当社の製品を使用したこれらの人々は、C-ACDET-2506学習教材を高く評価しています。製品を購入して真剣に検討することを決めた場合、簡単に試験に合格し、短時間でC-ACDET-2506認定を取得することが非常に簡単になります。また、お客様の夢の実現をお手伝いします。ここで、C-ACDET-2506学習教材を紹介する機会をください。私たちの紹介に貴重な時間を費やした後悔はありません。また、C-ACDET-2506学習クイズは手頃な価格であるため、過剰に請求されることはありません。

SAP C-ACDET-2506 認定試験の出題範囲:

トピック	出題範囲
トピック 1	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
トピック 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
トピック 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

高品質なC-ACDET-2506試験情報試験-試験の準備方法-権威のあるC-ACDET-2506試験勉強過去問

我々CertShikenのSAPのC-ACDET-2506試験のソフトウェアを使用し、あなたはSAPのC-ACDET-2506試験に合格することができます。あなたが本当にそれぞれの質問を把握するように、あなたが適切なトレーニングと詳細な分析を得ることができますから。購入してから一年間のSAPのC-ACDET-2506ソフトの無料更新はあなたにいつも最新の試験の知識を持たせることができます。だから、こんなに保障がある復習ソフトはあなたにSAPのC-ACDET-2506試験を心配させていません。

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite 認定 C-ACDET-2506 試験問題 (Q42-Q47):

質問 # 42

A customer requests a dynamic list from CSV.
Which field type supports that?

- A. Single-Select Enum
- B. Computed Field
- **C. Flex Master Data-based field**
- D. Hyperlink

正解: C

質問 # 43

Which of the following languages is used to define defaults on fields within SAP Ariba?

- A. JavaScript
- B. Python
- **C. Ariba expression language**
- D. ABAP

正解: C

解説:

SAP Ariba uses its proprietary Ariba expression language, based on OGNL (Object-Graph Navigation Language), to define default value expressions on fields. This language supports logical conditions, comparisons, and public Java method calls to create dynamic defaulting logic. ABAP, Python, and JavaScript are not supported languages for field default expressions in SAP Ariba. This expression language provides a concise and powerful way to tailor defaults based on context.

質問 # 44

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- **A. Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting.**
- B. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.
- C. All standard fields are reportable by default.
- D. The system makes all fields reportable after a system refresh.

正解: A

解説:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. Therecommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

質問 # 45

You want to apply a preset filter to a custom field so that it only shows valid values based on the value of another field. What do you use to apply predefined filter criteria for a field?

- A. Enable field property "Use relationship chooser" in the Advanced tab
- B. Define a Visibility Condition in the Conditions tab
- **C. Populate the "Relation Name" and "NameTableConstraintFieldPath" in the Advanced tab**
- D. Load Relation types and Relation entries
- E. Enable field property "Enable for Template Field Setter" in the Advanced tab

正解: C

質問 # 46

How can you define default values on fields?

- A. Default values must be manually entered by the user
- **B. Set as Constants or Expressions based on other field values**
- C. Default values are not permitted
- D. Set only for Constant values

正解: B

質問 # 47
