What member of the Consolidation dimension represents the aggregated value before proportionalization and elimination?

- A. FCCS Entity Total
- B. FCCS Entity Consolidation
- C. FCCS TotalInput And Adisuted
- D. FCCS Contribution

Answer: B

The member of the Consolidation dimension that represents the aggregated value before proportionalization and elimination is FCCS Entity Consolidation. This is the member that shows the data for each entity after currency translation but before applying ownership percentage, intercompany eliminations, or adjustments. It is also the member where input data for parent entities is stored. FCCS Total Input And Adjusted is also a member of the Account dimension, not the Consolidation dimension. It is used to aggregate data from input accounts and adjustment accounts.
