Viel Zeit und Geld auszugeben ist nicht so gut als eine richtige Methode auszuwählen. Wenn Sie jetzt auf die CIPS L5M10 Prüfung vorbereiten, dann ist die Software, die vom Team der DeutschPrüfung hergestellt wird, ist Ihre beste Wahl. Unser Ziel ist sehr einfach, dass Sie die CIPS L5M10 Prüfung bestehen. Wenn das Ziel nicht erreicht wird, bieten wir Ihnen volle Rückerstattung, um ein Teil Ihres Verlustes zu kompensieren. Bitte glauben Sie unsere Herzlichkeit! Wir wünschen Ihnen viel Glück beim Test der CIPS L5M10!

CIPS L5M10 Prüfungsplan:

Thema	Einzelheiten

Thema 1	• Analyse the Role and Activities of Logistics Management: This section of the exam measures the skills of Logistics Managers and covers the essential concepts, functions, and strategic importance of logistics within modern supply chains. It explains what logistics is, how its key elements work together—such as transportation, warehousing, inventory, packaging, information flow, and security—and how these components support procurement, production, distribution, after-sales processes, and product disposal. The section explores how logistics integrates with broader supply chain management and introduces the idea of total logistics and total cost thinking, showing how multimodal transport and pipeline inventory contribute to efficiency. Candidates must understand how logistics creates competitive advantage by aligning operations with business strategy, managing customer service levels, measuring service quality, and recognizing its financial impact. This heading also evaluates the increasing role of technology in logistics, including barcoding, RFID, e-fulfilment systems, warehouse management systems, automated data capture, and the integration of digital tools across the logistics network.
Thema 2	• Understand Capacity Planning and Control in Logistics Management: This section of the exam measures the skills of Operations Planners and focuses on the techniques and systems used to manage capacity, demand, and resource planning across logistics activities. It explains how organizations balance planning with real-time control, adjust to fluctuating demand, and schedule workloads effectively. Candidates are expected to understand capacity concepts, constraints, demand forecasting, capacity measurement, and different planning approaches such as level planning, chase demand strategies, and demand management methods. The section also examines the use of technology in capacity planning, particularly Materials Requirements Planning (MRP), MRP II, ERP systems, master production scheduling, inventory data, and bills of materials, while recognizing the limitations of these tools. Finally, it covers the role of reverse logistics, emphasizing the handling of customer returns, the development of return policies, and how returned items are reintegrated into the supply chain.

Die neuesten L5M10 echte Prüfungsfragen, CIPS L5M10 originale fragen

Tun Sie, was Sie gesagt haben, was Beginn des Erfolgs ist. Weil Sie die schwierige IT-Zertifizierungsprüfung ablegen wollen, sollen Sie sich bemühen, um das Zertifikat zu bekommen. Die Fragenkataloge zur CIPS L5M10 Prüfung von DeutschPrüfung sind sehr gut. Mit Ihr können Sie Ihren Erfolg ganz leicht erzielen. Sie sind ganz zuverlässig. Ich glaube, Sie werden die Prüfung 100% bestehen.

CIPS Logistics Management L5M10 Prüfungsfragen mit Lösungen (Q65-Q70):

65. Frage

Harry is a Project Manager at a logistics organisation and is planning long-term for the development of his department. Harry should focus his strategic long-term plan on control measures that should be put in place. Is this true?

- A. No - Harry should focus on contingencies at the strategic planning stage
- B. Yes - control is the process adopted by an organisation to cope with changes in plans
- **C. No - strategic plans have little emphasis on control measures and focus on resource requirements**
- D. Yes - control measures should be considered as part of all plans

Antwort: C

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

In long-term (strategic) planning, the emphasis is on direction and resource requirements, with little emphasis on detailed control measures; contingency details are typically considered at tactical/mid-term levels. (CIPS L5M10 Study Guide, p. 104)

66. Frage

Jolie is a Warehouse Manager proposing a Warehouse Management System (WMS). Which of the following are advantages of

using a WMS? Select THREE.

- **A. It can reduce labour costs**
- **B. It will provide real-time information**
- C. It will lead to further orders from online retailers
- D. It will develop a push-based supply chain
- **E. Inventory accuracy will be improved**

Antwort: A,B,E

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

AWMS improves inventory accuracy, offers real-time tracking, and reduces labour costs via automation. It supports pull-based systems (demand-driven), not push, and does not guarantee new business.

(Reference: CIPS L5M10 Study Guide, Warehouse management technology benefits, p. 90)

67. Frage

Select from the following list the example of reverse logistics.

- **A. A retail outlet returns faulty goods to the manufacturer**
- B. A distribution centre sends goods to several retail units using the same delivery truck
- C. A supplier provides an additional delivery of items to the buyer
- D. The manufacturer sends completed goods to the customer

Antwort: A

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

Reverse logistics involves goods moving upstream in the supply chain-typically from customers back to the manufacturer or supplier-for return, repair, reuse, or recycling. Returning faulty goods to a manufacturer is a textbook example.

(Reference: CIPS L5M10 Study Guide, Reverse logistics definition and examples, p. 189)

68. Frage

Demand for a product can be classified as either dependent or independent. Which of the following companies produces a dependent demand item?

- **A. A company that produces tyres for cars**
- B. A dairy farm producing organic milk
- C. An online clothing retailer
- D. An ice cream van operating from April to September

Antwort: A

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

Dependent demand refers to items whose demand is directly derived from another product's production-e.

g., tyres depend on car production volumes. In contrast, demand for end products such as ice cream or clothing is independent, influenced by consumer behaviour rather than other production outputs.

(Reference: CIPS L5M10 Study Guide, Dependent vs. independent demand concepts, p. 114)

69. Frage

Green Frog Ltd is a consultancy with ~50 customers. The CEO plans to use a Cost-to-Serve (CTS) tool to understand customer profitability. Is this the right approach?

- A. Yes - it is expensive but provides high visibility
- **B. Yes - Cost to Serve will allow identification of unprofitable customers**
- C. No - use Total Cost of Ownership (TCO) instead
- D. No - all customers are equally profitable if they pay the same rates

Antwort: B

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

Cost-to-Serve analyses end-to-end activities and resources consumed to serve specific customers or segments, exposing variation in profitability (e.g., delivery distance, visit frequency, handling complexity). It is appropriate for finding unprofitable customers. CTS is not inherently "expensive," and TCO focuses on lifecycle cost of acquiring/owning goods-not customer profitability. (Reference: CIPS L5M10 Study Guide, Cost-to-Serve concept and uses, p. 61)

70. Frage
