FCSS_LED_AR-7.6 Fortinet FCSS - LAN Edge 7.6 Architect Exam Summary	
Exam Name	Fortinet FCSS - LAN Edge 7.6 Architect
Exam Number	FCSS_LED_AR-7.6 LAN Edge Architect
Exam Price	\$200 USD
Duration	75 minutes
Number of Questions	40
Passing Score	Pass / Fail
Recommended Training	LAN Edge Architect
Exam Registration	PEARSON VUE
Sample Questions	Fortinet FCSS_LED_AR-7.6 Sample Questions
Practice Exam	Fortinet Certified Solution Specialist - Network Security Practice Test

Topics covered in the Fortinet LAN Edge Architect FCSS_LED_AR-7.6 Exam	
Section	Objectives
Authentication	- Configure advanced user authentication and authorization scenarios using RADIUS and LDAP - Implement two-factor authentication using digital certificates - Configure syslog on FortiAuthenticator - Configure RADIUS single sign-on (SSO) on FortiAuthenticator
Central management	- Manage FortiSwitch using FortiManager over FortiLink - Implement and deploy zero-touch provisioning - Configure VLANs, ports, and trunks on FortiSwitch - Configure FortiExtender and FortiAP
Zero-trust LAN access	- Implement machine authentication, MAC Authentication Bypass (MAB), and NAC policies to secure wireless networks - Deploy a guest portal - Explain advanced solutions in LAN edge: FortiLink NAC, dynamic VLAN, and VLAN pooling

FCSS_LED_AR-7.6 LAN Edge Architect Sample Questions 2

最も専門的な専門家によって編集された当社のFortinet練習資料は、成功のために高品質で正確なFCSS_LED_AR-7.6練習資料を提供します。これまで、Fortinet試験トレントをサポートする世界中の何万人ものお客様がいます。FCSS_LED_AR-7.6学習教材に不慣れな場合は、参考のために無料のデモをダウンロードしてください。また、一部の未学習の試験受験者には、Fortinet実践教材で必要事項をすぐにマスターできます。

Fortinet FCSS_LED_AR-7.6 認定試験の出題範囲：

トピック	出題範囲
トピック 1	● 集中管理: このセクションでは、FortiLink 経由の FortiManager による FortiSwitch の管理、ゼロタッチプロビジョニングの実装、VLAN、ポート、トランクの構成、FortiExtender および FortiAP デバイスのセットアップについて説明します。
トピック 2	● 監視とトラブルシューティング: このセクションでは、検疫メカニズムの構成、FortiAIOps の管理、FortiSwitch および FortiAP との FortiGate 通信のトラブルシューティング、ワイヤレス接続の監視ツールの使用について説明します。

トピック 3	ゼロトラスト LAN アクセス: このドメインでは、マシン認証、MAC 認証バイパス、ワイヤレス セキュリティの NAC ポリシー、ゲスト ポータルの展開、FortiLink NAC、ダイナミック VLAN、VLAN プーリングなどの高度なソリューションについて説明します。
トピック 4	認証: このドメインでは、RADIUS および LDAP を使用した高度なユーザー認証、デジタル証明書を使用した 2 要素認証、FortiAuthenticator での syslog および RADIUS シングル サインオンの構成について説明します。

FCSS_LED_AR-7.6資格準備 & FCSS_LED_AR-7.6技術試験

人によって目標が違いますが、あなたにFortinet FCSS_LED_AR-7.6試験に順調に合格できるのは我々の共同の目標です。この目標の達成はあなたがIT技術領域へ行く更なる発展の一步ですけど、我々社MogiExam存在するこそすべての意義です。だから、我々社は力の限りで弊社のFortinet FCSS_LED_AR-7.6試験資料を改善し、改革の変更に応じて更新します。あなたはいつまでも最新版の問題集を使用できるために、ご購入の一年間で無料の更新を提供します。

Fortinet FCSS - LAN Edge 7.6 Architect 認定 FCSS_LED_AR-7.6 試験問題 (Q50-Q55):

質問 # 50

Which three configuration steps are needed to onboard a FortiExtender to FortiGate?

(Choose three)

Response:

- A. Set modem mode to passthrough
- B. Assign interface role to FortiExtender port
- C. Add FortiExtender to trusted device list
- D. Authorize FortiExtender on FortiGate

正解: B、C、D

質問 # 51

Refer to the exhibits.

FortiGate Security Fabric widget

Security Fabric Automation Stitch

Quarantine widget

FortiGate firewall policy

Name	Source	Destination	Schedule	Service	Action	NAT	Security Profiles	Log
Students → port1	Internet	all	always	ALL	ACCEPT	Enabled	web/default, threat-detection	All
Implicit								

FortiAnalyzer log

#	Date/Time	Device ID	User	Source	Destination IP	Service	Host Name	Action	URL	Category	Description
1	11:16:29	FGVM1V000014...		10.0.2.2	23.217.138.108	HTTP	abcomen.nl	blocked	http://abcomen.nl/	Malicious Websites	
2	11:16:29	FGVM1V000014...		10.0.2.2	23.217.138.108	HTTP	abcomen.nl	blocked	http://abcomen.nl/favicon.ico	Malicious Websites	

Examine the FortiGate configuration, FortiAnalyzer logs, and FortiGate widget shown in the exhibits.

Security Fabric quarantine automation has been configured to isolate compromised devices automatically.

FortiAnalyzer has been added to the Security Fabric, and an automation stitch has been configured to quarantine compromised devices.

To test the setup, a device with the IP address 10.0.2.1 that is connected through a managed FortiSwitch attempts to access a malicious website. The logs on FortiAnalyzer confirm that the event was recorded, but the device does not appear in the FortiGate quarantine widget.

Which two reasons could explain why FortiGate is not quarantining the device? (Choose two.)

- A. The SSL inspection should be set to deep-Inspection
- B. The threat detection services license is missing or invalid under FortiAnalyzer.
- C. The malicious website is not recognized as an indicator of compromise (IOC) by FortiAnalyzer.
- D. The IOC action should include only the FortiSwitch in the quarantine.

正解: B、C

解説:

In this scenario:

* FortiGate + FortiAnalyzer are part of the Security Fabric

* An Automation Stitch is configured:

* Trigger: Compromised Host - High (IOC from FortiAnalyzer)

* Action: Quarantine on FortiSwitch + FortiAP

A test device 10.0.2.1 visits a malicious website.

FortiAnalyzer logs show the event, but FortiGate does NOT quarantine the device.

This means the automation did not receive an IOC trigger, OR the Fabric did not classify it as a compromise.

Let's evaluate each answer option.

#C. The malicious website is not recognized as an indicator of compromise (IOC) by FortiAnalyzer.

#Correct.

For FortiGate to quarantine a device:

* FortiAnalyzer must classify the event as a Compromised Host # High / Medium / Critical

* FortiAnalyzer must generate an IOC event

* FortiGate must receive that IOC through the Fabric

Even though the FAZ log shows:

* Action = blocked

* Category = Malicious Websites

That does NOT automatically mean an IOC was generated.

A blocked website event is not always an IOC unless:

* It is included in the IOC database

* FAZ's Analytics / UTM / IOC Engine marks it as a compromise

Thus, if FAZ only logs a "Malicious Website" event but does not classify it as an IOC,

質問 # 52

To view FortiAP debug logs in the CLI, which command is used?

Response:

- A. debug controller-ap
- B. diagnose wireless-controller wlac -c
- C. diagnose debug enable → diagnose debug application cw_ac -1
- D. execute wireless ap debug start

正解: C

質問 # 53

You configure FortiAuthenticator syslog to a remote FortiAnalyzer. What additional feature becomes available with this integration?

Response:

- A. RADIUS Dictionary Customization
- B. Local Authentication Proxy
- C. Log Analytics and Reports
- D. Certificate Authority Management

正解: C

質問 # 54

```

config system dhcp server
  edit 1
    set ntp-service local
    set default-gateway 169.254.1.1
    set netmask 255.255.255.0
    set interface "fortilink"
    config ip-range
      edit 1
        set start-ip 169.254.1.2
        set end-ip 169.254.1.254
      next
    end
    set vci-match enable
    set vci-string "FortiSwitch" "FortiExtender"
  next
end

```

You've configured the FortiLink interface, and the DHCP server is enabled by default. The resulting DHCP server settings are shown in the exhibit. What is the role of the vci-string setting in this configuration?

- A. To ignore DHCP requests coming from FortiSwitch and FortiExtender devices.
- B. To reserve IP addresses for FortiSwitch and FortiExtender devices.
- **C. To connect, devices must match the VCI string; otherwise, they will not receive an IP address.**
- D. To restrict the IP address assignment to devices that have FortiSwitch or FortiExtender as their hostname.

正解: C

解説:

The DHCP configuration shows:

set vci-match enable

set vci-string "FortiSwitch" "FortiExtender"

What this means

VCI = Vendor Class Identifier (DHCP option 60)

When vci-match is enabled, the DHCP server will only respond to DHCP requests from clients whose VCI string matches the configured vendor identifiers.

FortiSwitch and FortiExtender both send DHCP option 60 with:

"FortiSwitch"

"FortiExtender"

This is used in FortiLink deployments so only these devices receive IP addresses on the FortiLink network.

Therefore:

C). To connect, devices must match the VCI string; otherwise, they will not receive an IP address.

#Correct.

This perfectly matches FortiGate FortiLink DHCP behavior.

Summary of incorrect options

A - Ignore FortiSwitch/FortiExtender

#Opposite behavior.

B - Restrict based on hostname

#VCI does NOT check hostname.

D - Reserve IPs

#No reservation occurs; it's filtering, not reserving.

質問 # 55

.....

あなたの社会生活で成功し、高い社会的地位を所有するためには、あなたはいくつかの分野で十分な能力と十分な知識を所有しなければなりません。テストFCSS_LED_AR-7.6試験に合格すると、これらの目標を達成し、有能であることを証明できます。FCSS_LED_AR-7.6模擬テストを購入すると、FCSS_LED_AR-7.6試験に流passに合格し、学習にかかる時間と労力が少なくて済みます。FCSS_LED_AR-7.6テスト問題の質問と回答は入念に選択されており、重要な情報を簡素化して学習をリラックスして効率的にしています。
