ASIS Certified Protection Professional Sample Questions (Q471-Q476):

NEW QUESTION # 471

Unavoidable drainage ditches, culverts, vents, ducts, and other openings should be protected by securely fastened welded-bar grills when they have a cross-sectional area greater than:

- A. 04 square inches
- **B. 96 square inches**
- C. 10 square inches
- D. 48 square inches
- E. 64 square inches

Answer: B

NEW QUESTION # 472

A security organization that utilizes a departmental structure may limit opportunities for:

- **A. cross-functional cooperation and coordination.**
- B. team growth and a strong work ethic.
- C. individual growth.
- D. productivity.

Answer: A

NEW QUESTION # 473

After an information loss, which of the following three steps should be taken by an organization?

- A. Contact law enforcement, preserve all evidence, ensure the investigation is not compromised
- B. Identify source of the leak, implement the business continuity plan, update security procedures
- C. Suspend access to the perpetrator, conduct an inventory of proprietary information, document the investigation
- **D. Conduct an investigation, conduct a damage assessment, implement the recovery plan**

Answer: D

Explanation:

After an information loss, the appropriate steps are to conduct an investigation to determine the cause and scope of the loss, conduct a damage assessment to understand the impact, and implement the recovery plan to mitigate the damage and restore operations. These steps ensure the incident is comprehensively addressed and lessons are learned to prevent recurrence.

ASIS Certified Protection Professional (CPP) References:

* Incident Response Protocols: The CPP material outlines the sequence of investigation, assessment, and recovery as best practices for handling information security breaches.

* Business Continuity and Disaster Recovery: Chapter 7 emphasizes the importance of structured recovery processes to maintain operational resilience.
