:

Worker participation is a fundamental principle of ISO 45001 (Clause 5.4). It ensures workers at all levels are involved in key activities to enhance the OH&S management system's effectiveness.

Analysis of Options:

- * A. Determining competence requirements: Incorrect. Determining competence is primarily the responsibility of management, though workers may provide input.
- * B. Establishing OHS objectives: Correct. Worker involvement ensures objectives are realistic and relevant to workplace conditions (Clause 6.2).
- * C. Managing internal audit programme: Incorrect. Managing audits is typically a managerial responsibility, though workers may participate in audits.
- * D. Determining actions to eliminate hazards: Correct. Workers' insights are critical in identifying and implementing actions to eliminate hazards (Clause 8.1.2).
- * E. Determining what needs to be communicated: Incorrect. While communication strategies impact workers, their participation in determining communication needs is not explicitly required.
- * F. Establishing OHS policy: Correct. Workers should be involved in developing policies to ensure relevance and buy-in (Clause 5.2).

ISO References:

- * Clause 5.4: Worker participation.
- * Clause 6.2: OHS objectives.
- * Clause 8.1.2: Hierarchy of controls and hazard elimination.

질문 # 35

Like many other quality management systems, ISO 45001 uses what is known as a 'PDCA' circle. What do those initials stand for?

- A. Plan, Do, Check, Ask
- B. Plan, Deliver, Control, Achieve
- C. Plan, Do, Check, Act
- D. Prepare, Deliver, Control, Assess

정답: C

설명:

The PDCA (Plan-Do-Check-Act) model is a continuous improvement framework used in ISO 45001 and other management systems.

Plan: Establish objectives and processes to deliver results in line with the OH&S policy.

Do: Implement the processes.

Check: Monitor and measure processes against the policy, objectives, and requirements.

Act: Take actions to continually improve the system's performance.

Analysis of Options:

A . Plan, Do, Check, Act:

Correct. This is the standard PDCA cycle.

B . Plan, Do, Check, Ask:

Incorrect. "Ask" is not part of the cycle.

C . Plan, Deliver, Control, Achieve:

Incorrect. This is not the PDCA cycle.

D . Prepare, Deliver, Control, Assess:

Incorrect. This deviates from the PDCA framework.

ISO Reference:

Clause 0.3: PDCA model.

질문 # 36

You are conducting an ISO 45001 audit of Widgets Inc., an organization manufacturing machine parts for the aerospace industry. You find a short entry in the incident report file connecting a machine operator who suffered minor injury to his face four weeks ago when a small ribbon of metal hit him while operating his machine.

The subsequent investigation found that he was not wearing the required protective Personal Protective Equipment (PPE). He was subject to disciplinary action and warned that he would lose his job if it happened again.

Select two option of points of investigation which you would consider in order to determine conformity or nonconformity with clause 10.2 of ISO 45001.

- A. Establish whether the Incident Investigation determined the root cause of the Incident
- B. Interview the operator to check if he was wearing the correct PPE.
- C. Find out when the operator's machine was last subject to a maintenance programme.
- D. Check whether any corrective actions were taken to eliminate or reduce the risk of recurrence of the Incident.
- E. Determine whether the Health and Safety Authority was notified of the incident
- F. find out whether the operator was sent to the hospital.

정답: A,D

설명:

Clause 10.2 of ISO 45001 requires organizations to investigate incidents, determine root causes, and implement corrective actions to prevent recurrence.

Analysis of Options:

A . Check whether corrective actions were taken.

This directly relates to the requirement to implement corrective actions to address the identified risks and hazards. Failure to do so would indicate nonconformity.

B . Determine whether the Health and Safety Authority was notified.

Notification is a legal requirement in certain jurisdictions, but it is not explicitly required under ISO 45001 unless the legal context demands it.

C . Establish whether the root cause was determined.

Root cause analysis is fundamental for effective corrective action. Without this, corrective measures may not address the underlying problem.

D . Find out when the operator's machine was last subject to maintenance.

While maintenance is important, it does not directly address the incident's nonconformity.

E . Find out whether the operator was sent to the hospital.

Sending the operator to the hospital is a reactive step and not relevant to compliance with Clause 10.2.

F . Interview the operator about PPE usage.

This is relevant but insufficient for determining compliance with Clause 10.2.

ISO Reference:

Clause 10.2: Investigation of incidents, determination of causes, and implementation of corrective actions.

Clause 8.1.2: Hierarchy of controls and risk reduction.

질문 # 37

Consider the emergency preparedness and response process outlined in ISO 45001. Match each process activity to the correct stage of the PDCA cycle.

To complete the table click on the blank section you want to complete so it is highlighted in red and then click on the applicable text

from the options the appropriate process."

Emergency Preparedness and Response Activity	PDCA Stage
Develop an emergency response plan	
Conduct emergency drill responses	
Evaluate the performance of the planned response	
Update the emergency response plan	

Plan

Do

Check

Act

정답:

설명:

Emergency Preparedness and Response Activity	PDCA Stage

Act

질문 # 38

Which two of the following are examples of audit objectives for the audit team?

- A. To improve overall health and safety performance.
- B. To minimise risk resulting from the audit process.
- C. To reduce instances of injury and ill health.

- D. To implement any necessary corrective action.
- E. To complete the audit on time.

정답: B,E

설명:

Audit objectives for the audit team focus on ensuring the audit process is executed effectively, efficiently, and without causing undue disruption to the organization being audited. ISO 19011:2018 provides guidance on setting audit objectives.

Analysis of Options:

A . To reduce instances of injury and ill health:

Incorrect. This is an objective of the OH&S management system, not of the audit itself.

B . To minimise risk resulting from the audit process:

Correct. ISO 19011 emphasizes managing risks to the auditee and the audit process during audits (Clause 5.4).

C . To improve overall health and safety performance:

Incorrect. Improving health and safety performance is an outcome of the OH&S management system, not the audit team's objective.

D . To complete the audit on time:

Correct. Ensuring timely completion of the audit aligns with effective audit management.

E . To implement any necessary corrective action:

Incorrect. Implementing corrective actions is the auditee's responsibility, not the audit team's.

Reference:

ISO 45001:2018:

Clause 5.4: Worker consultation and participation.

Clause 6.2: OH&S objectives and planning.

Clause 8.1.2: Hierarchy of controls and worker involvement.

ISO 19011:2018: Guidelines for auditing management systems.
