- B. To specify exclusion patterns to easily add files and folders and extensions to be prevented
- C. To specify exclusion patterns to easily exclude files and folders and extensions from detections
- D. To specify a Domain be excluded from detections

Answer: C

Explanation:

Glob syntax is used to specify exclusion patterns to easily exclude files and folders and extensions from detections. NEW QUESTION # 177

Why would you assign hosts to a static group instead of a dynamic group?

- A. You want the group to contain hosts from multiple operating systems
- B. You are managing more than 1000 hosts
- C. You need hosts to be automatically assigned to a group
- **D. You do not want the group membership to change automatically**

Explanation:

The reason why you would assign hosts to a static group instead of a dynamic group is that you do not want the group membership to change automatically.
