

# Authentic Best resources for AI-102 Online Practice Exam

**Microsoft Azure Certification Details**

### AI-102: Designing and Implementing a Microsoft Azure AI Solution

<b>Prior Certification</b> Not Required	<b>Exam Validity</b> 1 Year	<b>Exam Fee</b> \$165 USD
<b>Exam Duration</b> 180 Minutes	<b>No. of Questions</b> 40-60 Questions	<b>Passing Marks</b> 700
<b>Recommended Experience</b> Skills to build, manage, and deploy AI solutions that leverage Azure Cognitive Services and Azure Applied AI services	<b>Exam Format</b> Multiple choice, Drag & drop, Case studies, Multiple response	
<b>Languages</b> English, Japanese, Chinese (Simplified), Korean, German, French, Spanish, Portuguese (Brazil), Arabic (Saudi Arabia), Russian, Chinese (Traditional), Italian, Indonesian (Indonesia)		

P.S. Free & New AI-102 dumps are available on Google Drive shared by GuideTorrent: <https://drive.google.com/open?id=1cjg62jcsxh1h65np7FnTY84ru5OskBzN>

In peacetime, you may take months or even a year to review a professional exam, but with AI-102 exam guide, you only need to spend 20-30 hours to review before the exam, and with our AI-102 study materials, you will no longer need any other review materials, because our AI-102 study materials has already included all the important test points. At the same time, AI-102 Study Materials will give you a brand-new learning method to review - let you master the knowledge in the course of the doing exercise. You will pass the AI-102 exam easily and leisurely.

The Designing and Implementing a Microsoft Azure AI Solution (AI-102) actual questions we sell also come with a free demo. Spend no time, otherwise, you will pass on these fantastic opportunities. Start preparing for the Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam by purchasing the most recent Microsoft AI-102 exam dumps. You must improve your skills and knowledge to stay current and competitive. You merely need to obtain the AI-102 Certification Exam badge in order to achieve this. You must pass the Designing and Implementing a Microsoft Azure AI Solution AI-102 exam to accomplish this, which can only be done with thorough exam preparation. Download the Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam questions right away for immediate and thorough exam preparation.

## New AI-102 Study Guide - Cert AI-102 Guide

Our AI-102 training materials are known as instant access to download, you can receive downloading link within ten minutes, and if you don't receive, you can contact us, and we will give you reply as soon as we can. Besides, AI-102 exam materials are high-quality, since we have a professional team to compile and review, therefore the accuracy of the answers can be guaranteed. You can enjoy the right of free update for one year if you choose us, and the latest version for AI-102 Exam Dumps will be sent to you automatically. You can have conversations with us through online and offline service.

## Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q274-Q279):

### NEW QUESTION # 274

You need to measure the public perception of your brand on social media messages. Which Azure Cognitive Services service should you use?

- **A. Text Analytics**
- B. Form Recognizer
- C. Computer Vision
- D. Content Moderator

**Answer: A**

Explanation:

Explanation

Text Analytics Cognitive Service could be used to quickly determine the public perception for a specific topic, event or brand.

Example: A NodeJS app which pulls Tweets from Twitter using the Twitter API based on a specified search term. Then pass these onto Text Analytics for sentiment scoring before storing the data and building a visualisation in PowerBI. The Architecture looked something like this:

### NEW QUESTION # 275

You plan to use containerized versions of the Anomaly Detector API on local devices for testing and in on-premises datacenters.

You need to ensure that the containerized deployments meet the following requirements:

- \* Prevent billing and API information from being stored in the command-line histories of the devices that run the container.
- \* Control access to the container images by using Azure role-based access control (Azure RBAC).

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. (Choose four.) NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Answer:**

Explanation:

Explanation:

Step 1: Pull the Anomaly Detector container image.

Step 2: Create a custom Dockerfile

Step 3: Build the image

Step 4: Push the image to an Azure container registry.

### NEW QUESTION # 276

You need to analyze video content to identify any mentions of specific company names.

Which three actions should you perform in sequence? To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

The requirement is to analyze video content to identify mentions of specific company names. This is essentially an audio transcript analysis task (speech-to-text followed by entity recognition). Azure Video Analyzer for Media integrates with Content model customization to detect such entities.

Step-by-step reasoning:

\* Sign in to the Azure Video Analyzer for Media website.

\* Azure Video Analyzer for Media (formerly Video Indexer) is the service used for analyzing videos and extracting insights such as speech, text, brands, and entities.

\* From Content model customization, select Language.

\* To recognize specific company names in transcripts, you must customize the Language model.

\* Customization allows you to add vocabulary (e.g., company names) so that speech recognition and transcription are tuned to correctly identify them.

\* Add the specific company names to the include list.

\* Adding them to the include list ensures the system actively looks for and recognizes those company names during transcript analysis.

\* The exclude list would suppress terms, not detect them, so it is not correct in this scenario.

Why not other options?

\* Sign in to the Custom Vision website # Custom Vision is for image classification/object detection, not audio/video transcript entity recognition.

\* From Content model customization, select Brands # The Brands model helps detect logos and existing brand mentions, but for custom company names not in the brand catalog, you must customize the Language model.

\* Exclude list # Would filter out terms, which is opposite of the requirement.

Correct Answer Order:

\* Sign in to the Azure Video Analyzer for Media website.

\* From Content model customization, select Language.

\* Add the specific company names to the include list.

\* Customize models in Video Indexer

\* Azure Video Analyzer for Media overview

\* Content model customization in Video Indexer

### NEW QUESTION # 277

You have the following C# method.

You need to deploy an Azure resource to the East US Azure region. The resource will be used to perform sentiment analysis. How should you call the method?

- A. `create_resource("res1", "ContentModerator", "S0", "eastus")`
- **B. `create_resource("res1", "TextAnalytics", "S0", "eastus")`**
- C. `create_resource("res1", "ContentModerator", "Standard", "East US")`
- D. `create_resource("res1", "TextAnalytics", "Standard", "East US")`

**Answer: B**

Explanation:

To perform sentiment analysis, we specify TextAnalytics, not ContentModerator.

Possible SKU names include: 'F0','F1','S0','S1','S2','S3','S4','S5','S6','S7','S8' Possible location names include: westus, eastus
