

Three Formats of Latest Cisco 300-415 Practice Material

C.

Section	Parameter	Type	Variable/value
Basic configuration	VPN	Global	512
	Name	Global	Management VPN
IPv4 Route	Prefix	Global	0.0.0.0/0
	Gateway	Radio button	Next Hop
	Next Hop	Device Specific	vpn512_mgt_next_hop_ip_addr

D.

Section	Parameter	Type	Variable/value
Basic configuration	Shutdown	Device Specific	vpn1_lan_int2_shutdown
	Interface Name	Device Specific	vpn1_lan_int2_gex/x
IPv4 configuration	Description	Device Specific	vpn1_lan_int2_description
	IPv4 Address	Radio button	Static
	IPv4 Address	Device Specific	vpn1_lan_int2_ip_addr/maskbits

Our 300-415 exam questions have been expanded capabilities through partnership with a network of reliable local companies in distribution, software and product referencing for a better development. That helping you pass the 300-415 exam with our 300-415 latest question successfully has been given priority to our agenda. The 300-415 Test Guide offer a variety of learning modes for users to choose from: PDF version, Soft version and APP version. We believe that our 300-415 exam questions can be excellent beyond your expectation.

Upon passing the Cisco 300-415 Exam, candidates will receive a Cisco Certified Specialist – SD-WAN Implementation certification, which is a valuable asset for network engineers and administrators seeking to advance their careers. Implementing Cisco SD-WAN Solutions certification demonstrates that the candidate has the knowledge and skills required to implement and manage Cisco SD-WAN solutions and is recognized by employers worldwide.

There are three different versions provided by our company. Every version is very convenient and practical. The three different versions of our 300-415 study torrent have different function. We believe that you must find the version that is suitable for you. Now I am willing to show you the special function of the PDF version of 300-415 test torrent. If you prefer to read paper materials rather than learning on computers, the PDF version of our Implementing Cisco SD-WAN Solutions guide torrent must be the best choice for you. Because the study materials on the PDF version are printable, you can download our 300-415 study torrent by the PDF version and print it on papers. We believe that it will be very helpful for you to protect your eyes. In addition, the PDF version also has many other special functions. If you use the PDF version of our 300-415 test torrent, you will find more special function about the PDF version.

Cisco Implementing Cisco SD-WAN Solutions Sample Questions (Q67-Q72):

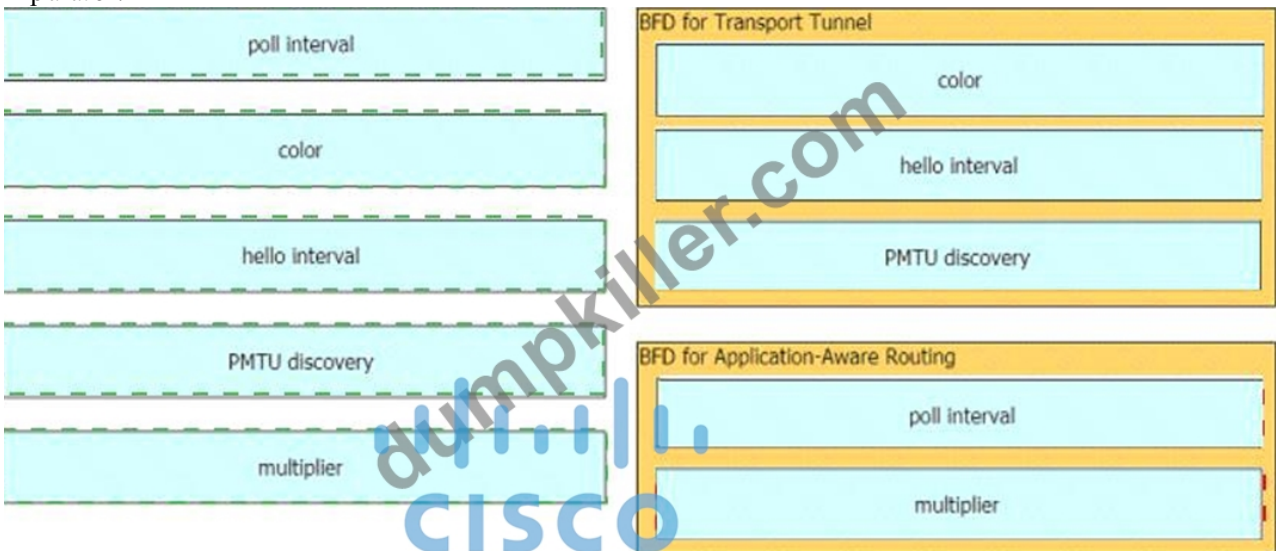

NEW QUESTION # 67

Drag and drop the BFD parameters from the left onto the BFD configurations on the right.

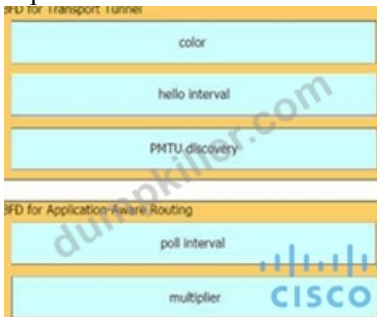

Answer:

Explanation:

Explanation

NEW QUESTION # 68

Which type of service provider is responsible for secure, private connections between data centers, access regions, and cloud providers in Cisco SD-WAN Multi-Region Fabric?

- A. middle-mile network providers
- B. distributed network providers
- C. last-mile network providers
- D. first-mile network providers

Answer: A

NEW QUESTION # 69

Which two WAN Edge devices should be deployed in a cloud? (Choose two.)

- A. vEdge 100wm
- B. vEdge 5000v
- C. ASR 1000v
- **D. vEdge cloud**
- **E. CSR 1000v**

Answer: D,E

Explanation:

2. Virtual platforms

- Cloud Services Router (CSR) 1000v running IOS XE SD-WAN Software
- vEdge Cloud Router running Viptela OS

NEW QUESTION # 70

An engineer must configure two branch WAN Edge devices where an Internet connection is available and the controllers are in the headquarters. The requirement is to have IPsec VPN tunnels established between the same colors. Which configuration meets the requirement on both WAN Edge devices?

```
WAN Edge 1
vpn 0
interface ge0/0
ip address 10.0.0.1/24
ipv6 dhcp-client
tunnel-interface
color biz-internet restrict
encapsulation ipsec

WAN Edge 2
vpn 0
interface ge0/0
ip address 10.0.0.2/24
ipv6 dhcp-client
tunnel-interface
color default
encapsulation ipsec
```

```
WAN Edge 1

vpn 0
interface ge0/0
ip address 10.0.0.1/24
ipv6 dhcp-client
tunnel-interface
color default
encapsulation ipsec

WAN Edge 2

vpn 0
interface ge0/0
ip address 10.0.0.2/24
ipv6 dhcp-client
tunnel-interface
color default
encapsulation ipsec
```

WAN Edge 1

```
vpn 0
interface ge0/0
ip address 10.0.0.1/24
ipv6 dhcp-client
tunnel-interface
color public-internet restrict
encapsulation ipsec
```

WAN Edge 2

```
vpn 0
interface ge0/0
ip address 10.0.0.2/24
ipv6 dhcp-client
tunnel-interface
color gold restrict
encapsulation ipsec
```

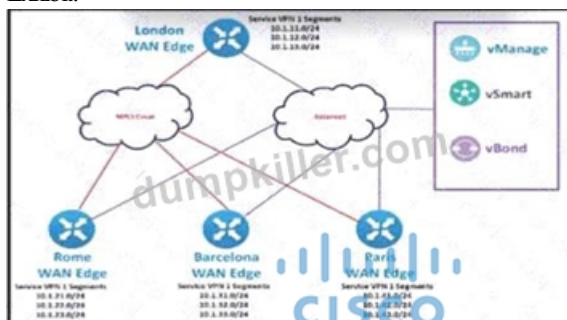

- A. Option B
- B. Option A
- C. Option D
- D. Option C

Answer: C

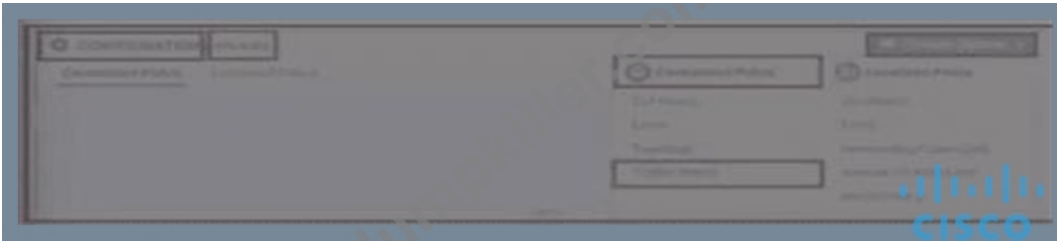

NEW QUESTION # 71

Exhibit.

The SD-WAN network is configured with a default full-mesh topology. An engineer wants Barcelona and Paris to communicate to

each other through the London site using a control Which control policy configuration accomplishes the task?

- A. 
- B. 
- C. 
- D. 

Answer: B

Explanation:

To achieve communication between Barcelona and Paris through the London site, a control policy needs to be configured to force traffic from these two sites to pass through the London site. This setup involves manipulating the routing information such that London becomes a transit hub for traffic between Barcelona and Paris.

Understanding the Policy Requirements:

Centralized Policy: This type of policy is applied at the controller level and affects multiple devices in the SD-WAN fabric. It allows the control of routing behavior across the entire network.

Route Policy: Specifically, a route policy will be used to set the preferred path for traffic between sites, ensuring that it passes through London.

Option Analysis:

Option A: Shows the configuration of a centralized policy with a focus on route policy, which is necessary to achieve the desired traffic flow manipulation.

Other Options: Do not provide the necessary centralized policy or route policy configurations that are needed to control the routing paths between the sites.

Configuration Details:

Centralized Policy: Define the policy under the centralized policy section in the vManage GUI.

Route Policy: Create and apply a route policy that specifies the desired routing behavior for traffic between Barcelona and Paris, ensuring it routes through London.
