

HOT Latest FCP_FCT_AD-7.4 Braindumps 100% Pass | Valid Fortinet New Soft FCP - FortiClient EMS 7.4 Administrator Simulations Pass for sure

2026 Latest PassSureExam FCP_FCT_AD-7.4 PDF Dumps and FCP_FCT_AD-7.4 Exam Engine Free Share:
<https://drive.google.com/open?id=15-GYmC0HuE8YOt4OZJERPFFkr655w6nb>

Through the stimulation of the FCP_FCT_AD-7.4 real exam the clients can have an understanding of the mastery degrees of our FCP_FCT_AD-7.4 exam practice question in practice. Thus our clients can understand the abstract concepts in an intuitive way. In the answers, our experts will provide the authorized verification and detailed demonstration so as to let the learners master the latest information timely and follow the trend of the times. All we do is to integrate the most advanced views into our FCP_FCT_AD-7.4 Test Guide.

Fortinet FCP_FCT_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	FortiClient provisioning and deployment: This section focuses on deploying FortiClient to endpoint devices, creating and assigning endpoint profiles, and implementing endpoint security features to enforce protection and compliance.
Topic 2	Zero trust and Security Fabric integration: This domain explains how to integrate EMS with the Fortinet Security Fabric, configure quarantine for compromised endpoints, and implement zero trust network access to control and secure endpoint connectivity.
Topic 3	FortiClient EMS design and deployment: This domain covers the architecture, core components, and deployment modes of FortiClient EMS. It also includes installing and configuring the server to ensure proper setup and initial system operation.
Topic 4	Troubleshooting: This section covers analyzing logs and diagnostic information to identify issues with EMS and endpoints, and resolving common deployment, connectivity, and configuration problems.

New Soft FCP_FCT_AD-7.4 Simulations & Pass FCP_FCT_AD-7.4 Exam

Our FCP_FCT_AD-7.4 valid practice questions are designed by many experts in the field of qualification examination, from the user's point of view, combined with the actual situation of users, designed the most practical FCP_FCT_AD-7.4 learning materials. We believe that no one will spend all their time preparing for FCP_FCT_AD-7.4 Exam, whether you are studying professional knowledge, or all of which have to occupy your time to review the exam. Using the FCP_FCT_AD-7.4 test prep, you will find that you can grasp the knowledge what you need in the exam in a short time.

Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

Refer to the exhibit, which shows FortiClient EMS deployment, profiles.

Name	Assigned Groups	Deployment Package	Scheduled Upgrade Time	Priority	Enabled
Deployment-1	All Groups	First-Time-Installation		1	☐
Deployment-2	All Groups trainingAD.training.lab	To-Upgrade		2	☒

When an administrator creates a deployment profile on FortiClient EMS, which statement about the deployment profile is true?

- A. Deployment-2 will upgrade FortiClient on both the AD group and workgroup.
- B. Deployment-2 will install FortiClient on both the AD group and workgroup.
- C. Deployment-1 will upgrade FortiClient only on the workgroup.
- D. Deployment-1 will install FortiClient on new AO group endpoints.

Answer: A

Explanation:

* Deployment Profiles Analysis:

* Deployment-1 has the "First-Time-Installation" package and is assigned to "All Groups" with a priority of 1 but is not enabled.

* Deployment-2 has the "To-Upgrade" package, is assigned to both "All Groups" and "trainingAD.training.lab," with a priority of 2 and is enabled.

* Evaluating Deployment-2:

* Deployment-2 will upgrade FortiClient on both "All Groups" and "trainingAD.training.lab" since it is enabled and assigned to these groups. This includes both AD (Active Directory) groups and workgroups.

* Conclusion:

* Since Deployment-2 is set to upgrade FortiClient on all the assigned groups and workgroups, the correct answer is A.

References:

FortiClient EMS deployment and profile documentation from the study guides.

NEW QUESTION # 38

An administrator has activated the FortiGuard Endpoint Forensic Analysis license on FortiClient Cloud. Which statement is true about forensic analysis?

- A. It helps you to collect software inventory on the endpoints.
- B. It helps you to respond to and recover from cybersecurity incidents.
- C. It helps you to learn about available endpoint licenses on FortiClient EMS.
- D. It helps you to implement dynamic policies.

Answer: B

Explanation:

The FortiGuard Endpoint Forensic Analysis service provides remote endpoint analysis to assist organizations in responding to and recovering from cyber incidents. Forensic analysts from Fortinet's FortiGuard Labs remotely collect, examine, and present digital evidence and provide a detailed report to help with incident response and recovery efforts.

NEW QUESTION # 39

Which two statements about ZTNA destinations are true? (Choose two.)

- A. FortiClient ZTNA destinations do not support a wildcard FQDN.
- B. FortiClient ZTNA destinations use an existing VPN tunnel to create a secure connection.
- C. FortiClient ZTNA destinations provides access through TCP forwarding.
- D. FortiClient ZTNA destination authentication is enabled by default.
- E. FortiClient ZTNA destination encryption is disabled by default.

Answer: A,E

NEW QUESTION # 40

Refer to the exhibit. Why is the end user denied access to twitter.com?

- A. They are being blocked by FortiGuard categories in the web filter endpoint profile.
- B. They are being blocked by the exclusion list in the web filter endpoint profile.
- C. They are being blocked by the application firewall endpoint profile.
- D. They are being blocked by the deny list in the malware protection endpoint profile.

Answer: A

Explanation:

The block message indicates that the URL is denylisted by FortiClient. This occurs when FortiGuard categories in the web filter profile restrict access to specific websites, such as twitter.com, based on policy.

NEW QUESTION # 41

Which security attribute is verified during the SSL connection negotiation between FortiClient and FortiClient EMS to mitigate man-in-the-middle (MITM) attacks? (Choose one answer)

- A. serial number (SN)
- B. location (L)
- C. organization (O)
- D. common name (CN)

Answer: D

Explanation:

According to the FortiClient EMS Administrator Study Guide (7.2/7.4 versions) and the Fortinet Document

Library regarding SSL/TLS Endpoint Communication Security, the primary attribute verified during the SSL connection negotiation to mitigate Man-in-the-Middle (MITM) attacks is the Common Name (CN).

1. SSL Connection Negotiation & MITM Mitigation

* Verification Process: When FortiClient attempts to establish a Telemetry connection with the FortiClient EMS server, an SSL handshake occurs. To ensure it is communicating with the legitimate server and not a malicious interceptor (MITM), FortiClient verifies the server's certificate.

* Role of the Common Name (CN): The Common Name (or the Subject Alternative Name - SAN) in the certificate must match

the FQDN (Fully Qualified Domain Name) or the IP address that the client intended to connect to.

* Security Enforcement: If the CN/SAN does not match the server's expected address, FortiClient will detect a discrepancy. Depending on the Invalid Certificate Action setting in the profile (e.g., Warn or Block), it will prevent the establishment of a secure session to stop the MITM attacker from masquerading as the EMS server.

2. Why Other Options are Incorrect/Secondary

* A. Serial Number (SN): While every certificate has a unique Serial Number, it is primarily used by the Certificate Authority (CA) for tracking and revocation purposes. While FortiOS 7.2.4+ can use SN for certain restricted VPN checks, the core SSL negotiation mechanism for identifying a specific host to prevent spoofing relies on the CN/SAN fields.

* C. Location (L) and D. Organization (O): These are descriptive fields within the certificate's Subject that provide geographical and corporate information. They are not functionally used by the SSL/TLS protocol to verify the identity of the host during the connection negotiation or to mitigate MITM attacks.

3. Curriculum References

* EMS Administration Guide (System Settings Profile): Details how the client verifies the EMS server certificate. It specifies that for a connection to be trusted, the server address must align with the certificate's identity fields (CN/SAN).

* FortiGate/FortiOS 7.2.4 New Features: Highlights the specific enhancement where FortiClient EMS connectors now "trust EMS server certificate renewals based on the CN field" to ensure continuous secure communication.

NEW QUESTION # 42

.....

Perhaps you still feel confused about our FCP - FortiClient EMS 7.4 Administrator test questions when you browse our webpage. There must be many details about our products you would like to know. Do not hesitate and send us an email. Gradually, the report will be better as you spend more time on our FCP_FCT_AD-7.4 Exam Questions. As you can see, our system is so powerful and intelligent. What most important is that all knowledge has been simplified by our experts to meet all people's demands. All of our assistance is free of charge. We are happy that our small assistance can change you a lot. You don't need to feel burdened. Remember to contact us!
