When should you run Digital Discovery Assessments of an SAP S/4HANA Cloud Public Edition implementation project?

- A. After each upgrade
- B. After the Realize phase
- C. During the Deployment phase
- D. During the Discover phase

Answer: D

Explanation:

The Digital Discovery Assessment (DDA) is a strategic tool used early in the SAP S/4HANA Cloud Public Edition implementation to align customer requirements with SAP capabilities and plan the project effectively.

* Option A: After each upgradeIncorrect. DDAs are not used post-upgrade, as they focus on initial project planning. TheSAP S/4HANA Cloud Implementation Guidestates, "The Digital Discovery Assessment is a pre-implementation tool, not used for post-upgrade evaluations, which rely on testing and monitoring."

* Option B: After the Realize phaseIncorrect. The Realize phase focuses on configuration and testing, not discovery. TheSAP Activate Methodology Guidenotes, "The DDA is conducted before the implementation begins, not after the Realize phase, which is for solution build and validation."

* Option C: During the Discover phaseCorrect. The DDA is run during the Discover phase to assess requirements and define the project scope. TheSAP S/4HANA Cloud Implementation Guideexplains, "The DigitalDiscovery Assessment is conducted during the Discover phase to capture customer requirements, integration needs, and project timelines, forming the foundation for the implementation."

* Option D: During the Deployment phaseIncorrect. The Deploy phase focuses on go-live and cutover, not discovery activities. TheSAP S/4HANA Cloud Study Guideclarifies, "The Deploy phase is for system activation, not for running assessments like the DDA, which occurs pre-project." Extract from Official Documentation:

NEW QUESTION # 68

In the SAP Activate run phase the new system is monitored, maintained, and optimized to ensure it runs smoothly and efficiently. Which change management activity can only be realized in the run phase of the cloud implementation?

- A. Mapping of SAP roles to employees
- B. Conduction of a pulse check
- C. Development of the user adoption strategy
- **D. Measurement of actual user adoption metrics**

Answer: D

Explanation:

The Run phase of the SAP Activate methodology focuses on operating, monitoring, and optimizing the SAP S/4HANA Cloud Public Edition system post-go-live. Certain change management activities are unique to this phase due to their reliance on live system usage.

* Option A: Mapping of SAP roles to employees Incorrect. Role mapping occurs in the Explore or Realize phases, when business roles are aligned with employee responsibilities. The SAP S/4HANA Cloud Security Guide states, "Role mapping is completed pre-go-live to ensure users have appropriate access upon system activation."

* Option B: Development of the user adoption strategy Incorrect. The user adoption strategy is developed in the Prepare or Explore phases to guide change management efforts. The SAP S/4HANA Cloud OCM Guide notes, "The user adoption strategy is defined early in the project to drive effective change management throughout the implementation."

* Option C: Measurement of actual user adoption metrics Correct. Measuring actual user adoption metrics, such as system usage or process adherence, can only occur in the Run phase when the system is live and users are actively engaging with it. The SAP Activate Methodology Guide explains, "In the Run phase, change management includes measuring actual user adoption metrics to assess the effectiveness of adoption efforts and identify areas for improvement."

* Option D: Conduction of a pulse check Incorrect. Pulse checks, which gauge stakeholder sentiment, can be conducted in multiple phases, including Prepare and Explore, to monitor change readiness. The SAP OCM Guide clarifies, "Pulse checks are performed throughout the project lifecycle to assess stakeholder engagement, not exclusively in the Run phase." Extract from Official Documentation:

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "The Run phase includes unique change management activities such as measuring actual user adoption metrics, which rely on live system data to evaluate the success of adoption initiatives."

* SAP S/4HANA Cloud OCM Guide (SAP Help Portal, <https://help.sap.com>): "Measuring user adoption metrics is a Run phase activity that assesses how effectively users are engaging with the SAP S/4HANA Cloud system, enabling targeted optimization efforts."

Additional Context:

Measuring user adoption metrics in the Run phase provides actionable insights into system usage, helping organizations refine training, address resistance, and maximize ROI. This activity is unique to the post-go-live environment, distinguishing it from planning or preparatory change management tasks.
