Getting the Microsoft certification quickly seems impossible to you. Maybe our AZ-800 Dumps PDF is a better choice for you. It will help you get clear real exam quickly and effectively.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q194-Q199):

NEW QUESTION # 194

You have a Windows Server 2022 container host named Host1 and a container registry that contains the container images shown in the following table.

☐ You need to run the containers on Host1

Which isolation mode can you use for each image? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 195

You need to sync files from an on premises server named Server1 to Azure by using Azure File Sync.

You have a cloud tiering policy that is configured for 30 percent free space and 70 days.

Volume E on Server1 is 500 GB.

A year ago, you configured E:\Data on Server1 to sync by using Azure File Sync. The files that are visible in E:\Data are shown in the following table.

□ Volume E does NOT contain any other files.

Where are File1 and File3 located? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Reference:

NEW QUESTION # 196

Task 5

you need to configure a Group Policy preference to ensure that users in the organizational unit (OU) named Server Admins have a shortcut to a folder named \\srv1.contoso.com\data on their desktop when they sign in to the computers in the domain.

Answer:

Explanation:

See the solution of this Task below.

Explanation:

TASK 5

Objective:

* Configure a Group Policy Preference to create a shortcut to \\srv1.contoso.com\data on the desktop of users in the Server Admins OU.

Step-by-Step Guide: Using Group Policy Preferences to Create a Desktop Shortcut

Step 1: Open Group Policy Management Console (GPMC)

* Log in to a DC or a management computer with RSAT installed.

* Open Group Policy Management (gpmc.msc).

Step 2: Create a New GPO

* In the GPMC console, expand the forest and the domain (e.g., contoso.com).

* Right-click the OU named Server Admins and select Create a GPO in this domain, and Link it here.

* Name the GPO, e.g., Desktop Shortcut for Server Admins.

Step 3: Edit the GPO

* Right-click the newly created GPO and select Edit.

* This opens the Group Policy Management Editor.

Step 4: Navigate to User Preferences

* In the editor, expand:

* User Configuration > Preferences > Windows Settings > Shortcuts.

Step 5: Create the Shortcut

* Right-click Shortcuts and select New > Shortcut.

* In the New Shortcut Properties window:

* Action: Create

* Name: Data Folder

* Target Type: File System Object

* Location: Desktop

* Target Path: \\srv1.contoso.com\data

* Optionally, set an icon or description if you want.

Step 6: Configure Item-Level Targeting (Optional)

* If you want to limit this shortcut strictly to specific users/groups, click the Common tab.

* Check Item-level targeting and configure conditions (optional).

* For this scenario, linking the GPO to the Server Admins OU is usually sufficient.

Step 7: Close and Update

* Close the editor.

* In GPMC, ensure the GPO is linked to the Server Admins OU.

- * Force a Group Policy Update on client computers:
- * On a client computer:
gpupdate /force
- * Or wait for the next Group Policy refresh cycle.
- # Step 8: Verify
- * Log in as a user in the Server Admins OU.
- * The shortcut to \\srvi.contoso.com\data should appear on the desktop.

NEW QUESTION # 197

You need to meet the technical requirements for Server4.

Which cmdlets should you run on Server1 and Server4? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://4sysops.com/wiki/enable-powershell-remoting/>

NEW QUESTION # 198

You have a Windows Server container host named Server 1 and a container image named Image1.

You need to start a container from image1. The solution must run the container on a Hyper-V virtual machine.

Which parameter should you specify when you run the docker run command?

- A. --entrypoint
- B. --runtime
- C. --isolation
- D. --expose
- E. --privileged

Answer: A

Explanation:
